Mentoring in Action Carol Pelletier Radford, 2006 A guide to mentoring new teachers in a monthly format *The First Year Matters* Carol Pelletier Radford, 2009 This book is designed for new teachers to serve as a documentation and reflection of their first year of teaching The idea for the book came from teacher mentors using the author's book *Mentoring in Action The First Year Matters* *Being Mentored In Action* provides new teachers with a practical guide to use throughout their mentoring experience as well as for self reflection Many new teachers become overwhelmed in their first year of teaching and leave the profession Many are so busy trying to meet all of the criteria of the assessments based curriculum that often the most obvious skills are overlooked for discussion with their mentor Often the mentor and the teacher spend their meetings discussing one student or situation This book outlines the school year month by month so curriculum based topics can be discussed in a more systematic way The author encourages the new teacher to become a listener and filter all of the information coming at them as a new teacher They can't do everything This book will help them use the mentoring process as a way to get the most out of their first year of teaching without getting discouraged The book can be used with small groups of new teachers as well as individually with a teacher mentor but can also serve as a guide to enrich the quality of their reflections as a tool to document the school year for licensing purposes as well as serve as a ready reference for the second year of teaching

Seccia,Ling Zhai,Erin Kearney,Xiufeng Liu,Nooshin Shafaei,Tanika Shedrick,2021-08-19 Why are preservice teachers often told by veteran teachers to forget what you learned in teacher preparation programs Why is there a gap between pedagogical practices employed at schools and those taught at colleges and universities And why after evidence from countless studies are there still so few teachers of color working in our rapidly diversifying schools These questions are addressed in this book which describes a reconceptualized teacher preparation program based on a teacher residency model This model is grounded in three core beliefs first that teacher quality is a shared responsibility between universities and school districts second that all students have a right to high quality teachers who are as racially ethnically and linguistically diverse as the students they teach and third that for education to be transformative future educators must have the right balance of theoretical knowledge and practical experiences grounded in specific contexts Through a combination of rich description and qualitative and quantitative program data the authors make the case that university programs focused on the communities they serve can ensure more effective learner ready teachers who remain in the profession longer By providing a detailed blueprint for program development the contents of this book will be of value and interest to educational leaders policy makers and researchers
