**The New International Labour Studies** Ronaldo Munck, 1988      Renewing International Labour Studies Marcus Taylor, 2013-09-13 This volume seeks to re energise the paradigm of the New International Labour Studies by detailing how struggles over the construction reproduction utilisation and restructuring of labour forces are the contested social foundations upon which the global economy stands Through a combination of theoretical works and a series of case studies the volume highlights the cutting edge of international labour studies Its expands on three pivotal areas of study within the discipline 1 the social construction of new labour forces across an expanding international division of labour 2 the self organising potential of workers particularly within non traditional sectors and 3 the possibilities for transborder labour movements to help address the asymmetrical power relationships between globalised capital and localised labour In addressing these themes the volume helps explain not only how the contemporary international division of labour is produced and reproduced but also the strengths and limits to current attempts to overcome its unequal and divisive nature This book was published as a special issue of Third World Quarterly      *The Newest International Labour Studies* Peter Waterman, 1996      **Renewing International Labour Studies** Marcus Taylor, 2013-09-13 This volume seeks to re energise the paradigm of the New International Labour Studies by detailing how struggles over the construction reproduction utilisation and restructuring of labour forces are the contested social foundations upon which the global economy stands Through a combination of theoretical works and a series of case studies the volume highlights the cutting edge of international labour studies Its expands on three pivotal areas of study within the discipline 1 the social construction of new labour forces across an expanding international division of labour 2 the self organising potential of workers particularly within non traditional sectors and 3 the possibilities for transborder labour movements to help address the asymmetrical power relationships between globalised capital and localised labour In addressing these themes the volume helps explain not only how the contemporary international division of labour is produced and reproduced but also the strengths and limits to current attempts to overcome its unequal and divisive nature This book was published as a special issue of Third World Quarterly      **The "new" International Labour Studies** Robin Cohen, 1980      International Labour and the Third World Rosalind E. Boyd, Robin Cohen, Peter C. W. Gutkind, 2023-08-11 Originally published in 1987 this book focusses on the debate around the international role of the working class and other dominated classes such as the rural and urban poor The contributions discuss whether Marx s original version of the revolutionary role of workers can still be sustained They examine the response of workers to the globalisation of production to structural unemployment in the industrialized world and to the changing composition of the workforce in the industrialising periphery The volume questions the historic starting points in the theorization of international labour      *Global Political Economy* Ronen Palan, 2013-05-07 Global Political Economy GPE is a broad and varied field of study and draws insight from a great number of fields and approaches One of the

**Injury and the New World of Work** Terrence Sullivan, 2011-11-01 Over the last fifty years the nature of work and work injury has changed dramatically Since the 1980s workers compensation claims have grown steadily and insurance institutions are feeling the crunch In Injury and the New World of Work Terrence Sullivan emphasizes the precarious line between the expansion of needs based justice and the preservation of work based prosperity The contributors to the book represent the fields of public health sociology anthropology epidemiology nursing psychiatry management economics public policy and labour studies They explore four general challenges to the workplace and the compensation system the dramatic rise in disability associated with the changing nature of work methods of preventing injury and disability the need for rehabilitation and the difficulty of reconciling fairness for workers and economic sustainability in a competitive era Injury and the New World of Work examines a broad range of research solutions and policy options for dealing with the critical state of workers compensation The essays draw on recent case studies and original empirical work from Canada situating the book within a comparative international frame of reference

Labour and Globalisation Ronaldo Munck, 2004-01-01 It is often assumed that social movements such as that of labour will simply be overwhelmed by the changes brought about by globalisation This volume points to this conclusion as at best premature and possibly also misguided
