In this book Joel Spring offers a powerful and closely reasoned justification and definition for the universal right to education applicable to all cultures as provided for in Article 26 of the United Nations Universal Declaration of Human Rights One sixth of the world's population nearly 855 million people are functionally illiterate and 130 million children in developing countries are without access to basic education Spring argues that in our crowded global economy educational deprivation has dire consequences for human welfare Such deprivation diminishes political power Education is essential for providing citizens with the tools for resisting totalitarian and repressive governments and economic exploitation What is to be done The historically grounded highly original analysis and proposals Spring sets forth in this book go a long way toward answering this urgent question Spring first looks at the debates leading up to the Universal Declaration of Human Rights in 1948 to see how the various writers dealt with the issue of cultural differences These discussions provide a framework for examining the problem of reconciling cultural differences with universal concepts He next expands on the issue of education and cultural differences by proposing a justification for education that is applicable to indigenous peoples and minority cultures and languages This justification is then applied to all people within the current global economy Acknowledging that the right to an education is inseparable from children's rights he uses the concept of a universal right to education to justify children's rights and in turn applies his definition of children's liberty rights to the concept of education His synthesis of cultural language and children's rights provides the basis for a universal justification and definition for the right to education which in the concluding chapters Spring uses to propose universal guidelines for human rights education and instruction in literacy numeracy cultural centeredness and moral economy **The Universal History of Numbers** Georges Ifrah, 2000-10-09

and discover the extraordinary story of how consciousness is born from the unconscious This is the story of existence This is the story of the meaning of life the universe and everything Everything conscious has the unconscious for a mother To exist is to live to have a mind and to think As we see in our dreams thinking can produce outer worlds which we imagine are external to us but are just our own constructs We are all part of a living cosmic organism seeking to optimize itself to perfect itself The Cosmic Mind produces a Cosmic World in which Mind can contend with its own construct and come to consciousness via all the problems and struggles it encounters there We are alienated from the world because we fail to understand that we unconsciously created it Only consciousness can reveal the truth that everything is made by us that we have total control over it if we put our mind to it Minds and their thoughts are all that exist There is nothing else
