McCall,Lesley A. Whyte,2007-04-05 This title is directed primarily towards health care professionals outside of the United States It is a well known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings The development of competence in these practices is one of the most important aspects of pre registration programmes and this is one of the few UK based texts that takes an educational approach to these practices as opposed to a purely procedure driven approach As in previous editions the emphasis is on a holistic approach with the recognition that each patient is a unique individual Each procedure contains rationale and information for patient education in addition to step by step guidance Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers

confidence when they begin clinical work. Relevance to hospital and community settings makes it applicable to a wide audience. The rationale sections link to the evidence base thereby ensuring best practice.

Cardiothoracic Manual for Perioperative Practitioners Dr Bhuvaneswari Krishnamoorthy, 2020-02-03 Cardiothoracic surgery is constantly evolving in many aspects and there are many text books exist to fulfil the gap of new evidences. Most of these books are written for surgeons, anaesthetists and there is a significant deficit in many important areas which are explored in this book. It is aimed for all perioperative practitioners such as surgical care practitioners, surgical cardiothoracic trainees, anaesthetic trainees, anaesthetic practitioners, recovery practitioners, ward advanced nurse practitioners and perfusionists. It is very important for the perioperative practitioner who wants to start their career in cardiothoracic surgery to understand the step by step surgical procedure is vital. Cardiothoracic Manual for Perioperative Practitioners is devoted to delivering comprehensive coverage of all aspects of cardiothoracic surgery with emphasis on the roles and importance of the full theatre team. Details are provided throughout initial theatre set up and surgical instrumentation selection. A step by step walk through of routine surgical procedures, cardiopulmonary bypass guidance, investigations undertaken during the intraoperative period and a detailed background of surgical anatomy is provided. The book also covers essential aspects associated with recovery of the patient and the common pitfalls in surgery and recovery and how these can be avoided. The structure and organisation of the theatre environment, ethical and legal issues, preventive and protective measures and the importance of swab counts are explained succinctly and systematically by experts in this field. The reader will have reliable and complete guidance to provide all the knowledge required to be ready to work in the theatre environment. Each chapter contains important references for further reading and greater in depth study. All chapters are written by an experienced practising surgeons, anaesthetists and practitioners.

Critical Care Manual of Clinical Procedures and Competencies Jane Mallett, John Albarran, Annette Richardson, 2013-05-15 This manual is aimed at all healthcare practitioners from novice to expert who care for the critically ill patient recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview beginning with basic principles and progressing to more complex ideas to support

practitioners to develop their knowledge skills and competencies in critical care **Nurse Practitioners** Mike Walsh, 2006

This is a comprehensive text for nurse practitioners that integrates the required clinical skills with professional and theoretical issues in one book. It uses a systems approach to cover the most frequently presenting problems that the nurse practitioner will encounter. The scope of the book then widens to include psychological and emotional problems as well as the special needs of children and those patients with chronic health problems. Using a practical approach, the content is based on current best evidence. The book has been derived from the editors' experience as a course team running the RCN Institute BSc Nurse Practitioner course in Lancaster and Carlisle. Nurse practitioners is an essential purchase for all nurse practitioners and nurse practitioner students. It is relevant to both primary and secondary care and fulfils the needs of those nurses working towards a higher level of autonomous practice. Comprehensive coverage of the new clinical skills that NPs will need in their expanding roles will give them confidence and enable them to pass their courses. Highly illustrated with clear line drawings to aid understanding and learning. Subject experts have contributed to various chapters to ensure that best practice is given throughout. End of chapter summaries aid revision. Reference lists facilitate further study. Fully updated in line with clinical and policy developments and includes new material in the form of research studies and literature. The pharmacology content of each chapter has been increased to reflect the development of nurse prescribing and the growth of patient group directives. New chapters on Blood Disorders, Endocrine Disorders, Common Paediatric Problems, Common Mental Problems. New user friendly page design and layout.

Passing Your Advanced Nursing OSCE Helen Ward, Julian Barratt, Navreet Paul, 2021-07-28

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence and students preparing for practical examinations in non medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool designed to be read in conjunction with any recommended core clinical textbooks, however, along with giving students step by step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non medical prescribing students.

Manual of Simulation in Healthcare Richard H. Riley, 2008

Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from

established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anaesthesia
