Sturmberg,2007 Refocuses on the subjective and social nature of health and illness This book takes a systems approach to primary care incorporating developments social aspects critical discourse international perspectives and the history and philosophy of medicine It is also suitable for general practitioners and other primary healthcare professionals **For Public Service Or Money** ,2005 Abstract Geographical imbalances in the health workforce have been a consistent feature of nearly all health systems especially in developing countries The authors investigate the willingness to work in a rural area among final year nursing and medical students in Ethiopia Analyzing data obtained from contingent valuation

questions they find that household consumption and the student's motivation to help the poor which is their proxy for intrinsic motivation are the main determinants of willingness to work in a rural area. The authors investigate who are willing to help the poor and find that women are significantly more likely to help than men. Other variables including a rich set of psycho-social characteristics are not significant. Finally, the authors carry out some simulations on how much it would cost to make the entire cohort of starting nurses and doctors choose to take up a rural post.

Nursing against the Odds Suzanne Gordon, 2012-05-15

In the United States and throughout the industrialized world just as the population of older and sicker patients is about to explode we have a major shortage of nurses. Why are so many RNs dropping out of health care's largest profession? How will the lack of skilled experienced caregivers affect patients? These are some of the questions addressed by Suzanne Gordon's definitive account of the world's nursing crisis. In *Nursing against the Odds* one of North America's leading health care journalists draws on in-depth interviews, research studies and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis. Gordon examines how health care cost cutting and hospital restructuring undermine the working conditions necessary for quality care. She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals. In Gordon's view the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from shoddy press coverage of the important role RNs play in the delivery of health care. Gordon also identifies the class and status divisions within the profession that hinder a much needed defense of bedside nursing. She explains why some policy panaceas hiring more temporary workers importing RNs from less developed countries fail to address the forces that drive nurses out of their workplaces. To promote better care Gordon calls for a broad agenda that includes safer staffing improved scheduling and other policy changes that would give nurses a greater voice at work. She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation. Finally Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care.

Granville,2007-12 Cry of A Nurse tells of my life as a nurse and how I coped with the shortage of nurses As you read my book you will see why there is a shortage of nurses what is causing the shortage and how nurses are coping with it I want American s as well as the world to see what nurses are going through because of it and what can be done to end the shortages of nurses I wrote this book to bring out the reality why there is a shortage to help nurses and encourage all those appointed and anointed by God to become nurses do not stay away but join the profession you know who you are Especially if you have a great desire to help the sick We are there but we do not want to be ignored or taken for granted We want to be respected and appreciated Call us and love us that s all we ask The Nurses *Nursing and Collaborative Practice* Benny Goodman,Ruth Clemow,2010-06-22 As modern healthcare evolves it is essential for nurses to understand and work with a diverse range of people to provide quality care But it is often difficult to grasp the many roles of those in healthcare services This book provides a clear practical and up to date guide to the various people that nurses work with including the essential role of service users themselves and how to work with them to improve care This new edition includes increased coverage of teamwork and improving mental health It is updated throughout including discussion of LiNKS the Care Quality Commission and Every Child Matters Principles of Practice Management W.E. Fabb,John Fry,2012-12-06 One of the few real and lasting benefits of international medical meetings is the opportunity to meet talk gossip and get to know colleagues from other countries So it was that we met talked and planned at WONCA World Organization of National Colleges and Academies and Academic Associations of General Practitioners Family Physicians meetings at Montreux and New Orleans We realized that although we worked in different places and in different practices primary health care was essentially the same the world over Our roles our problems our clinical content our challenges and objectives were similar whether we work in Europe North America Australasia South Africa or developing countries With such similarities we asked ourselves why not share our common experiences for mutual benefits The question developed into an idea and the idea into this book We started by selecting what we considered were important topics and then we invited friends and colleagues to join us in putting our experiences and beliefs from years of practice to readers from all over the world to demonstrate our common concerns and to learn from one another **Unequal Time** Dan Clawson,Naomi Gerstel,2014-07-10 Life is unpredictable Control over one s time is a crucial resource for managing that unpredictability keeping a job and raising a family But the ability to control one s time much like one s income is determined to a significant degree by both gender and class In Unequal Time sociologists Dan Clawson and Naomi Gerstel explore the ways in which social inequalities permeate the workplace shaping employees capacities to determine both their work schedules and home lives and exacerbating differences between men and women and the economically privileged and disadvantaged Unequal Time investigates the interconnected schedules of four occupations in the health sector professional class doctors and nurses and working class EMTs and nursing assistants While doctors and EMTs are predominantly men nurses and nursing assistants are overwhelmingly women In all four occupations workers

routinely confront schedule uncertainty or unexpected events that interrupt reduce or extend work hours Yet Clawson and Gerstel show that members of these four occupations experience the effects of schedule uncertainty in very distinct ways depending on both gender and class But doctors who are professional class and largely male have significant control over their schedules and tend to work long hours because they earn respect from their peers for doing so By contrast nursing assistants who are primarily female and working class work demanding hours because they are most likely to be penalized for taking time off no matter how valid the reasons Unequal Time also shows that the degree of control that workers hold over their schedules can either reinforce or challenge conventional gender roles Male doctors frequently work overtime and rely heavily on their wives and domestic workers to care for their families Female nurses are more likely to handle the bulk of their family responsibilities and use the control they have over their work schedules in order to dedicate more time to home life Surprisingly Clawson and Gerstel find that in the working class occupations workers frequently undermine traditional gender roles with male EMTs taking significant time from work for child care and women nursing assistants working extra hours to financially support their children and other relatives Employers often underscore these disparities by allowing their upper tier workers doctors and nurses the flexibility that enables their gender roles at home including for example reshaping their workplaces in order to accommodate female nurses family obligations Low wage workers on the other hand are pressured to put their jobs before the unpredictable events they might face outside of work Though we tend to consider personal and work scheduling an individual affair Clawson and Gerstel present a provocative new case that time in the workplace also collective A valuable resource for workers advocates and policymakers alike Unequal Time exposes how social inequalities reverberate through a web of interconnected professional relationships and schedules significantly shaping the lives of workers and their families Challenging Medicine David Kelleher,Jonathan Gabe,Gareth

Williams,2013-05-13 This highly topical and controversial book presents a lively re appraisal of the current changes to the health service and analyzes their effects on the status and practice of health professionals Modern medicine is a powerful institution With the help of highly developed drugs and surgical techniques it promises to relieve suffering improve the quality of life and extend the life span Conversely it is expensive for the governments insurance companies and individuals who pay for it and sometimes appears to be insensitive to the needs of those for whom it provides And while recent restructuring of healthcare delivery services has provided medical practitioners with new challenges there has been very little consideration of the range of pressures that they now face Edited and written by experienced medical sociologists this book draws together analysis of a number of diverse challenges to medicine and provides original debate on the challenges posed from within medicine from nurses and managers and alternative practitioners and from outside by self help groups the women s movement and the media **Health Care in a Changing Setting** Ruth Porter,David W.
