Paradoxes in Nurses' Identity, Culture and Image Margaret McAllister, Donna Brien, 2020-01-29 This book examines some of the more disturbing representations of nurses in popular culture to understand nursing s complex identities challenges and future directions It critically analyses disquieting representations of nurses who don t care who kill who inspire fear or who do not comply with laws and policies Also addressed are stories about how power is used as well as supernatural experiences in nursing Using a series of examples taken from popular culture ranging from film television and novels to memoirs and true crime podcasts it interrogates the meaning of the shadow side of nursing and the underlying paradoxes that influence professional identity Iconic nursing figures are still powerful today Decades after they were first created Ratched and Annie Wilkes continue to make readers and viewers shudder at the prospect of ever being ill Modern storytelling modes are bringing to audiences the grim reality that some nurses are members of the working poor like Cath Hardacre in Trust Me and others can be dangerous con artists like the nurse in Dirty John This book is important reading for

all those interested in understanding the links between nursing's image and the profession's potential as an agent for change

Current Issues in Nursing and Midwifery I Melike YAVAŞ ÇELİK, 2025-07-11 **Professional Identity in the Caring Professions** Roger Ellis, Elaine Hogard, 2020-12-29 Professional identity is a central topic in all courses of professional training and educators must decide what kind of identity they hope their students will develop as well as think about how they can recruit for, facilitate and assess this development. This unique book explores professional identity in a group of caring professions looking at definition, assessment and teaching and learning. Professional Identity in the Caring Professions includes overviews of professional identity in nursing, medicine, social work, teaching and lecturing, along with a further chapter on identity in emergent professions in healthcare. Additional chapters look at innovative approaches to selection, competency development, professional values, leadership potential and reflection as a key element in professional and interprofessional identity. The book ends with guidance for curriculum development in professional education and training and the assessment of professional identity. This international collection is essential reading for those who plan to deliver and evaluate programs of professional training as well as scholars and advanced students researching identity in the caring professions including medicine, nursing, allied health, social work and teaching. *Interprofessional Education* Pat Bluteau, Ann Jackson, 2009-10-23 This text will demystify interprofessional education showing readers how theory can be turned into practice. Aimed at those interested in establishing or developing IPE strategies within education and practice settings, it outlines tried and tested approaches giving a true insight into the successes and outcomes when IPE is implemented. **Signs of Life** Graeme Harper, Andrew Moor, 2005 Signs of Life: Medicine and Cinema is the first single volume to consider the cinematic representation of medicine, medical science and the medical profession and explores the political implications of the representations of doctors, nurses, patients, diseases and disabilities. The essays in this collection from a wide range of film scholars and medical practitioners also consider how formal qualities of cinema such as empirical observation, mise en scène, propaganda and education, melodrama, documentary and narrative construction impact on our understanding of medical procedures and the public image of medicine. *Media and Health* Clive Seale, 2003-01-17 This book appears to fill a substantial gap in the literature at present. There are quite simply no books available which engage seriously and competently with the presentation of health issues in the media and certainly none which focuses on representations of health and illness in as thematically coherent a manner as Seale proposes to do. Richard Gwyn, University of Cardiff. This is an excellent resource for students. It provides a comprehensive review of secondary literature in the field and is very well researched. Students of sociology of health and illness and in media and communication studies will find the book invaluable. David Oswell, Goldsmiths College, University of London. This is a comprehensive work on media health providing an invaluable toolkit for understanding health and the media in contemporary society. Seale goes further than previous textbooks critiquing the lament of media health promoters in order to explore the moralisation and

commercialisation of media health Dr Annette Hill University of Westminster How are health matters presented by the mass media How accurate are the messages we are receiving This book demonstrates how health messages in popular mass media are important influences in our lives and that they are not neutral being subject to many determining influences It demonstrates the importance of mass media for understanding the experience of illness health and health care bringing together the latest thinking in the field of media studies and the sociology of health and illness This book provides a thorough review of research literature on media representations of health illness and health care covering their production characteristic forms and relationships with the everyday lives of media audiences It brings together both well known and lesser known studies in the context of an integrated sociological argument about media and health Media producers are subject to a variety of influences from medical lobbies scientific organizations and not least the commercial pressure to satisfy media saturated audiences These mean that aims of health promoters are not always easily achieved leading to considerable tensions that require a deeper understanding of media health than has hitherto been applied to them This book will be essential reading for health educators and promoters as well as health care providers interested in the cultural aspects of health sociologists of health and illness and students and academics of media studies The Nurse in Popular Media Marcus K. Harmes, Barbara Harmes, Meredith A. Harmes, 2021-11-01 The image of the nurse is ubiquitous both in life and in popular media One of the earliest instances of nursing and media intersecting is the Edison phonographic recording of Florence Nightingale's voice in 1890 Since then a parade of nurses good bad or otherwise has appeared on both cinema and television screens How do we interpret the many different types of nurses real and fictional lifelike and distorted sexual and forbidding who are so visible in the public consciousness This book is a comprehensive collection of unique insights from scholars across the Western world Essays explore a diversity of nursing types that traverse popular characterizations of nurses from various time periods The shifting roles of nurses are explored across media including picture postcards film television journalism and the collection and preservation of uniforms and memorabilia *Reflective Practice* Janet Hargreaves, Louise Page, 2013-12-19 Reflective practice is an essential skill for those working in health and social care but why is it so vital and how can it be learned As inter disciplinary working becomes more common finding shared ways of reflection on practice are becoming more and more important How do we share our ideas and thoughts to enrich both professionals and their client base This book uses stories and exercises to enable readers to develop their skills Its emphasis is on the practical from how to construct a reflective essay to the ethical ambiguities of whistleblowing and constructing a professional persona The book is written with the needs of students of health and social care in mind For those who want to develop their skills beyond the scope of the book each chapter ends by with a step up suggestion enabling them to build on what they have already learned **Have Women Made a Difference?** Judith Harford, Claire Rush, 2010 Tracing the evolution of women's role in university education from the 19th century to the present day this book captures the complexity

of women's position within the academy and poses the critical question Have women made a difference

The Palgrave Handbook of Gender and Healthcare Ellen Kuhlmann, Ellen Annandale, 2012-06-26 This authoritative state of the art reference collection addresses the main issues and core debates related to gender and healthcare in one accessible volume This essential guide to an area of increasing interest provides a critical overview of debates as well as practical guidance on how to bring gender perspectives to the heart of international health policy practice and research

Visual Communication for Social Work Practice Sonia M. Tascón, 2018-09-03 How are we to understand how the dominance of visual images and representations in late modernity affects Social Work practice research and education Social workers are increasingly using still and moving images to illustrate their work to create new knowledge and to further specific groups interests As a profession in which communication is central visual practices are becoming ever more significant as they seek to carry out their work with and for the marginalised and disenfranchised It is time for the profession to gain more critical analytical and practical knowledge of visual culture and communication in order to use and create images in accordance with its central principle of social justice That requires an understanding of them beyond representation As important as this is it is also where the profession's scholarly work in this area has remained and halted and thus understanding of the work of images in our practices is limited In order to more fully understand images and their effects both ideologically and experientially social workers need to bring to bear other areas of study such as reception studies visual phenomenology and the gaze These other analytical frames enable a consideration not only of images per se but also of their effect on the viewer the human spectators and the subjects at the heart of Social Work By bringing understandings and experiences in Film Media and Communications Visual Communication for Social Work Practice provides the reader with a wide range of critically analytical frames for practitioners activists educators and researchers as they use and create images This invites a deeper knowledge and familiarity with the power dimensions of the image thus aligning with the social justice dimension of Social Work Examples are provided from cinema popular media but more importantly from Social Work practitioners themselves to demonstrate what has already been made possible as they create and use images to further the interpersonal communal and justice dimensions of their work This book will be of interest to scholars students and social workers particularly those with an interest in critical and creative methodologies
