performance Undernourished and untrained children tend to attain lower scores on standardised tests are more likely to become sick miss school and to fall behind in class Also hungry children have low energy are more irritable and have difficulty concentrating which interferes with learning Therefore school feeding and PA programs were established by several schools and public and private organizations to provide proper nourishment and the possibility of practicing PA In addition it helps preventing the negative effects of hunger and malnutrition The School Breakfast Programs was established as a pilot project in 1966 in response to the needs of children arriving at school without having eaten breakfast Now permanent breakfast programs help states provide daily breakfast to millions of students in thousands of schools The positive impact of this program cannot be underestimated Not only do many teachers report that students are more alert and perform better in class after eating a nutritious breakfast but published studies also found that breakfast programs are associated with significant improvements in academic functioning among school children PA programs can substantially improve children s ability to learn and their state of health by making PA a part of their daily lives Being physically active early in life has many physical social and emotional benefits and can lead to a reduced incidence of chronic diseases in adulthood In addition teachers report
