Congress. Senate. Special Committee on Aging, United States. Congress. Senate. Committee on Agriculture, Nutrition, and Forestry, 1991 Handbook of Pain and Aging David I. Mostofsky, Jacob Lomranz, 2013-11-11 From time to time professional journals and edited volumes devote some of their pages to considerations of pain and aging as they occur among the aged in different cultures and populations One starts from several reasonable assumptions among them that aging per se is not a disease process yet the risk and frequency of disease processes increase with ongoing years The physical body's functioning and ability to restore all forms of damage and insult slow down the immune system becomes compromised and the slow growing pathologies reach their critical mass in the later years The psychological body also becomes weaker with unfulfilled promises and expectations and with tragedies that visit individuals and families and the prospect that whatever worlds remain to be conquered will most certainly not be met with success in the rapidly passing days and years that can only culminate in death Despair and depression coupled with infirmity and sensory and or motor inefficiency aggravate both the threshold and the tolerance for discomfort and synergistically collaborate to perpetuate a vicious cycle in which the one may mask the other Although the clinician is armed with the latest advances in medicine and pharmacology significant improvement continues to elude her or him The geriatric specialist all too familiar with such realities usually can offer little else than a hortative to learn to live with it but the powers and effectiveness of learning itself have declined **Social Structures and Aging Individuals** K. Warner Schaie, Ronald P. Abeles, 2008-07-02 A useful reference book Readers will find themselves returning to chapters again and again **PsycCritiques** This is the 20th and final volume in the Societal Impact on Aging series It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process The editors therefore invited major organizers of and contributors to the 19 earlier volumes to review both the accomplishments and omissions of their efforts discuss some timely new topics and provide guidelines for future research and theoretical explanations The book is divided into five broad topics health and wellbeing including the role of religion personality and cognition the impact of changes in technology and the work place issues of socio cultural change and historical context and the familial and societal contexts of aging **Betrayal** United States.
