Nutritional Factors In General Medicine:

Nutritional Factors in General Medicine Mark D. Altschule, 1978 The Surgeon General's Report on Nutrition and Health United States. Public Health Service. Office of the Surgeon General, 1988 **Nutritional Information Labeling Act of 1985** United States. Congress. Senate. Committee on Labor and Human Resources, 1986 *Approach to Internal Medicine* David Hui, Alexander A. Leung, Christopher Ma, 2022-01-31 The fully updated fifth edition of this highly successful textbook provides an integrated symptom and issue based approach to internal medicine with easily accessible high yield clinical information For each topic carefully organized sections on different diagnoses investigations and treatments are designed to facilitate patient care and examination preparation Numerous clinical pearls and comparison tables are provided to help enhance learning and international units US and metric are used to facilitate application in everyday clinical practice In addition to the central tenets of internal medicine the book covers many highly important rarely discussed topics in medicine including palliative care obstetrical medicine transfusion reactions needle stick injuries interpretation of gram stain depression and code status discussion This fifth edition additionally includes new coverage of the coronavirus 19 and cancer survivorship while being fully updated throughout Authors present this information in a streamlined fashion preserving the book's pocket sized quick reference format *Approach to Internal Medicine* continues to serve as an essential reference primarily for medical students residents and fellows with practicing physicians nurses and advanced practice providers also finding the text of value as a point of care reference Influence of Dietary Factors, Nutrients, and the Gut-Lung Axis on Respiratory Health Tomoko Suzuki, Naser Alsharairi, Inês Brandão, 2025-02-21 Dietary habits and nutrients are gaining increasing recognition as modifiable factors influencing respiratory health Food components including vitamins minerals fatty acids and bioactive compounds like flavonoids through their antioxidant and anti inflammatory properties have been associated with ameliorated lung function and attenuated viral infections To illustrate this multiple studies show that the Mediterranean diet known for its emphasis on fruits vegetables whole grains and olive oil has a beneficial effect on respiratory health Furthermore the dynamic interplay between diet and lungs appears to revolve around the immune system making immune interactions a central topic of discussion The substantial influence of the gut microbiota becomes evident when considering that approximately 70-80% of immune cells reside in the gut Hence the gut microbiota emerges as a crucial mediator of the impact of food on health including respiratory health Gut dysbiosis is believed to be associated with the etiology of respiratory lung diseases such as asthma COPD chronic bronchitis emphysema and lung cancer Microbiota derived metabolites such as short chain fatty acids SCFAs produced from the fermentation of non digestible carbohydrates have been reported to regulate gut inflammation Probiotics SCFAs bioactive compounds and dietary fiber as well as restricted dietary patterns have been shown to reduce gut inflammation and play a protective role in respiratory diseases However the exact mechanisms underlying these processes are still to be unravelled **Encyclopedia of Human**
