in 1869 it connected with the Union Pacific Railroad to form the first transcontinental passage Sacramento soon became an industrial hub and major food processing center By 1879 it was named the state capital and seat of government In the twentieth century the Sacramento area benefitted from the federal government s major investment in the construction and operation of three military bases and other regional public works projects Rapid suburbanization followed along with the building of highways bridges schools parks hydroelectric dams and the Rancho Seco nuclear power plant which activists would later shut down Today several tribal gaming resorts attract patrons to the area while Old Sacramento revitalizes the original downtown as it celebrates Sacramento s pioneering past This environmental history of Sacramento provides a compelling case study of urban and suburban development in California and the American West As the contributors show Sacramento has seen its landscape both ravaged and reborn As blighted areas rail yards and riverfronts have been reclaimed and parks and green spaces created and expanded Sacramento s identity continues to evolve As it moves beyond its Gold Rush Transcontinental Railroad and government town heritage Sacramento remains a city and region deeply rooted in its natural environment
