Pain A Nursing Approach To Assessment And Analysis:

Pain, a Nursing Approach to Assessment and Analysis Noreen T. Meinhart, Margo McCaffery, 1983 *Pain, a Nursing Approach to Assessment and Analysis* Noreen T. Meinhart, Margo McCaffery, 1983 *Integrated Approach to Management of Pain* National Library of Medicine (U.S.), 1986 *Cancer Pain Management* Deborah B. McGuire, Connie Henke Yarbro, Betty Ferrell, 1995

Cancer Pain Management Second Edition will substantially advance pain education. The unique combination of authors—an educator, a leading practitioner and administrator, and a research scientist—provides comprehensive authoritative coverage in addressing this important aspect of cancer care. The contributors, acknowledged experts in their areas, address a wide scope of issues. Educating health care providers to better assess and manage pain and improve patients' and families' coping strategies are primary goals of this book. Developing research-based clinical guidelines and increasing funding for research is also covered. Ethical issues surrounding pain management and health policy implications are also explored.

Research Methods for Massage and Holistic Therapies Glenn Hymel, 2005-09-23

This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature as well as active researchers. The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions, specifically massage therapy. Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science disciplines and professions. Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation (COMTA) that massage therapy schools incorporate into their curricula provisions to ensure a research-literate profession. Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research, allowing application to practice. Relies heavily on concept maps, flowcharts, tables, and illustrations and excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature-based and hypothetical research examples, illustrations from several manual therapy professions employing therapeutic massage, make the material pertinent to real-life settings. An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories, and affiliated research strategies and methods are considered in detail. Review summary tables give an overview of the narrative development of topics. Boxes provide the essential features of a given topic. Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature. Content is cross-referenced for use with the Massage Therapy Foundation's Massage Therapy Research Curriculum Kit to provide both instructors and students in the 6-15 and 24-hour options levels an extensively developed resource in one place. Each chapter includes recommended web sites and software application.
