notion of a personal self took centuries to evolve reaching the pinnacle of autonomy with Descartes I think therefore I am in the 17th century This personalisation of identity thrived for another hundred years before it began to be questioned subject to the emergence of broader more inclusive forms of agency *Simulated Selves The Undoing Personal Identity in the Modern World* addresses the constructed notion of personal identity in the West and how it has been eclipsed by the development of new technological social art historical and psychological infrastructures over the last two centuries While the provisional nature of the self sense has been increasingly accepted in recent years *Simulated Selves* addresses it in a new way not by challenging it directly but by observing changes to the environments and cultural conventions that have traditionally supported it By narrating both its dismantling and its incapacitation in this way it records its undoing Like *The Invention of the Self Personal Identity in the Age of Art* to which it forms a companion volume *Simulated Selves* straddles cultural history and philosophy Firstly it identifies hitherto neglected forces that inform the course of cultural history Secondly it highlights how the self is not the self authenticating abstraction only accessible to introspection that it seems to be it is also a cultural and historical phenomenon Arguing that it is by engaging in cultural conventions that we subscribe to the process of identity formation the book also suggests that it is in these conventions that we see our self sense and its transience best reflected By examining the traces that the trajectory of the self sense has left in its environment *Simulated Selves* offers a radically new approach to the question of personal identity asking not only how and why is it under threat but also given that we understand the self sense to be a constructed phenomenon why do we cling to it
