Palaeoecology of Quaternary Drylands Werner Smykatz-Kloss, 2004-02-20 The twelve contributions in this volume represent the results of a ten year interdisciplinary workshop on desert margins concerned with the geomorphological geochemical mineralogical sedimentological soil scientific characterisation of semi deserts in Spain Africa Arabia and China Desert sediments and soils as well as processes and characteristics of their formation are regarded from different geoscientific perspectives The subjects of research include the development of desert soils and landscapes the formation of alluvial loess swamp ores fulgurites and floodout sediments and focus on the reconstruction of palaeoecological events and changes A critical study of dating methods rounds off the book

Aeolian Sand and Sand Dunes , 2008-11-14 It is more than half a century since the publication of R A Bagnold s classic book The physics of blown sand and desert dunes and it is a tribute to the quality of Bagnold s work that many of the fundamental principles which he developed remain valid today His book continues to be essential reading for any serious student of aeolian processes However the past two decades have seen an explosion in the scale of research dealing with aeolian transport processes sediments and landforms Some of this work has been summarized in review papers and edited conference proceedings but this book provides the first attempt to review the whole field of aeolian sand research Inevitably it has not been possible to cover all aspects in equal depth and the balance of included material naturally reflects the authors own interests to a significant degree However our aim has been to provide as broad a perspective as possible and to provide an entry point to an extensive multidisciplinary scientific literature some of which has not been given the attention it deserves in earlier textbooks and review papers Many examples are drawn from existing published work but the book also makes extensive use of our own research in the Middle East Australia Europe and North America The book has been written principally for use by advanced undergraduates postgraduates and more senior research workers in geomorphology and sedimentology

Holocene Settlement in Northern Namibia* Ralf Vogelsang, Barbara Eichhorn, 2011-06-20 The main research focus of the Collaborative Research Centre SFB 389 ACACIA Arid Climate Adaptation and Cultural Innovation in Africa established at the University of Cologne in 1995 was the interaction between man and arid environments in Africa KUPER et al 2007 An important part was played by the diachronic examination of these processes and their development during the Holocene period in Northeast and Southwest Africa A longterm aim of the interdisciplinary research projects was the comparison of the Holocene settlement history and palaeoecology and the identification of common and divergent developments in both hemispheres The volume at hand describes some results of the project B4 Palaeoecology and the Late Holocene Occupation of Northern Namibia Regional focus is the northern part of the Kunene Region the Opuwo District former Kaokoland a region in the arid limits between the Namib Desert and the savanna of the interior highlands Three different scientific fields namely prehistoric archaeology archaeobotany and archaeozoology cooperated in the fieldwork and analysis to reconstruct the prehistoric cultures and environment in the research area during the Holocene time period Unfortunately the archaeozoological results are still missing and not included in this book
