Quaestiones Super Librum Posteriorum:

Radulphus Brito. Quaestiones super Priora Analytica Aristotelis Gordon A. Wilson, 2016-12-16 The history of logic and its development during the medieval period Radulphus Brito's Quaestiones super Priora Analytica Aristotelis is a major work written in the early 1300s which treated Aristotle's text devoted to the theory of the syllogism Brito perhaps one of the most influential medieval thinkers known as the Modistae examines both categorical and hypothetical syllogisms In his text based on six known manuscripts which are complete or nearly complete Brito was critical of many of the theories of his contemporary Simon of Faversham It should also be mentioned that Brito edited his work several times There are at least two versions which indicate Brito returned to this material during his long career at the university in Paris This volume is the first critical text edition of Brito's Quaestiones super Priora Analytica Aristotelis and will therefore be of great interest to those studying the history of logic and its development during the medieval period

Questions on the Posterior

Analytics (Second Redaction) Simon of Faversham, 2025-09-18 Simon of Faversham was an English scholar affiliated with the University of Paris during the 1280s where he most likely wrote his commentaries on Aristotle's philosophical works The Posterior Analytics one of Aristotle's most important treatises addresses the nature of scientific demonstration Faversham's two extant commentaries on The Posterior Analytics are invaluable witnesses to key elements of late medieval accounts of scientific demonstration including views on the extent and limits of demonstration its metaphysical underpinnings and its epistemic power The commentary edited here together with the accompanying translation offers new insight into Simon of Faversham's philosophy a fascinating chapter in the history of late medieval thought It also deepens our understanding of the philosophical discussions on demonstration and related topics that took place during the early period of Europe's university history and of the ways in which these discussions drew on earlier philosophical developments in non-European traditions notably the Islamic philosophical tradition

It Could Have Been Otherwise Hester Goodenough Gelber, 2004-01-01 This description of Dominicans at Oxford from 1300-1350 and the theology of Hugh of Lawton Arnold of Strelley William Crathorn and Robert Holcot reclaims the Dominicans as highly original contributors to theology and philosophy at a time of great innovation

Marsilius of Inghen: Divine Knowledge in Late Medieval Thought Maarten Hoenen, 2021-11-22 The problem of divine knowledge focusing on questions of freedom and necessity finds itself at the intersection of age-old discussions of logic metaphysics and ethics The subject was discussed with particular clarity in the period 1250-1400 Many different solutions were put forward and criticized with an acuity and depth that was never reached again One contributor to the discussion Marsilius of Inghen d. 1396 is of special importance He assimilated not only the nominalism and theological developments of the 14th century but also the ideas of Thomas Aquinas and Bonaventure resulting in the so-called via marsiliana This study determines with great precision Marsilius's position in the debates in the period 1250-1400 often throwing new light on aspects of his philosophy and theology The wide scope of his work makes it suitable as a general

introduction to medieval thought Specialists will find it useful for its detailed and in depth analysis of both maiores and minores By its clear style and structure this study will prove useful in contemporary systematic discussions of the subject as well

Knowledge in Medieval Philosophy Henrik Lagerlund, 2021-09-20 To know epistemology s history is to know better what contemporary epistemology could be and perhaps should be and what it need not be and perhaps ought not to be Knowledge in Medieval Philosophy covers the influence of Aristotle and Augustine during the Middle Ages Epistemology and scepticism is part of philosophy from the late thirteenth century onwards and knowledge was of great philosophical concern throughout the Middle Ages By putting the medieval discussion in context it contributes to shedding light on the era and its thinkers as well as to making it relevant for contemporary epistemologists

Demonstrating important aspects of epistemology ones that has huge importance for our everyday life chapters cover the notion of testimony and thinkers such as Avicenna Scotus and the definition of knowledge found in Ockham

Sceptical Paths Giuseppe Veltri, Rachel Haliva, Stephan Schmid, Emidio Spinelli, 2019-09-02 Sceptical Paths offers a fresh look at key junctions in the history of scepticism Throughout this collection key figures are reinterpreted key arguments are reassessed lesser known figures are reintroduced accepted distinctions are challenged and new ideas are explored The historiography of scepticism is usually based on a distinction between ancient and modern The former is understood as a way of life which focuses on enquiry whereas the latter is taken to be an epistemological approach which focuses on doubt The studies in Sceptical Paths not only deepen the understanding of these approaches but also show how ancient sceptical ideas find their way into modern thought and modern sceptical ideas are anticipated in ancient thought Within this state of affairs the presence of sceptical arguments within Medieval philosophy is reflected in full force not only enriching the historical narrative but also introducing another layer to the sceptical discourse namely its employment within theological settings The various studies in this book exhibit the rich variety of expression in which scepticism manifests itself within various context and set against various philosophical and religious doctrines schools and approaches

A Companion to the Philosophy of Robert Kilwardby Henrik Lagerlund, Paul Thom, 2012-11-05 Cardinal and Archbishop of Canterbury Robert Kilwardby OP c 1215 1279 was a very important and influential thinker in his time but he has not received the scholarly attention that he deserves In this book we present the first study of all of his philosophical thinking from logic and grammar to metaphysics and ethics

A Companion to Walter Burley Alessandro Conti, 2013-04-15 Until some thirty years ago medieval scholars and historians of philosophy have not generally done justice to Walter Burley ca 1275 after 1344 On the one hand he was been misconstrued as holding a mere variation of more moderate realist positions something that is true only for the first part of his career before 1324 On the other hand very often his ideas were studied simply as a means to a better understanding Ockham's theories so dwarfing the worth and interest of Burley's doctrines On the contrary in terms of rigour originality and influence Burley was one of the most prominent logicians and metaphysicians of the Middle Ages This volume which contains thirteen substantial essays on Burley's philosophy tries to rectify that situation It aims to reconstruct Burley's thought and the role it played in the development of late medieval philosophy to situate it definitely within its historical and intellectual context and to clarify its internal evolution Contributors include Fabrizio Amerini E Jennifer Ashworth Laurent Cesalli Alessandro D Conti Iacopo Costa Catarina Dutilh Novaes Marek Gensler El bieta Jung Roberto Lambertini Cecilia Trifogli Marta Vittorini and Hans Ulrich W hler

Rethinking the History of Skepticism Henrik Lagerlund, 2010 This book aims at beginning the rewriting of the history of skepticism by highlighting the medieval sources of the modern skeptical discussions It shows through seven newly written essays how epistemological and external world skepticism was developed and discussed particularly in the fourteenth century up to sixteenth century Paris

Philosophical Debates at Paris in

the Early Fourteenth Century Stephen F. Brown, Thomas Dewender, Theo Kobusch, 2009-05-20 This collection of essays papers originally delivered at conferences in Bonn and Boston show in a detailed way the tone and nature of philosophical and theological issues and arguments at the University of Paris in the early fourteenth century They touch on a large number of authors and a broad spectrum of subjects and present these discussions with regard to the intellectual framework set by the earlier Parisian generation of Thomas Aquinas Henry of Ghent and Godfrey of Fontaine It becomes evident that the principal contributors to the new intellectual energy in early fourteenth century discussions at Paris are Meister Eckhart John Duns Scotus Hervaeus Natalis Durandus of St Pour ain Walter Burley and Petrus Aureoli La tradition medievale des categories, XIIe-XVe siecles Joël Biard, Irène Rosier-Catach, 2003 Evoquees par Augustin les Categories d Aristote accompagnees de l introduction de Porphyre sont traduites et commentees par Boece Deja exposee dans le monde arabo musulman cette oeuvre devait faire l objet de nombreux commentaires dans le monde latin sans interruption du temps d Abelard jusqu a la fin du Moyen Age De l etude du langage a la theorie de l etre ouvrant sur la philosophie naturelle et la theologie les interrogations que suscitent les Categories sont multiformes Elles concernent le statut des categories leur nombre les differents types de predication ou la nature particuliere de certaines categories comme la relation ou la quantite Le premier chapitre du traite avec sa distinction entre equivoques univoques et paronymes suscite des reflexions sur les variations semantiques les transferts de sens et donne en meme temps naissance a la theorie de l analogie de l etant aux implications metaphysiques et theologiques majeures Les vingt deux essais de ce recueil explorent a travers l etude d auteurs connus ou moins connus les multiples facettes de cette riche tradition medievale de commentaires sur les Categories d Aristote **Questions on Aristotle's Categories** John Duns Scotus, 2014 This work is the first English translation of Scotus s commentary on Aristotle s Quaestiones super Praedicamenta Although there are numerous Latin commentaries on Aristotle s Categories Scotus s Questions is one of the few commentaries on the Categories written in the thirteenth century covering all of Aristotle s text including the often neglected post praedicamenta and the only complete Latin commentary available in English Moreover unlike many of the commentaries Scotus s text is one of the last commentaries to be written before the nominalist reduction of the categories to substance and quality The question format allows Scotus a great deal of liberty to discuss the categories in detail as well as matters that are only remotely raised by the text Altogether the forty four questions cover the following subjects questions 1 4 are prolegomena to the work itself and raise the question of its subject matter as well as whether there can be a science of the categories questions 5 8 deal with equivocals univocals and denominatives questions 9 11 discuss Aristotle s two rules regarding predication and the sufficiency of the categories questions 12 36 discuss the four main categories treated by Aristotle namely substance quantity relation and quality and the remaining eight questions discuss the post praedicamenta **Traditio** Johannes Quasten, Stephan Kuttner, 1974 Catalogue of offprints from vols 1 20 in v 20 p 527 541 *Mind and Obligation in the Long Middle Ages*, 2024-12-31 Do you have to learn a language to

Medieval Commentaries on Aristotle's Categories Lloyd Newton, 2008-08-31 Medieval commentary writing has often been described as a way of doing philosophy and not without reason The various commentaries on Aristotle's Categories we have from this period did not simply elaborate a dialectical exercise for training students rather they provided their authors with an unparalleled opportunity to work through crucial philosophical problems many of which remain with us today As such this unique commentary tradition is important not only in its own right but also to the history and development of philosophy as a whole The contributors to this volume take a fresh look at it examining a wide range of medieval commentators from Simplicius to John Wyclif and discussing such issues as the compatibility of Platonism with Aristotelianism the influence of Avicenna the relationship between grammar logic and metaphysics the number of the categories the status of the categories as a science realism vs nominalism and the relationship between categories
