Fieldwork in Transforming Societies E. Clark, S. Michailova, 2004-05-31 This book discusses the personal and professional challenges of conducting fieldwork in the difficult sometimes threatening contexts of the transforming societies of post socialist Europe and China Field research is a distinctly human effort and the social relationships between researchers third parties and respondents directly affect the quality of research findings With unusual frankness the authors share their personal field experiences and discuss both the imaginative strategies they have devised to cope with problems and the methodological lessons they have learned

Behind the Screens Jocalyn Lawler, 2006 Behind the Screens sheds light on the fundamental aspects of basic nursing that have previously been hidden or taken for granted The essence of these practices has not been regarded as formal knowledge partly because there has been no formal language to describe them Experienced and beginning practitioners will identify with many aspects of this discussion Professor Jocalyn Lawler argues that the body is a problem in our society and she examines the intellectual background to the problem She describes the pattern of relationships between the theoretical concepts of the body body care privacy dirty work women s work and sexuality The invisibility of nursing is linked with these concepts and with the lack of an academic discourse on the body as a whole Drawing on the words of nurses themselves Lawler describes how they deal with the problem of the body From the interviews she articulates the complexity and sophistication at the heart of the way nurses manage the bodies of others And she coins a term somology that provides nursing with a language to describe the crucial social components of skilled nursing care Readable and important Behind the Screens adds to knowledge about knowledge and to knowledge about nursing The work was first published in 1991 It has since been translated into Norwegian as Bak skjerm Brettene sykepleie og kroppslige problemer and French as La Face Cachée des Soins Soins au corps intimité et pratique

The Ethics of Social Research Joan E. Sieber, 2012-12-06 Social scientists are unprepared for many of the ethical problems that arise in their research and for criticisms of their ethics that seem to ignore such cherished scientific values as objectivity and freedom of inquiry Yet they possess methodological talent and insight into human nature that can be used to understand and resolve these problems The contributors to this book demonstrate that criticism of the ethics of social research can stimulate constructive development of methodology Both volumes of *The Ethics of Social Research* were written for and by social scientists to show how ethical dilemmas arise in the day to day conduct of social research and how they can be resolved The topics discussed in the companion volume include ethical problems that arise in experiments and sample surveys this book deals with the ethical issues involved in fieldwork and in the regulation and publication of research With candor and humor many of the contributors describe lessons they have learned about themselves their methods and their research participants Collectively they illustrate that both humanists and determinists are likely to encounter ethical dilemmas in their research albeit different ones and that a blending of deterministic and humanistic approaches may be needed to solve these dilemmas

The aim of this book is to assist investigators in preparing to meet some of the ethical problems that await the unwary. It offers perspectives, values and guidelines for anticipating problems and devising solutions. *Black Reflective Sociology* John H. Stanfield II, 2016-06-03. John H. Stanfield II, the leading contemporary Black sociologist, distills decades of his research and thinking in a set of articles, some original to the volume, others from fugitive sources that address race in the formation of epistemologies, theories and methodologies in social science. Stanfield's contributions to the discipline, such as the adoption of restorative justice as an anti-racism solution in multiracial societies and the development of African diasporic sociological reasoning, are highlighted here. Ranging widely across theoretical, methodological and substantive topics, Stanfield creates a reflective sociology viewed through an African diasporic lens that enriches the thinking and practice of social science.

Nuclear Proliferation in South Africa Lucky E. Asuelime, Raquel A. Adekoye, 2016-06-06. This book investigates drivers and trends in nuclear proliferation in the Global South. Based on an in-depth analysis of South Africa's nuclear history, it examines general causes of proliferation, such as technical capabilities and constraints, a country's motivation to build a nuclear bomb, and particular domestic and international situations. It also highlights Britain's role in the development of technological capability in South Africa and explains how nuclear weapons influence international relations. Finally, the study offers effective solutions to the problem of nuclear proliferation in developing countries.

Social Work: The Social Organisation of an Invisible Trade Andrew Pithouse, 2019-05-23. First published in 1998, this book sets out to shed sociological light upon the much under-researched realm of day-to-day child care practice. The text broke new ground when first published in 1987, and there have been few, if any, similar books that adopt an ethnographic approach to statutory child care practice. A second edition would still speak to this rarely analysed occupational world. However, it would enjoy greater resonance when updated with practitioner viewpoints on the extent to which the findings remain pertinent today, which is likely to be the case. The book offers no conclusions other than it demonstrates that the invisible world of practice cannot be readily understood or changed unless grasped through an interactionist sociology. The book is aimed at a social work, social welfare, market, as well as a sociology of profession, organization readership.

[Rapt in the Name](#) Ramdas Lamb, 2012-02-01. In *Rapt in the Name*, Ramdas Lamb provides an intriguing account of the Ram bhakti tradition in India. Less well known in the West than the tradition of devotion to Krishna, the Ram tradition is an important component of Hinduism. Ram is the most worshipped form of the divine in North India today and has long been particularly important to those of the lower castes throughout India. Lamb explores both the evolution of the tradition and the rise of lower caste religious movements devoted to Ram, specifically the Ramnami Samaj, an Untouchable religious movement in Central India. Lamb's study of the Ramnamis has spanned nearly three decades, first on a personal level as a Hindu monk and later as both a friend and a researcher. He discusses the historical origins as well as present-day forms and structure of the Samaj, including a description of its distinctive ritual dress and practices. Among the more innovative aspects of the sect is its adaptation of the

story of Lord Ram that is uniquely woven into its devotional repetition of his name Ramnam In addition Lamb shares biographical sketches of six Ramnamis each of which reveals the freedom of individual exploration and expression that is integral to the sect This is a fascinating account of religious life and adaptation on the periphery of society In the Field Robert G. Burgess, An authoritative guide to the problems and procedures associated with data collection and analysis in field research *The World's Future Crisis: Extractive Resources Depletion* Shahla Seifi, 2021-10-01 This book focuses mainly on strategic decision making at a global level which is rarely considered in approaches to sustainability This book makes a unique contribution as the work looks at global consequences of mineral exhaustion and steps that can be taken to alleviate the impending problems This book highlights how sustainability has become one of the most important issues for businesses governments and society at large This book explores the topic of sustainability as one that is under much debate as to what it actually is and how it can be achieved but it is completely evident that the resources of the planet are fixed in quantity and once used cannot be reused except through being reused in one form or another This is particularly true of the mineral resources of the planet These are finite in quantity and once fully extracted extra quantities are no longer available for future use This book argues and presents evidence that the remaining mineral resources are diminishing significantly and heading towards exhaustion Once mined and consumed they are no longer available for future use other than what can be recycled and reused This book demonstrates that future scarcity means that best use must be made of what exists as sustainability depends upon this and best use is defined as utility rather than economic value which must be considered at a global level rather than a national level Moreover sustainability depends upon both availability in the present and in the future so the use of resources requires attention to the future as well as to the present This book investigates the alternative methods of achieving the global distribution of these mineral resources and proposes an optimum solution This book adds to the discourse through the understanding of the importance of the depletion and finiteness of raw materials and their use for the present and the future in order to achieve and maintain sustainability Routledge Handbook of Socio-Legal Theory and Methods Naomi Creutzfeldt, Marc Mason, Kirsten McConnachie, 2019-08-13 Drawing on a range of approaches from the social sciences and humanities this handbook explores theoretical and empirical perspectives that address the articulation of law in society and the social character of the rule of law The vast field of socio legal studies provides multiple lenses through which law can be considered Rather than seeking to define the field of socio legal studies this book takes up the experiences of researchers within the field First hand accounts of socio legal research projects allow the reader to engage with diverse theoretical and methodological approaches within this fluid interdisciplinary area The book provides a rich resource for those interested in deepening their understanding of the variety of theories and methods available when law is studied in its broadest social context as well as setting those within the history of the socio legal movement The chapters consider multiple disciplinary lenses including feminism anthropology and sociology as well as a variety of methodologies including narrative

visual and spatial psychological economic and epidemiological approaches Moreover these are applied in a range of substantive contexts such as online hate speech environmental law biotechnology research in post conflict situations race and LGBT lawyers The handbook brings together younger contributors and some of the best known names in the socio legal field It offers a fresh perspective on the past present and future of sociolegal studies that will appeal to students and scholars with relevant interests in a range of subjects including law sociology and politics Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
