## **Qualitative Methodologies For Geographers Issues And Debates:**

**Milhaud** Daniel Milhaud,1983      Practising Human Geography Paul Cloke,2004-05-25 Practising Human Geography is critical introduction to disciplinary debates about the practice of human geography that is informed by an inquiry into how geographers actually do research In examining those methods and practices that are integral to doing geography the text presents a theoretically informed reflection on the construction and interpretation of geographical data including factual and fictional sources the use of core research methodologies and the interpretative role of the researcher Framed by an historical overview how ideas of practising human geography have changed the following three sections offer an comprehensive and integrated overview of research methodologies Illustrated throughout the te      **Doing Ethnographies** Mike Crang,Ian Cook,2007-04-06 Doing Ethnographies is an introductory and applied guide to ethnographic methods It focuses on those methods participant observation interviewing focus groups and video photographic work that allow us to understand the lived everyday world Informed by the authors fieldwork experience the book covers the relation between theory practice and writing and demonstrates how methods work in the field so preparing the first time ethnographer for the loss of control and direction often experienced      Qualitative Methodologies for Geographers Daniel Milhaud,2001      **Handbook of Research Methods in Migration** Carlos Vargas-Silva,2012-01-01 Covering both qualitative and quantitative topics the expert contributors in this Handbook explore fundamental issues of scientific logic methodology and methods through to practical applications of different techniques and approaches in migration research The chapters of this interdisciplinary Handbook maintain an introductory level of discussion on migration research methods while providing readers with references necessary for those wishing to go deeper into the topic Using a combination of concepts and techniques with research experiences from the field this Handbook will prove to be an invaluable guide Master level students and academics in migration related programs will find this compendium a useful and stimulating resource It also discusses issues relating to the collection of data on migrants including topics such as survey designs interviewing techniques and ethical issues that policymakers and government employees will find informative Advisory Board Professor Stephen Castles Professor Robin Cohen Professor Josh DeWind Professor Rael Delgado Wise      **Navigating the Field** Mildred Oiza Ajebon,Yim Ming Connie Kwong,Diego Astorga de Ita,2021-05-31 This volume is a collation of postgraduate fieldwork experiences in social research that provides a platform for early career researchers ECRs to be open about the hidden labour of doing postgraduate fieldwork This book documents diverse fieldwork experiences gathering critical reflections on the field from a wide range of ECRs The issues presented here go from the process of identifying the field to navigating life in and after it including things that happen in between This text shows a different set of methodological considerations in relation to access ethics identity positionality power and practices highlighting how ECRs fieldwork experiences may help broaden traditional frameworks of research Exploring how postgraduate researchers make sense of these issues and what kind of decisions they

make in specific circumstances helps to reveal broader concerns institutional practices and constraints Through these reflections this book makes an important point that there is a need for researchers to document the real story behind fieldwork The honesty and openness of contributors in this volume are positive steps towards fostering a research culture where reflections upon weaknesses and failures are as welcome as presentations of successful fieldwork techniques and methods The fact that this book is written and edited by ECRs the topics it presents both emerging and long debated but still relevant and the broad range of approaches make this text unique We hope these points will make this work useful for researchers of all levels and across disciplines and that this text will allow the reader to rethink some essential aspects of social research that are often taken for granted We expect the diverse reflections offered in this book to appeal to researchers across disciplines at different stages of their career and that this will be a useful resource for researchers to map and navigate their own research pathways

Social Spatialization in a Turkish Squatter Settlement Neslihan Demirtaş,2009 This book aims to expose an alternative local historical reading of the formation of a gecekondu space a settlement of irregularly self constructed habitats built by former peasants randomly over night The social construction of the neighborhood space is narrated by means of insider perspectives and using qualitative techniques In this reading it will be made explicit that the dynamics of strategic interventions in local space and tactical acts of the migrants in producing their locality are intertwined processes The ethnic identities through sectarian and hometown affiliations have constituted the main means by which the migrants have developed certain tactics in dealing with the strategical acts on the vertical level relations with the actors of urban planning and local politics and other tactical acts on the horizontal level relations with other sectarian and hometown groups in the locality

**Development Fieldwork** Regina Scheyvens,Donovan Storey,2003-08-06 Every now and then one stumbles across a breath of fresh air and this practical research guide is certainly one of them It will be no doubt refreshing for those of us who keep going to the field and who perhaps have forgotten the human dimension of research For those who supervise students the book will be a useful source of inspiration I shall certainly recommend the book to any of my students Development and Change Development Fieldwork is an excellent examination of and preparation for development research and will be an invaluable guide to all those entering or considering fieldwork wherever that may be Progress in Development Studies I would strongly recommend it as a field textbook across a range of disciplines and topics The tone is thoughtful engaging and pragmatic with all of the chapters contributing equally to a very high quality publication It is the best book I have read on fieldwork for a while It is essential for anyone contemplating development based study but it also contains a great deal of value and interest to geographers sociologists and other students working in and on the West Singapore Journal of Tropical Geography This is an outstanding book and one that all of us engaged in fieldwork in developing countries will want to read and doubtless re read Thoughtful relevant and consistently well written Professor Stuart Corbridge London School of Economics and University of Miami An excellent overview of the

pitfalls and problems of fieldwork in remote places elegant and enjoyable incisive and elegant good humoured and eminently practical the Lonely Planet guide to the field Professor John Connell Sydney University A very welcome and richly inviting review of the politics ethics and practicalities of fieldwork Development Fieldwork deserves reading in many fields This will surely travel far James D Sidaway National University of Singapore I warmly commend this guide to anyone planning or even thinking about fieldwork in the Third World Postgraduates and academics will find it particularly good as it not only raises an abundance of practical and logistical points but explores fundamental ethical and epistemological concerns to an unusual degree including issues not addressed elsewhere The clarity and attention to detail are also very welcome as is the ease with which the book can be navigated Janet Townsend University of Durham Developmental Fieldwork provides a useful guide packed with information on practical and personal and sometimes political matters As with all good rough guides rather than fixing options and closing issues the authors make it a point to suggest flexible itineraries across the terrain of the field The book should in time become a well thumbed dog eared volume thrown into the haversack along with the notebook both sorts tape recorder mosquito repellent sunglasses and sturdy shoes Brenda S A Yeoh National University of Singapore A good introductory text that will assist the novice development researcher to prepare for a new experience and will also provide a timely reminder for more experienced researchers Evaluation Journal of Australasia Development Fieldwork provides an indispensable new resource and guide for all students undertaking development fieldwork in the Third World Accessible and lively the text introduces the basics of research design and methodology together with guidance on choosing the best research methods provides hands on advice practical personal and ethical to those preparing to enter the field covers the initial planning and preparation stages to end writing up and tips for the successful resumption of life back home The authors draw upon a rich and diverse set of fieldwork experiences across the developing world rural and urban and utilize case studies to illustrate the many common issues and challenges that will face both new and experienced fieldwork researchers It will be an essential text and companion to all postgraduate and research students across the social sciences *The Politics of Conducting Research in Africa* Lyn Johnstone, 2018-08-29 This edited volume investigates the ethical and emotional challenges of conducting fieldwork in Africa It reflects on difficulties researchers face such as objectivity access gender issues and information risks Focusing across a wide range of states and themes the project makes an original contribution and builds upon existing strengths and insights in various disciplines by presenting research practical insights from contemporary cases of fieldwork As such the book is an accessible and useful guide for students and scholars alike

**Encyclopedia of Human Geography** Barney Warf, 2006-05-16 Publisher description [Fieldwork in the Global South](#) Jenny Lunn, 2014-03-26 Choosing to do fieldwork overseas particularly in the Global South is a challenge in itself The researcher faces logistical complications health and safety issues cultural differences language barriers and much more But permeating the entire fieldwork experience are a range of intermediating ethical issues While many researchers seek to

follow institutional and disciplinary guidelines on ethical research practice the reality is that each situation is unique and the individual researcher must negotiate their own path through a variety of ethical challenges and dilemmas This book was created to share such experiences to serve not as a manual for ethical practice but rather as a place for reflection and mutual learning Since ethical issues face the researcher at every turn and cannot be compartmentalized into one part of the research process this book puts them at the very center of the discussion and uses them as the lens with which to view different stages of fieldwork The book covers four thematic areas ethical challenges in the field ethical dimensions of researcher identity ethical issues relating to research methods and ethical dilemmas of engagement with a variety of actors This volume also provides fresh insights by drawing on the experiences of research students rather than those of established academics The contributors describe research conducted for their master s degrees and doctorates offering honest and self critical reflections on how they negotiated ethical challenges and dilemmas The chapters cover fieldwork carried out in countries across Africa Asia and Latin America on a broad sweep of development related topics This book should have wide appeal to undergraduates postgraduates and early career researchers working under the broad umbrella of development studies Although focused on fieldwork in the Global South the discussions and reflections are relevant to field research in many other countries and contexts
