Quality And Quantity The Quest For Biological Regeneration In Twentieth Century France:

Quality and Quantity William H. Schneider, 2002-08-08 This book first published in 2001 is an account of eugenicists efforts to improve the inherited biological quality of the French population *Eugenics and Nation in Early 20th Century Hungary* M. Turda, 2014-03-25 In 1900 Hungary was a regional power in Europe with imperial pretensions by 1919 it was crippled by profound territorial social and national transformations This book chronicles the development of eugenic thinking in early twentieth century Hungary examining how eugenics was an integral part of this dynamic historical transformation

Psychoanalysis and the family in twentieth-century France Richard Bates, 2022-02-08 In the last quarter of the twentieth century if French people had a parenting problem or dilemma there was one person they consulted above all Fran oise Dolto 1908 88 But who was Dolto How did she achieve a position of such influence What ideas did she communicate to the French public This book connects the story of Dolto s rise to two broader histories the dramatic growth of psychoanalysis in postwar France and the long running debate over the family and the proper role of women in society It shows that Dolto s continued reputation in France as a liberal and enlightened educational thinker is at best only partially deserved and that conservative and anti feminist ideas often underpinned her prominent public interventions While Dolto retains the status of a national treasure her career has had far reaching and sometimes harmful repercussions for French society particularly in the treatment of autism [The Oxford Handbook of the History of Eugenics](#) Alison Bashford, Philippa Levine, 2010-09-24

Eugenic thought and practice swept the world from the late nineteenth to the mid twentieth century in a remarkable transnational phenomenon that informed social and scientific policy across the political spectrum from liberal welfare measures in emerging social democratic states to feminist ambitions for birth control to public health campaigns to totalitarian dreams of the perfectibility of man This book dispels for uninitiated readers the automatic and apparently exclusive link between eugenics and the Holocaust the popularity of eugenics in Japan for example comes as a surprise It is the first world history of eugenics and an indispensable core text for both teaching and research in what has become a sprawling but ever more important field [In the Museum of Man](#) Alice L. Conklin, 2013-10-04 In the Museum of Man offers new insight into the thorny relationship between science society and empire at the high water mark of French imperialism and European racism Alice L Conklin takes us into the formative years of French anthropology and social theory between 1850 and 1900 then deep into the practice of anthropology under the name of ethnology both in Paris and in the empire before and especially after World War I and finally into the fate of the discipline and its practitioners under the German Occupation and its immediate aftermath Conklin addresses the influence exerted by academic networks museum collections and imperial connections in defining human diversity socioculturally rather than biologically especially in the wake of resurgent anti Semitism at the time of the Dreyfus Affair and in the 1930s and 1940s Students of the progressive social scientist Marcel Mauss were exposed to the ravages of imperialism in the French colonies where they did fieldwork as a

result they began to challenge both colonialism and the scientific racism that provided its intellectual justification. Indeed a number of them were killed in the Resistance fighting for the humanist values they had learned from their teachers and in the field. A riveting story of a close knit community of scholars who came to see all societies as equally complex. In the Museum of Man serves as a reminder that if scientific expertise once authorized racism anthropologists also learned to rethink their paradigms and mobilize against racial prejudice a lesson well worth remembering today. Race and Nation in Modern Latin America Nancy P. Appelbaum, Anne S. Macpherson, Karin Alejandra Rosemblatt, 2003-11-20. This collection brings together innovative historical work on race and national identity in Latin America and the Caribbean and places this scholarship in the context of interdisciplinary and transnational discussions regarding race and nation in the Americas. Moving beyond debates about whether ideologies of racial democracy have actually served to obscure discrimination the book shows how notions of race and nationhood have varied over time across Latin America's political landscapes. Framing the themes and questions explored in the volume the editors' introduction also provides an overview of the current state of the interdisciplinary literature on race and nation state formation. Essays on the postindependence period in Belize, Brazil, Colombia, Cuba, Mexico, Panama, and Peru consider how popular and elite racial constructs have developed in relation to one another and to processes of nation building. Contributors also examine how ideas regarding racial and national identities have been gendered and ask how racialized constructions of nationhood have shaped and limited the citizenship rights of subordinated groups. The contributors are Sueann Caulfield, Sarah C. Chambers, Lillian Guerra, Anne S. Macpherson, Aims McGuinness, Gerardo Renique, James Sanders, Alexandra Minna Stern, and Barbara Weinstein. From Vichy to the Sexual Revolution Sarah Fishman, 2017. In the decades after World War II French ideas about gender and family life underwent dramatic changes laying the groundwork for the sexual revolution of the 1960s. This book offers a broad view of changing lives and ideas about love, courtship, marriage, giving birth, parenting, childhood, and adolescence in France from the Vichy regime to the sexual revolution of the 1960s. **The Measure of Merit** John Carson, 2025-10-28. A wide ranging account of American and French understandings of merit, talent, and intelligence over the past two centuries. How have modern democracies squared their commitment to equality with their fear that disparities in talent and intelligence might be natural, persistent, and consequential? John Carson tells the fascinating story of how two nations wrestled scientifically with human inequalities and their social and political implications. Surveying a broad array of political tracts, philosophical treatises, scientific works, and journalistic writings Carson chronicles the gradual embrace of the IQ version of intelligence in the United States while in France the birthplace of the modern intelligence test expert judgment was consistently prized above such quantitative measures. He also reveals the crucial role that determinations of and contests over merit have played in both societies; they have helped to organize educational systems, justify racial hierarchies, classify army recruits, and direct individuals onto particular educational and career paths. A contribution to both the history of science and intellectual history.

The Measure of Merit illuminates the shadow languages of inequality that have haunted the American and French republics since their inception

Enlightenment Biopolitics William Max Nelson, 2024-05-06 A wide ranging history tracing the birth of biopolitics in Enlightenment thought and its aftermath In Enlightenment Biopolitics historian William Max Nelson pursues the ambitious task of tracing the context in which biopolitical thought emerged and circulated He locates that context in the Enlightenment when emancipatory ideals sat alongside the horrors of colonialism slavery and race based discrimination In fact these did not just coexist Nelson argues they were actually mutually constitutive of Enlightenment ideals In this book Nelson focuses on Enlightenment era visions of eugenics including proposals to establish programs of selective breeding forms of penal slavery and spurious biological arguments about the supposed inferiority of particular groups The Enlightenment he shows was rife with efforts to shape harness and organize the minds and especially the bodies of subjects and citizens In his reading of the birth of biopolitics and its transformations Nelson examines the shocking conceptual and practical connections between inclusion and exclusion equality and inequality rights and race and the supposed improvement of the human species and practices of dehumanization

Women's medicine Caroline Rusterholz, 2020-12-01 This electronic version has been made available under a Creative Commons BY NC ND open access license Women s medicine highlights British female doctors key contribution to the production and circulation of scientific knowledge around contraception family planning and sexual disorders between 1920 70 It argues that women doctors were pivotal in developing a holistic approach to family planning and transmitting it across borders playing a more prominent role in shaping scientific and medical knowledge than previously acknowledged Illuminating women doctors agency in the male dominated field of medicine this book reveals their practical engagement with birth control and later family planning clinics in Britain their participation in the development of the international movement and their influence on French doctors Drawing on a wide range of archived and published medical materials Rusterholz sheds light on the strategies British female doctors used and the alliances they made to put forward their medical agenda and position themselves as experts and leaders

The Cult of Youth James F. Stark, 2020-03-19 The first account of anti ageing and rejuvenation in

modern Britain exploring hormones diet electrotherapy exercise and skin care **The Changing Image of the Sciences** Ida H. Stamhuis, Teun Koetsier, Cornelis De Pater, Albert Van Helden, 2012-12-06 The title of our book would lead the reader to believe that in speaking of the changing image of the sciences we are taking for granted the multiplicity of sciences as these are practiced for instance in modern universities That was of course not always the case Although we can point to some subjects for instance mathematical astronomy as being demarcated to some extent from other subjects as far back as Antiquity the current division into individual sciences can hardly be traced back further than the nineteenth century Moreover the further we go back in history the more we must subsume science under general knowledge or scholarship scientia Some of the earliest images of episteme or scientia are those of forbidden knowledge often related to technology on the one hand and the absent minded scholar on the other These are powerful metaphors in word as well as image that have been appropriated in various ages for different purposes The Greeks gave Western society its first images of the power of knowledge and those who produced it Prometheus ridiculed the gods stole their fire and brought it down to Earth For this Zeus had him chained to a rock on Mount Caucasus where a vulture fed on his liver during the day while it grew back at night He was finally freed by Heracles **In the Aftermath of Genocide** Maud S. Mandel, 2003-07-04 Jews and Armenians both victims of genocide and their communities in post WW2 France Who Is Knowledgeable Is Strong Cyrus Schayegh, 2009-03-31 A singular scholarly achievement and a valuable contribution to modern Iranian and Middle Eastern history Schayegh's research promises to fuel ongoing debates concerning modernity and nationalism in Iran and elsewhere Firoozeh Kashani Sabet author of *Frontier Fictions Shaping the Iranian Nation 1804-1946* The author has accomplished the most thorough work of research that I am familiar with in the field of 20th century Iranian history H E Chehabi Boston University A fascinating study of Iranian doctors and scientists and the ways they forged a distinctive route to modernity This book is rich with insights for the present Lynn Hunt University of California Los Angeles *The History of Public Health and the Modern State*, 2020-06-22 Since George Rosen's comprehensive *History of Public Health* first published in 1956 there has been no internationally comparative survey of the subject Over the past three decades or so however research in this field has expanded rapidly especially with regard to the history of disease and social order and public health politics and the state Most of these studies have been highly scholarly and specialised and often dealing with only one aspect of public health in any one national context The essays here examine the road history of public health in different national contexts in order to provide a work of comparative reference that could be used as a teaching aid The book focuses on whether the construction of a public health system is an inherent characteristic of the managerial function of modern political systems Thus each essay traces the steps leading to the growth of health government in various nations examining the specific conflicts and contradictions which each incurred As a result the volume highlights the need for further comparative analysis of public health systems as a highly fruitful topic for future study *Last Resort* Jack D. Pressman, 2002-08-08 This book first

published in 1998 revisits the period in the 1940s and 1950s when many Americans were operated on for mental illness

Civilization without Sexes Mary Louise Roberts, 2009-02-15 In the raucous decade following World War I newly blurred boundaries between male and female created fears among the French that theirs was becoming a civilization without sexes This new gender confusion became a central metaphor for the War's impact on French culture and led to a marked increase in public debate concerning female identity and woman's proper role Mary Louise Roberts examines how in these debates French society came to grips with the catastrophic horrors of the Great War In sources as diverse as parliamentary records newspaper articles novels medical texts writings on sexology and vocational literature Roberts discovers a central question how to come to terms with rapid economic social and cultural change and articulate a new order of social relationships She examines the role of French trauma concerning the War in legislative efforts to ban propaganda for abortion and contraception and explains anxieties about the decline of maternity by a crisis in gender relations that linked soldiery virility and paternity Through these debates Roberts locates the seeds of actual change She shows how the willingness to entertain or simply the need to condemn nontraditional gender roles created an indecisiveness over female identity that ultimately subverted even the most conservative efforts to return to traditional gender roles and irrevocably altered the social organization of gender in postwar France

Minor Transnationalism Françoise Lionnet, Shu-mei Shih, 2005-03-09 This collection of essays investigates the importance of minor discourses and minority cultures across national boundaries

Remaking the Male Body Joan Tumblety, 2012-10-04 The first monograph to explore the imagined link between male athletic prowess and national strength in interwar France It ultimately sheds light on the roots of Vichy's project for masculine regeneration after the military defeat of 1940
