QFINANCE Calculation Toolkit Bloomsbury Publishing, 2013-09-26 100 key calculations essential for everyday business management Essential for the monitoring of the financial health of a company Each calculation is accompanied by a worked example to illustrate uses and limits Written by professional mathematicians Making Sense of Data and Information Elearn, 2013-06-17 Managers need to be able to make sense of data and to use it selectively to answer key questions Why has quality fallen in the last week Should we subcontract or employ more people What will consumer demand be in the future They need to be able to assess the value of data and to detect what is and what isn't spin The focus is on analysing numbers On their own figures tell us very little To become meaningful they need to be processed and analysed and it is the patterns that emerge from this that provide the information that is needed for decision making The book is arranged in four themes It starts by considering the value of information in organisations and by assessing how effectively the information is used in a management role It then goes on to look at different options for presenting figures so that trends become clearer and patterns simpler to spot As well as making data easier to interpret the techniques the book presents are valuable communication tools that will help the reader use information more effectively with others The last two themes then provide a toolkit of techniques that you can use to investigate situations and help solve problems These include statistical and operational techniques as well as computer tools Like any toolkit the key to using it properly lies in knowing not only what each tool does but when to use it This book will help the reader to develop this ability by applying the methods that are described within a business context **Quantitative Techniques (New Format)** C R Kothari, The book has been known

for years for its simplicity of approach which explains the tedious concepts of quantitative techniques in a most reader friendly manner through practical examples The style is so lucid that even a reader having no formal training of mathematics and statistics will not find it difficult to understand and to apply these techniques The book is meant for MCom CA ICWA and degree diploma students of business administration The Regulation of Financial Planning in Australia Angelique Nadia Sweetman McInnes, 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee Authorised Representative AFSL AR licensing model as specified in the Commonwealth Corporations Act 2001 The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline It takes into account theories in agency legislation legitimacy and the independent individual regulatory regimes in other professions thereafter integrating this framework with the financial planning theory to examine the legitimacy or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees This book makes a very useful reference to understanding financial planning licencing model in Australia
