Interactions Jean-Louis Basdevant, Maurice Levy, 2012-12-06 The 1981 Cargèse Summer Institute on Fundamental Interactions was organized by the Université Pierre et Marie Curie Paris M LEVY and J L BASDEVANT CERN M JACOB the Université Catholique de Louvain D SPEISER and J WEYERS and the Katholieke Universiteit te Leuven R GASTMANS which like in 1975 1977 and 1979 had joined their efforts and worked in common It was the 22nd Summer Institute held at Cargèse and the 6th one organized by the two institutes of theoretical physics at Leuven and Louvain la Neuve This time while the last school was dominated by the impressive advances which were made in the field of perturbative quantum chromodynamics and its applications to high energy phenomena involving strongly interacting particles the 1981 school clearly reflected a period of transition where the new insights gained by experiment and theory are digested and put in order Place of pride among the experiments belonged this time to DESY On the theoretical side the reader will find a more thorough interpretation and understanding of the experiments as well as approaches to new theories Finally several talks were

devoted to experiments of the future We owe many thanks to all those who have made this Summer Institute possible Thanks are due to the Scientific Committee of NATO and its President for a generous grant and especially to the head of the Advanced Study Institute Program Dr R Chabbal and his collaborators for their constant help and encouragements
