In this clear and well-argued book, Reydaman-Schills (hereafter RS) studies the philosophical basis that underpins the way Roman Stoics integrated philosophy into the social practice of living: above all friendship, political community, parenting and marriage. By 'Roman Stoics', RS means only a group of thinkers (Seneca, Musonius Rufus, Epictetus, Marcus Aurelius, and to a less extent Hierocles) who have in common a methodological and, in a way, a thematic, approach. Therefore, one is entitled to study this group of thinkers as a whole, that doesn't mean one ignores their differences, only that one doesn't focus on them. According to RS, "the Roman adaptation of originally Greek Stoic doctrine shows a distinctive pattern of emphasizing social responsibility" (p. 3). This supposes that the Roman Stoics were not pale copies of their Greek predecessors and had something interesting to say on their own. On the whole, RS is, in my mind, perfectly right to think so. The post-19th-century Roman Stoics, as pictured by her study, deserves wide consideration, both for philosophical and historical reasons (it has much to say for it, and it significantly influenced the history of Western thought). Classicists, philosophers, and a wider public interested in the issues discussed here will no doubt benefit from the reading of this excellent book.

First of all, RS has to defend Roman Stoics against two criticisms, which are in fact two faces of the same coin. These objections concern the way Roman Stoics adapted, or (according to their critics) failed to accept, Early Greek Stoicism. There was in the political philosophy of Zeno and Chrysippus a utopian and radical facet absent from Roman Stoic works. One may think, therefore, that the Roman Stoics waver between evasiveness and conformism. Indeed, it seems that they lead something like a double life: they are psychologically in a kind of inner fortress, while continuing at the same time, to live outwardly like other people. Such an attitude implies coldness and detachment (a blame Stoics of all times faced).¹ Furthermore, this kind of (alleged) reciprocal insulation of philosophy and social behaviour is unsatisfying: the Roman Stoics *should* live according to their principles. Severing the connection between their philosophy and their outward and social behaviour means, in a way, giving up Stoicism, at least if one remains faithful to what appears as the core of Stoicism. Moreover, precisely because they live like other people and do not set out a radical critique of existing society, Roman Stoics seem to have given up the project of the original Zenoian Republic (a utopian city united by love, concord and wisdom among its citizens). There is here a kind of mildness that critics of Stoicism have been prone to blame -- see, for example, Paul Veyne, who sees in Roman Stoicism "little more than a sophisticated version of prevailing morality: a man's duties to himself and others were identified with institutions, which this fostered doctrine ingenuously sought to internalize as moral precepts".² RS's overall project can be described as a rehabilitation of Roman Stoicism, paying special attention to these issues. RS shows that there is no tension between the Stoic inner fortress and the way they cope with existing conventions. On the contrary, the Roman Stoics urge us to mediate with social norms from the vantage point of the good as defined by philosophy (p. 8). In a word, the book's main thesis is that the Roman Stoics "successfully established a connection between a philosophical ideal and ordinary, everyday-life circumstances, and between a community shaped by Stoic wisdom and society as it is" (p. 1). The whole book may be seen as a development and vindication of this assertion. To put things briefly, Roman Stoicism argues for a transrational and rational modes of engaging with others. So, within and for a subtle balance between self-care and involvement with others, between detachment and engagement in the political life, between acceptance and challenge of existing social conventions.

Chapter 1 ('The Self as a Mediator', pp. 15-52) studies the nature of the 'self', according to the Stoics. It provides the conceptual tools for the analyses that follow in the subsequent chapters. What is striking in Roman Stoics is the importance of a self-reflexive language (see the omnipresence of a reflexive pronoun). RS sets out the main tenets of Stoic psychology and carefully examines their consequences for the Stoic notion of selfhood. Borrowing a happy formula from Christopher Gill,³ RS characterizes the Stoic self as "objective-participant" (p. 37): it is objective inasmuch as it presents a view of human nature as part of the nature of this universe that holds independently of individual preferences; it is participant inasmuch as it locates the self in a network of relationships. For example, Parnetius posited four factors that shape the identity of each individual human being (see Cicero, *De Officiis* 1, 107-117; the text is discussed by RS on pp. 27-29): first, nobility, which all human beings have in common (all human beings are endowed with a *hégémonikon* capable of reason; it is the governing principle of the soul whose proper function is virtue); second, the individual dispositions (bodily, temperamental, and mental); third, the circumstances that govern one's position in life; and fourth, individual choices having to do with how to lead one's life. In other words, and to borrow now RS's expression, the Stoic self is "fundamentally embedded" (p. 17): the self is anchored both in a body and in a rational order structured by an immanent divine principle. This rational order has a social aspect: the self is connected to others in a network of relationships, with its set of social and moral duties. Thus, even if Roman Stoics display an increased interest in interiority, that doesn't mean they promote an egoist or detached self -- quite the contrary: the Stoic self has a true altruistic outlook.

Whereas the first chapter had focused on the relationship between human and divine reason, chapter 2 ('From Self-Sufficiency to Human Bonding', pp. 53-82) addresses more directly the topic of human sociability, since it deals with the connection between individual people in local communities and universal humanity in the community of gods and men. Roman Stoics are not always very clear on this point, notably Epictetus, who sometimes employs formulas that may give the impression that the Stoics escape affective bonds. But RS shows convincingly that human affective and social affective bonds are very significant for Roman Stoics (as they were for Early Stoics). Indeed, human sociability is directly anchored in reason and divine will (p. 57). In other words, the Stoic sage doesn't want to dismiss all kinds of attachment: Stoic love, for example, comes from its willingness to sacrifice everything except virtue (that is, the excellence in the exercise of

Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy. The articles may be of substantial length and include critical notices of major books. OSAP is now published twice yearly in both hardback and paperback. Have you seen the latest OSAP? It is what scholars of ancient philosophy say to each other when they meet in corridors or on coffee breaks. Whether you work on Plato or Aristotle, on Presocratics or sophists, on Stoics, Epicureans or Sceptics, on Roman philosophers or Greek Neoplatonists, you are liable to find OSAP articles now dominant in the bibliography of much serious published work in your particular subject. Not safe to miss. Malcolm Schofield, Cambridge University.
OSAP was founded to provide a place for long pieces on major issues in ancient philosophy. In the years since it has fulfilled this role with great success, over and over again publishing groundbreaking papers on what seemed to be familiar topics and others surveying new ground to break. It represents brilliantly the vigour and the increasingly broad scope of scholarship in ancient philosophy and shows us all how the subject should flourish. M. M. McCabe, King's College London.

Breastfeeding and Mothering in Antiquity and Early Byzantium Stavroula Constantinou, Aspasia Skouroumouni-Stavrinou, 2023-09-29. This volume offers the first comparative interdisciplinary and intercultural examination of the lactating woman, biological mother and othermother in antiquity and early Byzantium. Adopting methodologies and knowledge deriving from a variety of disciplines, the volume's contributors investigate the close interrelationship between a woman and her lactating breasts, as well as the social, ideological, theological and medical meanings and uses of motherhood, childbirth and breastfeeding, along with their visual and literary representations. Breastfeeding and the work of mothering are explored through the study of a great variety of sources, mainly works of Greek-speaking cultures, written and visual, anonymous and eponymous, which were mostly produced between the first and the seventh century AD. Due to their multiple interdisciplinary dimensions, ancient and early Byzantine lactating women are approached through three interconnected thematic strands, having a twofold focus: society and ideology; medicine and practice; and art and literature. By developing the model of the lactating woman, the volume offers a new analytical framework for understanding a significant part of the still unwritten cultural history of the period. At the same time, the volume significantly contributes to the emerging fields of breast and motherhood studies. The new and significant knowledge generated in the fields of ancient and Byzantine studies may also prove useful for cultural historians in general and other disciplines such as literary studies, art history, history of medicine, philosophy, theology, sociology, anthropology and gender studies.
Know Yourself Ole Jakob Filtvedt, Jens Schröter, 2023-12-31. The book explores ancient interpretations and usages of the famous Delphic maxim 'know yourself'. The primary emphasis is on Jewish, Christian and Greco-Roman sources from the first four centuries CE. The individual

contributions examine both direct quotations of the maxim as well as more distant echoes Most of the sources included in the book have never previously been studied in any detail with a view to their use and interpretation of the Delphic maxim Thus the book contributes significantly to the origin and different interpretations of the maxim in antiquity as well as to its reception history in ancient philosophical and theological discourses The chapters of the book are linked to each other by numerous cross references which makes it possible to compare the different views of the maxim with each other It also helps readers to notice relationships and trajectories within the material The explorations of the relevant sources are also set in the context of ongoing debates about the shape and nature of ancient conceptions of self and self knowledge The book thus demonstrates the wide variety of philosophical and theological approaches in that the injunction to know oneself could be viewed and how these interpretations provide windows into ancient discourses about self and self knowledge
