identity al Azd from the immediate pre Islamic period into the early Abbasid era this book notes the ways it was continually refashioned over that time It explores the ways in which the rise of the early Islamic empire influenced the peoples of the Arabian Peninsula who became a core part of it and examines the connections between the kinship societies and the developing state of the early caliphate This helps us to understand how what are often called tribal forms of social organisation identity conditioned its growth and helped shape what became its common elite culture Studying the relationship between tribe and state during the first two centuries of the caliphate author Brian Ulrich s focus is on understanding the survival and transformation of tribal identity until it became part of the literate high culture of the Abbasid caliphate and a component of a larger Arab ethnic identity He argues that from pre Islamic Arabia to the caliphate greater continuity existed between tribal identity and social practice than is generally portrayed

The Arabs in Antiquity Jan Retso,2013-07-04 The history of the Arabs in antiquity from their earliest appearance around 853 BC until the first century of Islam is described in this book It traces the mention of people called Arabs in all relevant ancient sources and suggests a new interpretation of their history It is suggested that the ancient Arabs were more a religious community than an ethnic group which would explain why the designation Arab could be easily adopted by the early Muslim tribes The Arabs of antiquity thus resemble the early Islamic Arabs more than is usually assumed both being united by common bonds of religious ideology and law
