Chen, Justin Morgenroth, 2022-11-29 This book represents the latest research on urban forestry in a Malaysian context. It demonstrates that urban forestry is concerned not only with environmental enhancement but also other aspects such as recreation, health and well-being, and government policies. This edited collection provides a comprehensive overview of urban forestry studies from various researchers in Malaysia and includes rich historical perspectives of urban forestry in the country. It also tackles related issues in policy. The greening of urban Malaysia in the 1970s focused primarily on beautification and was primarily the province of horticulturists, landscapers, nursery workers, town planners, and architects with negligible inputs from foresters, particularly urban foresters. Perhaps for that reason, the term landscaping has been used more widely than urban forestry by government and private institutions, politicians, stakeholders, academicians, and the public. Nevertheless, the authors show that the concept of urban forestry is not new for developing countries such as Malaysia, where urbanization is increasing at a rapid rate. The book unpacks this demographic shift from a predominantly rural to a principally urban society. As the only unified body of work on urban forestry and arboricultural studies in Malaysia, this volume presents an important interdisciplinary reference for students, researchers, and scholars in physical geography, forestry, and urban forestry, arboriculture, and landscape architecture, both in Malaysia and in other developing urbanizing countries, particularly in Southeast Asia. It is also an important resource for those working in environmental policy and practice, excavating the vital connection between the environment and well-being. The Routledge Companion to Humanism and Literature Michael Bryson, 2022-03-30 The Routledge Companion to Humanism and Literature provides readers with a comprehensive reassessment of the value of humanism in an intellectual landscape. Offering contributions by leading international scholars, this volume seeks to define literature as a core expressive form and an essential constitutive element of newly reformulated understandings of humanism. While the value of humanism has recently been dominated by anti-humanist and post-humanist perspectives which focused on the flaws and exclusions of previous definitions of humanism.

this volume examines the human problems dilemmas fears and aspirations expressed in literature as a fundamentally humanist art form and activity Divided into three overarching categories this companion will explore the histories developments debates and contestations of humanism in literature and deliver fresh definitions of the new humanism for the humanities This focus aims to transcend the boundaries of a world in which human life is all too often defined in terms of restrictions political economic theological intellectual and lived in terms of obedience conformity isolation and fear The Routledge Companion to Humanism and Literature will provide invaluable support to humanities students and scholars alike seeking to navigate the relevance and resilience of humanism across world cultures and literatures Examining

International Land Use Policies, Changes, and Conflicts Hasnat, G. N. Tanjina, Hossain, Mohammed Kamal, 2020-11-06 Though conflicts continue to arise over land use and land cover changes the conversion of forest land to cropland or other land uses such as housing and urban development have been on the rise in recent years Decisions regarding land use and land cover influence climate change as well as various natural processes While proper changes can minimize the effects and speed of climatic changes the continued adverse changes may be accelerating the deterioration of the world's condition Examining International Land Use Policies Changes and Conflicts presents the latest research on the present status of land use and land cover changes throughout the world in order to determine appropriate land use policies that can protect earth's present and future condition The findings of the studies investigate the conflicts behind the land tenure and land uses in different countries of the world and examines existing policies and the reasons behind changes in them Ultimately the book provides readers with knowledge on how land can be managed in a sustained manner how landscape models are helpful for predicting and determining future land uses how land can be managed with the best architectural measures and how urban forestry is helpful for better environmental management and adapting or mitigating climate change effects Land users agriculturalists urban planners policymakers government officials researchers academicians and students looking to improve their understanding of this topic for better use of land in the future will find this book to be an asset to their current research
