Gut, Brain, and Environment in Nineteenth-Century French Literature and Medicine Manon Mathias, 2024-04-30 Gut Brain and Environment in Nineteenth Century French Literature and Medicine offers a new way of conceptualizing food in literature not as social or cultural symbol but as an agent within a network of relationships between body and mind and between humans and environment By analysing gastrointestinal health in medical literary and philosophical texts this volume rethinks the intersections between literature and health in the nineteenth century and triggers new debates about France s relationship with food Of relevance to scholars of literature and to historians and sociologists of science food and medicine it will provide ideal reading for students of French Literature and Culture History Cultural Studies and History of Science and Medicine Literature and Science Food Studies and the Medical Humanities Readers will be introduced to new ways of approaching digestion in this period and will gain appreciation of the powerful resources offered by nineteenth century French writing in understanding the nature of connections between gut mind and environment and the impact of these connections on our status as human beings

Loyola's Greater Narrative Frédéric Conrod, 2008 The Baroque imagination has its roots in Ignatius of Loyola s Spiritual Exercises 1547 which defined for the Counter Reformation era the parameters in which Catholic believers must confront the Enemy and the temporal corruption he embodies in order to enter a state of grace and obtain salvation Through complex interactions of different imaginative functions Loyola s text is able to superpose a variety of simultaneous narrative levels In order to reformulate the greater narrative the Magisterium of the Roman faith beyond what is revealed in Scripture the Spiritual Exercises require their exercitant to become an active participant in this narrative through constant visual contact with orders of corruption that is spaces in which virtue can be confronted with physical decay and sin Through these

spaces Counter Reformation Rome La Roma Ignaziana would redefine the economy of salvation and diffuse the visual dynamics of the Spiritual Exercises throughout the Catholic world In their writings Spanish Golden Age authors Miguel de Cervantes and Baltasar Graci n use the rising modernity of the novel to transform Loyola s notion of orders of corruption by adapting it to the secular world Their encoded criticism of Loyolan imagination contributed to the epistemological crisis that marks the Baroque age but also prepared the way for the crucial debates that would take place during the Enlightenment such as the deconstruction of the Catholic greater narrative reflected in Loyola This book concludes with a discussion of the eventual negation of Loyolan imagination in the novels of the Marquis de Sade which undermine the Roman faith by parodying the Baroque forms of spiritual visual experience and negate the Loyolan projection into orders of corruption

Understanding Barthes, Understanding Modernism Jeffrey R. Di Leo, Zahi Zalloua, 2022-07-14 *Understanding Barthes* *Understanding Modernism* is a general assessment of the modern literary and philosophical contributions of Roland Barthes The first part of the volume focuses on work published prior to Barthes s death in 1980 covering the major periods of his development from *Writing Degree Zero* 1953 to *Camera Lucida* *Reflections on Photography* 1980 The second part focuses both on the posthumously published material and the legacies of his work after his death in 1980 This later work has attracted attention for example in conjunction with notions of the neutral gay writing and critiques of everyday life The third part is devoted to some of the critical vocabulary of Barthes in both the work he published during his lifetime and that which was published posthumously

The Other Rise of the Novel in Eighteenth-Century French Fiction Olivier Delers, 2015-09-01 The rise of the novel paradigm and the underlying homology between the rise of a bourgeois middle class and the coming of age of a new literary genre continues to influence the way we analyze economic discourse in the eighteenth century French novel Characters are often seen as portraying bourgeois values even when historiographical evidence points to the virtual absence of a self conscious and coherent bourgeoisie in France in the early modern period Likewise the fact that the nobility was a dynamic and diverse group whose members had learned to think in individualistic and meritocratic terms as a result of courtly politics is often ignored The *Other Rise of the Novel* calls for a radical revision of how realism the language of self interest and commercial exchanges and idealized noble values interact in the early modern novel It focuses on two novels from the seventeenth century Fureti re s *Roman bourgeois* and Lafayette s *Princesse de Cl ves* and four novels from the eighteenth century Pr vost s *Manon Lescaut* Graffigny s *Lettres d une P ruviennne* Rousseau s *La Nouvelle H lo se* and Sade s *Les infortunes de la vertu* It argues that eighteenth century French fiction does not reflect material culture mimetically and that character action is best analyzed by focusing on the social and discursive exchanges staged by the text rather than by trying to create parallels between specific behavior and actual historical changes The novel produces its own reality by transforming characters and their stories into alternative social models different articulations of how individuals should define their economic relations to others The representation of interpersonal relations often

highlights personal conceptions of private interest that cannot be easily reconciled with the traditional narrative of a transition towards economic modernity Realism then is not only about verisimilar storytelling and psychological depth it is an epistemological questioning about the type of access to reality that a particular genre can give its readers **Ignatian Mysticism** Stephen J. Costello, 2024-01-01 This work explores the influential Spiritual Exercises of Ignatius Loyola the sixteenth century Spanish soldier saint mystic and founder of the Jesuit Order The Ignatian Exercises including the Examen are brought into dialogue with the psychologies of C G Jung and Viktor Frankl the philosophies of Eric Voegelin and Bernard Lonergan as well as the thought of Teilhard de Chardin von Balthasar and Eastern philosophy Their enduring relevance and implications for the Recovery and wellness movement are also articulated Drawing on key themes such as gratitude forgiveness and consciousness as a springboard for reflection and interpretation the mystical dimension of Ignatian spirituality is emphasised throughout This book will benefit the beginner serious scholar spiritual seeker and anyone intent on gaining an understanding of this unique way of proceeding *Italo Calvino's Architecture of Lightness* Letizia Modena, 2011-05-09 This study recovers Italo Calvino's central place in a lost history of interdisciplinary thought politics and literary philosophy in the 1960s Drawing on his letters essays critical reviews and fiction as well as a wide range of works primarily urban planning and design theory and history circulating among his primary interlocutors this book takes as its point of departure a sweeping reinterpretation of *Invisible Cities* Passages from Calvino's most famous novel routinely appear as aphorisms in calendars posters and the popular literature of inspiration and self help reducing the novel to vague abstractions and totalizing wisdom about thinking outside the box The shadow of postmodern studies has had a similarly diminishing effect on this text rendering up an accomplished but ultimately apolitical novelistic experimentation in endless deconstructive deferrals the shiny surfaces of play and the ultimately rigged game of self referentiality In contrast this study draws on an archive of untranslated Italian and French language materials on urban planning architecture and utopian architecture to argue that Calvino's novel in fact introduces readers to the material history of urban renewal in Italy France and the U S in the 1960s as well as the multidisciplinary core of cultural life in that decade the complex and continuous interplay among novelists and architects scientists and artists literary historians and visual studies scholars His last love poem for the dying city was in fact profoundly engaged deeply committed to the ethical dimensions of both architecture and lived experience in the spaces of modernity as well as the resistant practices of reading and utopian imagining that his urban studies in turn inspired
