International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contexts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy

School District Leadership Matters Bruce Sheppard, Jean Brown, David Dibbon, 2009-03-08 School District Leadership Matters challenges policy makers administrators and academics in the field of educational leadership to reassess their traditional approaches to learning working and planning The authors believe that government restructuring standards based reforms and centrally imposed strategic planning have been painfully ineffective As a consequence student learning has become increasingly superficial and inauthentic This book bridges the traditional divide between the generalizations of social science theory on the one hand and the world of educational practice on the other It argues that a more promising approach to education reform is through effective school district leadership Sheppard Brown and Dibbon draw on their collective experience both as educational leaders and researchers of leadership having spent five years researching and working in one school district Here they show how a district superintendent can successfully navigate the paradoxes and challenges of facilitating collaborative leadership in a school district with a traditionally hierarchical organizational structure As a conclusion to their work the authors highlight what they call five recognitions that deepen readers understanding of school district leadership They illuminate too ways that senior level practitioners can apply theory

to practice in order to break down the traditional hierarchical bureaucracies that inhibit learning and create professional learning communities School District Leadership Matters urges researchers graduate students practitioners and policymakers to focus on improving authentic learning for all students and argues that the best hope rests with effective school district leadership This empirically based yet practical book provides new insights and questions for academic researchers and will inspire policy makers and practitioners to imagine what could be and to work towards it

A Plan for Evaluating the District of Columbia's Public Schools National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Independent Evaluation of DC Public Schools, 2011-08-25 The District of Columbia DC has struggled for decades to improve its public education system In 2007 the DC government made a bold change in the way it governs public education with the goal of shaking up the system and bringing new energy to efforts to improve outcomes for students The Public Education Reform Amendment Act PERAA shifted control of the city's public schools from an elected school board to the mayor developed a new state department of education created the position of chancellor and made other significant management changes A Plan for Evaluating the District of Columbia's Public Schools offers a framework for evaluating the effects of PERAA on DC's public schools The book recommends an evaluation program that includes a systematic yearly public reporting of key data as well as in depth studies of high priority issues including quality of teachers principals and other personnel quality of classroom teaching and learning capacity to serve vulnerable children and youth promotion of family and community engagement and quality and equity of operations management and facilities As part of the evaluation program the Mayor's Office should produce an annual report to the city on the status of the public schools including an analysis of trends and all the underlying data A Plan for Evaluating the District of Columbia's Public Schools suggests that DC engage local universities philanthropic organizations and other institutions to develop and sustain an infrastructure for ongoing research and evaluation of its public schools Any effective evaluation program must be independent of school and city leaders and responsive to the needs of all stakeholders Additionally its research should meet the highest standards for technical quality

Using Data in

Schools to Inform Leadership and Decision Making Alex J. Bowers, Alan R. Shoho, Bruce G. Barnett, 2014-11-01 Our fifth book in the International Research on School Leadership series focuses on the use of data in schools and districts as useful information for leadership and decision making Schools are awash in data and information from test scores to grades to discipline reports and attendance as just a short list of student information sources while additional streams of data feed into schools and districts from teachers and parents as well as local regional and national policy levels To deal with the data schools have implemented a variety of data practices from data rooms to data days data walks and data protocols However despite the flood of data successful school leaders are leveraging an analysis of their school s data as a means to bring about continuous improvement in an effort to improve instruction for all students Nevertheless some drown some swim while others find success Our goal in this book volume is to bring together a set of chapters by authors who examine successful data use as it relates to leadership and school improvement In particular the chapters in this volume consider important issues in this domain including How educational leaders use data to inform their practice What types of data and data analysis are most useful to successful school leaders To what extent are data driven and data informed practices helping school leaders positively change instructional practice In what ways does good data collection and analysis feed into successful continuous improvement and holistic systems thinking How have school leadership practices changed as more data and data analysis techniques have become available What are the major obstacles facing school leaders when using data for decision making and how do they overcome them The Education Mayor Kenneth K. Wong, Francis X. Shen, Dorothea Anagnostopoulos, Stacey Rutledge, 2007-10-22 In 2002 the No Child Left Behind Act rocked America s schools with new initiatives for results based accountability But years before NCLB was signed a new movement was already under way by mayors to take control of city schools from school boards and integrate the management of public education with the overall governing of the city The Education Mayor is a critical look at mayoral control of urban school districts beginning with Boston s schools in 1992 and examining more than 100 school districts in 40 states The authors seek to answer four central questions What does school governance look like under mayoral leadership How does mayoral control affect school and student performance What are the key factors for success or failure of integrated governance How does mayoral control effect practical changes in schools and classrooms The results of their examination indicate that although mayoral control of schools may not be appropriate for every district it can successfully emphasize accountability across the education system providing more leverage for each school district to strengthen its educational infrastructure and improve student performance Based on extensive quantitative data as well as case studies this analytical study provides a balanced look at America s education reform As the first multidistrict empirical examination and most comprehensive overall evaluation of mayoral school reform The Education Mayor is a must read for academics policymakers educational administrators and civic and political leaders concerned about public education Learning-Focused Leadership in Action Michael S.
