Constraint Solving and Language Processing

Henning Christiansen, Peter Rossen Skadhauge, Jørgen Villadsen, 2005-05-30 This volume contains selected and thoroughly revised papers plus contributions from invited speakers presented at the First International Workshop on Constraint Solving and Language Processing held in Roskilde Denmark September 1-3 2004 Constraint Programming and Constraint Solving in particular Constraint Logic Programming appear to be a very promising platform perhaps the most promising present platform for bringing forward the state of the art in natural language processing this due to the naturalness in specification and the direct relation to efficient implementation Language in the present context may refer to written and spoken language formal and semiformal language and even general input data to multimodal and pervasive systems which can be handled in very much the same ways using constraint programming The notion of constraints with slightly differing meanings apply in the characterization of linguistic and cognitive phenomena in formalized linguistic models as well as in implementation oriented frameworks Programming techniques for constraint solving have been and still are in a period with rapid development of new efficient methods and paradigms from which language processing can profit A common metaphor for human language processing is one big constraint solving process in which the different specified linguistic and cognitive phases take place in parallel and with mutual cooperation which fits quite well with current constraint programming paradigms

The Traveling Salesman Problem David L. Applegate,Robert E. Bixby,Vašek Chvátal,William J. Cook,2011-09-19 This book presents the latest findings on one of the most intensely investigated subjects in computational mathematics the traveling salesman problem It sounds simple enough given a set of cities and the cost of travel between each pair of them the problem challenges you to find the cheapest route by which to visit all the cities and return home to

where you began Though seemingly modest this exercise has inspired studies by mathematicians chemists and physicists Teachers use it in the classroom It has practical applications in genetics telecommunications and neuroscience The authors of this book are the same pioneers who for nearly two decades have led the investigation into the traveling salesman problem They have derived solutions to almost eighty six thousand cities yet a general solution to the problem has yet to be discovered Here they describe the method and computer code they used to solve a broad range of large scale problems and along the way they demonstrate the interplay of applied mathematics with increasingly powerful computing platforms They also give the fascinating history of the problem how it developed and why it continues to intrigue us Formal Approaches to Software Testing Wolfgang Grieskamp, Carsten Weise, 2006-05-30 This book constitutes the thoroughly refereed post proceedings of the 5th International Workshop on Formal Approaches to Software Testing FATES 2005 held in Edinburgh UK in July 2005 in conjunction with CAV 2005 The book presents 13 revised full papers together with 1 work in progress paper These address formal approaches to testing and use techniques from areas like theorem proving model checking constraint resolution program analysis abstract interpretation Markov chains and various others *Approximation, Randomization, and Combinatorial Optimization.
