Handbook of International Economics, 2022-03-18 Handbook of International Economics Fifth Edition provides a definitive reference and teaching supplement for researchers and advanced graduate students. It includes self-contained surveys of the current state of a branch of economics in the form of chapters prepared by leading specialists. These surveys summarize not only received results but also newer developments from journal articles and discussion papers. Some original material is included but the handbook's main goal is to provide comprehensive and accessible surveys. While this is a useful reference for professional collections, it's also a great resource for supplementary readings for advanced courses for graduate students in economics. Provides the authority and expertise of leading contributors from an international board of authors. Presents the latest release in the Handbook of International Economics series. Includes self-contained surveys of the current state of a branch of economics in the form of chapters prepared by leading specialists. *Canadian Books in Print. Author and Title Index*, 1975 Marine Resource Economics, 2009 The Fisheries Co-management Experience Douglas Clyde Wilson, Jesper Raakjaer Nielsen, Poul Degnbol, 2013-03-09 For two decades the idea of governments and fishers working together to manage fisheries has been advocated, questioned, disparaged, and most importantly attempted in fisheries from North and South America through Europe, Africa, Asia, and Oceania. This book is the first time these experiences have been pulled together in a single volume, summarized, and explained. The Fisheries Co-management Experience begins with a review of the intellectual foundations of the co-management idea from several professional perspectives. Next, fisheries researchers from six global regions describe what has been happening on the ground in their area. Finally, the volume offers a set of reflections by some of the best authors in the field. The end result describes both the state of the art and emerging issues for one of the most important trends in natural resources management.
