Managing Global Alliance Key Steps For Successful Collaboration:

Managing Global Alliances Margaret Cauley de la Sierra, 1995 Successful companies no longer assume they alone are capable of developing manufacturing and marketing the products their business require Increasingly firms seek partnerships to stay ahead of the competition or even to survive in today s global economy Global markets may soon be dominated by extended corporate families with multiple links and partners

The Design of Alliance Governance Systems Sascha Albers, 2019-01-10 Strategic alliances have emerged as an important element of firms strategies Following suit research on alliances has blossomed concentrating on the various forms alliances take the reasons of their existence and increasingly embracing questions of alliance management and governance tasks However most contributions which address the alliance governance problem are yet rather vague and selective in their conception of alliance governance structures as well as the factors which influence their suitability The aim of this book is to further advance our understanding of alliance governance and to provide recommendations on the problem of alliance governance design Following the configurational approach Sascha Albers develops a comprehensive model of alliance governance systems He identifies relevant structural and instrumental design parameters and analyzes major contingency factors including member firms cultures and alliance experience number of alliance partners and trust which impact the design parameters suitability He finally deduces five configurations or ideal types of alliance governance systems which can be regarded as blueprints for the practitioner and as platform for further research for the alliance scholar Potential readership includes scholars of strategic management and organization theory interested students in these areas as well as practitioners involved in formulating and implementing alliance strategies

Construction Management Denny McGeorge, Patrick X. W. Zou, 2012-10-10 The construction industry faces continual challenges and demands due to market conditions and coercion by governments for improvements in safety quality and cost control and in the avoidance of contractual disputes To meet these challenges construction enterprises need to constantly seek new directions and business models in construction management A number of tools methods and concepts have been developed and advocated as aids to achieving improved performance but many in the industry find them confusing or are sceptical of their relevance The third edition of Construction Management New Directions brings together in a single volume detailed discussion of a range of contemporary management concepts which are relevant to the construction industry including strategic management benchmarking reengineering partnering and alliancing enterprise risk management total safety management total quality management value management and constructability It provides a straightforward accessible and objective account of these concepts showing how they interrelate and can be used to improve the performance of the construction firm This research based text will be essential reading for industry leaders and practitioners as well as researchers postgraduate and senior undergraduate students From a review of previous editions I am in no doubt that this book will quickly become a favourite among students and practitioners alike Construction Manager
