This edition is refocused and updated to include the demographic, economic, technology, and cultural trends that affect the management of service delivery. New chapters discuss the shift from government to governance, alternative methods of service delivery, community development, and the five management practices that are fast becoming the standard for professional local government management. Each chapter lays out the manager's responsibilities in each service area and provides effective policies, practices, and procedures. Short case examples give you a practical look at the goals, challenges, and solutions in the manager's world.
