Managing Scientists Alice M. Sapienza, 1995-07-05 *Managing Scientists Leadership Strategies in Research and Development* Alice M Sapienza I found this book to be exciting. Speaking as someone who has spent 30 years grappling with these issues I certainly would be a customer. Robert I Taber PhD Senior Vice President of Research Development Synaptic Pharmaceutical Corporation In today's climate of enormous scientific and technologic competition it is more crucial than ever that scientists involved in research and development be managed well. Often trained as individual researchers scientists can find integration into teams difficult. Managers from both scientific and nonscientific backgrounds who are responsible for these teams frequently find effective team building a long and challenging process. *Managing Scientists* offers strategies for fostering communication and collaboration among scientists. It shows how to build cohesive productive and focused teams to succeed in the competitive research and development marketplace. This book will help any manager to Build focused teams while promoting individual achievement Increase productivity creativity and innovative thinking Communicate effectively with the group and the organization at large Address the human side of scientists and science *Managing Scientists* contains case histories offers valuable insight into organizational culture and is written in a clear readable style. It effectively balances theory with real world examples to provide a stimulating and practical guide to managing researchers for the scientist and nonscientist alike.

Successful Management of Research & Development Andreas Holzinger, 2011 Establishment development and management of a successful research and development group require systematic knowledge and skills and a target oriented process model. It begins with a vision and requires a clear mission and accordant strategy in order to achieve these goals. The people involved in the team work are of primary importance everything depends on the interaction of this team. To create this team to develop scaffold advance and lead is a challenge. However even the best team is ineffective if there is no funding. Money is not everything but without money everything is nothing. A substantial budget is required to cover staff costs premises and basic equipment travel computers and basic software a scientific software portfolio hosting special equipment literature workshop organization visiting researcher invitations etc. In an environment of decreasing public budgets external funding becomes increasingly important in order to sustain international competitiveness quality and to maintaining excellence. Ultimately the team is assessed by output which is composed of measurable published items. If you ask what real knowledge is I answer that which enables action. Managing Process Innovation Thomas Lager, 2010 This book will take the reader through a systematic examination of the factors involved in process innovation starting with considerations to be initiated in the

boardroom and at group management level and developing into a hands on guide for middle management and professional engineers directly involved in the innovation of process technology The book initially puts process innovation in a corporate perspective providing a framework for the development of a corporate process innovation strategy Some new methodological tools are also introduced which support targeting and proper roadmapping of improved process capabilities and the progression of customer and end user product demands into raw material specifications in a well managed supply and demand chain Various aspects of the design of a process innovation organisation are reviewed in a later section In the context of development of process technology this book advocates the importance of delineating and clarifying corporate work processes for process innovation Various environments for development work are discussed from initial test work to pilot plant testing and the use of demonstration facilities to achieve lean process innovation The importance of an open collaborative approach is stressed this includes involving external equipment manufacturers at an early stage as well as collaborative development of customers use of the products in their production processes with a view to excellence in future application development Process innovation will not however generate profit or reduce operating costs until the new or improved process technology is operating well in the plant Best practice for start up of new process technology and process plants is then examined starting with a fresh outlook on technology transfer in general This often neglected area of management of process innovation is in fact of an importance equivalent to that of a product launch in the development of new products The final part of the book closes the circle discussing how to implement and measure the strategic intent of process innovation Improving the general performance of corporate process innovation is then covered by going through success factors and key performance indicators and their aggregation on a corporate level

The Research Funding Guidebook Joanne B. Ries,Carl G. Leukefeld,1998 Although the landscape of research funding is continually changing over the past several years one feature has remained consistent people who are young in their careers are expected to take on not only the responsibility of applying for external funding but are also required to get it manage it and renew it in order to keep their research programs projects and careers viable The Research Funding Guidebook begins at the point many grant seekers can identify with rejection Part I emphasizes how to resubmit unfunded applications to make them more competitive The material contained in this section is invaluable especially since funding sources are now limiting the number of times the same application can be resubmitted Part II goes on to highlight the practical issues of a project after funding has been obtained Here the authors provide a map of the people and places that

must become part of a researcher's daily and weekly routine. The guidance provided in this part of the book includes a checklist that can be used to aid the newly funded investigator's progress. Time management, an essential but often overlooked feature of research funding, is also dealt with in this section. The subjects of other sections of this volume include the small business aspects of maintaining funding for a project and the process of targeting continued funding by determining the next fundable step of a project. This is a hands-on guide that will never be far from the reach of those using it. Topics like what to include in a project proposal, tips for competitive writing, and how to select funding sources are easily accessed. In addition, helpful checklists and samples are provided along the way. These practical features and the comprehensive up-to-date information presented make *The Research Funding Guidebook* an indispensable reference for new and experienced investigators alike. Anyone interested in research funding in any academic discipline will find this book useful.

Ways to Successful Strategies in Drug Research and Development H.-Harald Sedlacek, Alice M. Sapienza, Volker Eid, 2008-09-26 Strategic planning is a critical subject central to the success of any scientific and economical enterprise. Not only is the scientific knowledge of many persons needed but also an assessment of what may occur in the future which approach may be competitive, which option can be achieved, and how can this be accomplished. With a focus on the various ethical obligations to patients, animals, and the environment, this book offers hands-on help on how to develop successful R&D strategies, taking special account of the needs of scientists and managers in the pharmaceutical industry. Key topics include evaluation and selection of projects, measures to reduce risks, project management, corporate and technology strategy, managing for innovation. The reader will learn the methods needed to elaborate strategies so that he or she will become aware of the numerous managerial, organizational, social, and political parameters and forces the consideration of which is essential for the successful realization of a formulated strategy.
