 Public school teachers work in a high stress environment which contributes to many stress related problems Distressed
 teachers tend to miss more school burnout faster and retire earlier Distressed teachers who hang on to their jobs tend to be
 less effective educators and really aren't a very positive influence on children They make a bad name for teachers in public
 schools Those burned out teachers who hang on and continue to work day after day are risking major health problems There
 is pervasive evidence that supports the notion that public school teachers should be well versed in the subject of stress
 management Teachers should be required to take a course or in service training regarding stress and stress management
 This workbook will help teachers to learn about stress and its harmful effects It will help them to identify their stress and
 stressors and it will provide a step by step process which will help them to manage their stress Teachers who go through this
 workbook and do the work will better understand their relationship with stress and have a better chance of surviving the
