Managing To Make Organisations Work:

Making organisations work T. Owen, 2013-12-01 I have worked as a manager in a large industrial organisation for the last twenty years During that time I have seen the job of a manager change almost out of recognition in both complexity and difficulty For the last five of those years I have held a job which has been much concerned with the problems which managers face under these circumstances and I have been in the position to discuss these problems with people doing similar jobs in other large organisations who have in turn often asked me for advice on their problems The result has been to build up a general picture of the manager in large and complex industrial organisations and of those practices which will help him or her to be effective and those which will not I suspect that the picture which emerges is one which may have some validity for large and complex organisations in other spheres trade unions for instance or the civil service but I have no first hand evidence to show whether this is so or not It is a picture which is certainly not so relevant for small organisations These and I have had the pleasure of working in some from time to time have their own problems but they tend to be different ones

Handbook of Gender, Work and Organization Emma Jeanes, David Knights, Patricia Yancey Martin, 2012-04-16 This work of reference represents a remarkably complete detailed and extensive review of the field of gender work and organization in the second decade of the 21st century. Its authors represent eight countries and many disciplines including management sociology political science and gender studies. The chapters by top scholars in their areas of expertise offer both reviews and empirical findings and insights and challenges for further work. The chapters are organized in five sections: Histories and Philosophies; Organizing Work and the Gendered Organization; Embodiment; Globalization and Diversity; Theoretical and conceptual developments at the cutting edge of the field are explicated and illustrated by the handbook's authors. Methods for conducting research into gender work and organization are reviewed and assessed as well as illustrated in the work of several chapters. Efforts to produce greater gender equality in the workplace are covered in nearly every chapter in terms of past successes and failures. Military organizations are presented as one of the difficult to change in regards to gender with the result that women are marginalized in practice even when official policies and goals require their full inclusion. The role of the body embodiment is emphasized in several chapters with attention both to how organizations discipline bodies and how organizational members use their bodies to gain advantage. Particular attention is paid to sexuality in and organizations including sexual harassment policies to alleviate bias and the likelihood that future work will pay more attention to the body's presence and role in work and organizations. Many chapters also address change efforts that have been employed by individuals, groups and organizations including transnational ones such as the European Union, the United Nations and so on. In addition to its value for teachers and students within this field, it also offers insights that would be of value to policymakers and practitioners who need to reflect on the latest thinking relating to gender at work and in organizations.
