Managing Water And Water Users Experiences From Kerala:

Managing Water and Water Users R. Sooryamoorthy, Antony Palackal, 2003 *Managing Water and Water Users* offers an answer to the question of why Kerala remains a water scarce region despite having a regular and adequate rainfall The papers presented in this volume deal with the multifarious aspects of conservation management and sharing of water resources

Social Participation in Water Governance and Management Kate A. Berry, Eric Mollard, 2009-12-01 Social participation in water management and governance recently became a reality in many economies and societies Yet the dimensions in which power regulation social equity and democracy building are connected with participation have been only tangentially analyzed for the water sector Understanding the growing interest in social participation involves appreciating the specificity of the contemporary period within its historic and geographic contexts as well as uncovering larger political economic and cultural trends of recent decades which frame participatory actions Within a wide variety of cases presented from around the world the reader will find critical analyses of participation and an array of political ecological processes that influence water governance Sixteen chapters from a diverse group of scholars and practitioners examine water rights definition hydropower dam construction urban river renewal irrigation organizations water development NGOs river basin management water policy implementation and judicial decision making in water conflicts Yet there are commonalities in participatory experiences across this spectrum of water issues The book's five sections highlight key dimensions of contemporary water management that influence and in turn are influenced by social participation These sections are participation and indigenous water governance participation and the dynamics of gender in water management participation and river basin governance participation and implementation of water management and participation and the politics of water governance

Technological Interventions in Management of Irrigated Agriculture Megh R. Goyal, Susmitha S. Nambuthiri, Richard Koech, 2018-01-31 With a roster of international contributors this volume offers an abundance of solutions to address agricultural water management challenges in today's water scarce areas of the world The authors present studies on farmer friendly irrigation scheduling methods model based analysis of crop water requirements ways to optimize surface irrigation systems and hydraulic design and management of surface water systems The book goes on to highlight ways to improve soil properties by taking into account spatial temporal and spectral variability in soil properties The volume also covers various innovative research studies on soil and water productivity of vegetable cultivation under water stressed areas application of coir geotextiles and the role of biofertilizers in controlling soil degradation and maintaining fertile topsoil Crop management strategies to enhance the efficient use of marginal and saline lands for nonconventional crops are also discussed The book is divided into four sections covering engineering interventions in irrigation management technological interventions in management of soil properties technological inventions for soil and water conservation crop management for non conventional use This volume will serve as an invaluable resource for

MANAGING NATURAL RESOURCES HARIKESH N.

MISRA,2014-03-13 Natural resource management and sustainable development has of late assumed great importance especially because of ecological crisis and environmental dangers which are looming large Today the issues related to natural resource exploitation consequences their conservation preservation and management leading to sustainable development have become the major thrust areas of teaching and research Also sustainability of natural resources especially water and land resources and their efficient use is one of the core programmes of Government of India s Twelfth Five Year Plan 2012 2017 for strategic development this objective can only be achieved if the resources are used judiciously Although land and water resources the focus of the present book are vital for human survival and development unfortunately both are under threat and are increasing strain worldwide These resources have wide and significantly varying implications in rural and urban settlements especially in India where population has been continuously growing and therefore the demand of land and water is intensifying This has necessitated urgent need for reviewing the availability of land and water resources and their conservation Besides dealing with the theoretical aspects this compendium presents case studies on natural resources as well which reveal ground realities at micro and meso levels too Pedagogical features like maps diagrams satellite imageries and latest database of the primary and secondary nature distinguish this book from other works on the subject The book will be of immense use to postgraduate students and research scholars of geography and related disciplines such as rural urban studies and environmental science The thematic approach of the book provides reasonably good contents for cogitation to researchers Policy makers planners and academicians may also be benefitted while framing futuristic norms which may lead to sustainable development the ultimate goal AUDIENCE Postgraduate students and Research Scholars of Geography Policy makers Planners and Academicians

RURAL WATER SUPPLY MANAGEMENT A STUDY IN SOUTHERN PART OF ASSAM Dr. R J Dutta Chowdhury ,Dr. Debomalya Ghose ,2022-05-25 *Reforming Institutions in Water Resource Management* Lin Crase,Vasant P. Gandhi,2009-09-02 As water scarcities increase nations throughout the world are in search of better institutions to manage water resources India has been making substantial efforts to develop its water management systems since independence and significant increases in irrigated agriculture have taken place through both public and private initiatives However scarcities are increasing and major problems presently confront the management of water resources and irrigated agriculture Resolving these problems is crucial for the future The main purpose of this book is to provide a new approach for the analysis and design of water institutions that govern the use and development of water resources particularly for agriculture which is the largest user Drawing on the theory of New Institutional Economics and comparisons with Australia as a developed country and other less developed nations in Africa and Asia the authors present original empirical data from three Indian states Detailed analysis of these data is used to identify and recommend attributes and features of water management institutions that are conducive to effective resource management its long term success

and its best contribution to development *Integrated River Basin Management through Decentralization* Karin Kemper, William Blomquist, Ariel Dinar, 2007-02-17 Drawing upon a worldwide survey of river basin organizations and in depth studies of eight river basins in a variety of locations around the globe this book examines how institutional arrangements for managing water resources at the river basin level have been designed and implemented what the impetus for these arrangements has been and what institutional features appear to be associated with greater or lesser success in river basin management **Water Law for the Twenty-First Century** Philippe Cullet, Alix Gowlland-Gualtieri, Roopa Madhav, Usha Ramanathan, 2009-10-27 In the face of growing freshwater scarcity most countries of the world are taking steps to conserve their water and foster its sustainable use Water crises range from concerns of drinking water availability and or quality the degradation or contamination of freshwater and the allocation of water to different users To meet the challenge many countries are undergoing systemic changes to the use of freshwater and the provision of water services thereby leading to greater commercialization of the resource as well as a restructuring of the legal regulatory technical and institutional frameworks for water The contributions to this book critically analyse legal issues arising under international law such as environment and human rights provisions concerning the economic environmental and social consequences of proposed water regulatory changes and their implementation at the national level The book examines the situation in India which is currently in the midst of implementing several World Bank led water restructuring projects which will have significant impacts on the realisation of the right to water and all other aspects of water regulation for decades to come In analysing the situation in India the volume is able to detail the interactions between international law and national law in the field of water and to ask broader questions about the compliance with international law at the national level and the relevance of international law in national law and policy making *Water Resource Management in South Asia* Anjal Prakash, 2022-05-29 This cluster of books presents innovative and nuanced knowledge on water resources based on detailed case studies from South Asia India Bangladesh Bhutan Nepal Pakistan and Sri Lanka In providing comprehensive analyses of the existing economic demographic and ideological contexts in which water policies are framed and implemented the volumes argue for alternative informed and integrated approaches towards efficient management and equitable distribution of water These also explore the globalization of water governance in the region particularly in relation to new paradigms of neoliberalism civil society participation integrated water resource management IWRM public private partnerships privatization and gender mainstreaming These volumes will be indispensable for scholars and students of development studies environmental studies natural resource management governance and public administration particularly those working on water resources in South Asia They will also be useful for policymakers and governmental and non governmental organizations **Indian Water Policy at the Crossroads: Resources, Technology and Reforms** Vishal Narain, Annasamy Narayanamoorthy, 2016-01-12 This book reviews and analyzes emerging challenges in water policy

governance and institutions in India Recent times have seen the contours of water policy shaped by new discourses and narratives there has been a pluralization of the state and a changing balance of power among the actors who influence the formulation of water policy Discourses on gender mainstreaming and Integrated Water Resource Management IWRM are influential though they have often remained rhetorical and difficult to put into practice Debate over property rights reform and inter linking of rivers has been polarized At the same time there has been a rising disenchantment with policy initiatives in participatory irrigation management cleaning up of water bodies and pollution control Fast depletion of groundwater resources and the importance of adopting new irrigation methods are getting increased focus in the recent policy dialogue The contributors review current debate on these and other subjects shaping the governance of water resources and take stock of new policy developments The book examines the experience of policy implementation and shows where important weaknesses still lie The authors present a roadmap for the future and discuss the potential of alternative approaches for tackling emerging challenges A case is made for greater emphasis on a discursive analysis of water policy to examine underlying policy processes The contributors observe that the ongoing democratization of water governance coupled with the multiplication of stresses on water will create a more visible demand for platforms for negotiation conflict resolution and dialogue across different categories of users and uses Finally the authors propose that future research should challenge implicit biases in water resources planning and address imbalances in the allocation of water from the perspectives of both equity and sustainability

Social Action ,2007 *Kerala Development Report* India. Planning Commission,2008 Full of data on various sectors and issues among them finance tourism foreign trade agriculture and governance this report on the state of Kerala is designed to benefit businesses NGOs and policy makers While Kerala has a strong economy and is India s most literate state areas such as human rights and the treatment of women and minorities leave room for improvement This extensive reference discusses the constraints and challenges faced by Kerala and provides a blueprint for its socioeconomic progress
