Schizophrenia Bulletin ,1977 California and the Politics of Disability, 1850-1970 Eileen V. Wallis,2023-03-31 This book explores the political legal medical and social battles that led to the widespread institutionalization of Californians with disabilities from the gold rush to the 1970s By the early twentieth century most American states had specialized facilities dedicated to both the care and the control of individuals with disabilities Institutions reflect the lived historical experience of many Americans with disabilities in this era Yet we know relatively little about how such state institutions fit into specific regional state or local contexts west of the Mississippi River how those contexts shaped how institutions evolved over time or how regional institutions fit into the USA s contentious history of care and control of Americans with mental and developmental disabilities This book examines how medical social and political arguments that individuals with disabilities needed to be institutionalized became enshrined in state law in California through the creation of a bureaucracy of disability Using Los Angeles County as a case study the book also considers how the friction between state and county policy in turn influenced the treatment of individuals within such facilities Furthermore the book tracks how the mission and methods of such institutions evolved over time culminating in the 1960s with the birth of the disability rights movement and the complete rewriting of California s laws on the treatment and rights of Californians with disabilities This book is a must read for those interested in the history of California and the American West and for anyone interested in how the intersections of disability politics and activism shaped our historical understanding of life for Americans with disabilities **Handbook on Human Service Administration** Jack Rabin,1988-05-27 Introducing theories and concepts essential for human services administration this book covers organization theory and management budgeting and financial management personnel administration and labor relations laws and regulations innovation and change and data administration and information systems The author explores bioethics and managing Babies Doe legal right to refuse treatment nursing home payments and more He applies important general concepts to specific concerns such as organizational structure and service delivery arrangements internal financial planning innovations in drug services delivery and implementing medical information systems Involuntary Civil Commitment of the Mentally Ill in the Post-reform Era Robert Desle Miller,1987 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Painful Choices** David Mechanic,1989-01-01 More than ever society faces painful choices in the allocation of resources for health care How it makes these choices and how wise they are will determine the quality and character of health care for years to come David Mechanic examines existing and impending dilemmas the American health care system must manage as it confronts these

choices He explores conceptual approaches to health and health care showing how these translate into research and defines a strategy for informed choice The result is a masterful volume by one of our leading medical sociologists at the peak of his career Mechanic looks at the continuing emphasis on biomedical technology in the context of growing economic constraints as medical care becomes more expensive and demands become greater He examines the discrepancy between public expectations and how health care is actually provided and points out increasing discordance between demographic trends and disease patterns and the medical system's emphasis on acute care Of particular concern is the enormous gap between entitlements for medical care and the increasing need for long term care This gap is of particular concern because of the United States's enormous investment in health care which now consumes 11 percent of the Gross National Product Although there is no particular consensus on what is an appropriate level of investment in health policymakers are impatient with the medical system's apparent inability to control costs and are concerned as well about the competition for resources between health and other sectors Mechanic examines new trends such as managed care and transformation of the role of those who provide health care from patient advocates to allocators of services a crucial distinction The choices that will have to be made in the next decades are difficult They will also be painful but they are inevitable The key challenge will be to respond to the anxieties of the 37 million uninsured children and adults the growing numbers of frail elderly and the needs of patients with serious mental illness and other chronic disabilities All of this must be accomplished while maintaining a high level of service for the rest of the population and without breaking the bank To achieve this Mechanic argues health services must be shaped to enhance function and quality of life and not simply in response to technological imperatives In its profound understanding of the social and political context in which competitive initiative the growth of regulation new health care systems and approaches for making research sensitive to patients are all evident *Painful Choices* provides a framework for responsive and meaningful policy analysis

The Abused Child in Search of Safety Kent S. Miller, 2004 Longtime Presbyterian layperson Dr Kent S Miller emeritus professor of psychology at the Florida State University Tallahassee who had spent much of his professional life focused on mental disability law and the relations between the mental health and the criminal justice systems decided to volunteer for a couple years in the Department of Children and Families in Florida to try to understand why they were getting such bad press This book is a result of this time spent with the Florida DCF and is an analysis of the current crisis in the child welfare scene based on the author's involvement with a program that has been racked with the scandals of missing and murdered children If as Christians we are to care for the little ones and our neighbors then Dr Miller posits that we must address this concern immediately for we are sabotaging our nation's future by abandoning our at risk children to say nothing of incurring the wrath of our Lord who demonstrated a preferential option for children as well as for the poor

Public Guardianship Pamela B. Teaster, Winsor C. Schmidt Jr., Susan A. Lawrence Ph.D., Marta S. Menciondo, Erica F. Wood, 2010-02-09 This book offers the first full examination of the legal role of public

guardianship in 25 years comparing current conditions to those when the last study was published in 1981 Public Guardianship In the Best Interests of Incapacitated People is written to advance public understanding of what happens to disabled and elderly adults when no family member or friend is available to be a caregiver or guardian should it become necessary It is the first major study on this critically important issue since 1981 Conducted by experts in gerontology social work public policy and public health it finds that although progress has been made guardianship programs around the country still are hampered by limited staff and resources Public Guardianship analyzes the full range of state statutes governing guardianship including guardian eligibility investigation due process rights powers costs and monitoring The authors report their case studies of public guardianship programs marshaling and comparing field data from their surveys of stakeholders in ten states The book concludes with a variety of recommendations for improving guardianship programs including the authors Model Public Guardian Act *Schizophrenia Bulletin* ,1977 Handbook on Mental Health Policy in the United States David A. Rochefort,1989-10-24 also has a guide to sources and an author subject index **Law Books in Print: Authors** Robert L.
