Managing New Office Technology Calvin H. Pava, 1983 The first book to combine in one account the technical and social aspects of office organization Eric Trist The new electronic office technology has been much praised for the increased speed precision and memory capacities it offers office management But do these improvements mean increased productivity Not by themselves says Calvin Pava Equally important to the high performance of office work will be its organization not only of clerical support personnel and equipment but of management and staff professionals This book is the first to define the organizational challenge posed to management by new office technology Calvin Pava breaks the myth that these are simple issues for technical solution alone Based on research conducted at the Harvard Business School *Managing New Office Technology* takes a method of organization design with a proven track record in industrial settings and shows how this organizational self analysis and self directed change can be applied successfully to offices Using sociotechnical design a method that takes into account both the technology and structure of work Pava shows how changes in an office s organization can lead to more satisfying and productive results The goal and the proven achievement of sociotechnical design is to organize people work and their tools so their efforts are efficiently complementary At the core of *Managing New Office Technology* are three detailed case studies that show the principles of sociotechnical design at work These examples of the planning designing and implementing of organizational change in an order processing customer service department a computer systems firm and a payroll department show step by step how to apply the procedure across a broad range of different activities Unlike other books on the subject which deal principally with clerical work and show little interest in bridging the gap between theory and application *Managing New Office Technology* extends to address the work of management and staff professionals and shows how reorganizing is done Moreover recognizing that outside interests have a stake in the effects of technological development in offices Pava provides a framework for addressing the concerns of such groups as displaced professionals minorities middle managers clerical support staff old workers young workers and organized labor A glossary of terms and an afterword by Eric Trist originator of the sociotechnical approach round out this long awaited work For managers concerned about astute deployment of new office technology and for those who are also anxious about the larger implications for society of the growth of automation in offices Calvin Pava s *Managing New Office Technology* will be required reading

Managing Technology-Based Projects Hans J. Thamhain, 2014-03-12 *A GUIDE TO EFFECTIVE PROJECT MANAGEMENT IN TECHNOLOGY BASED FIRMS* Used effectively project management can increase a firm's market share product quality and customer satisfaction Though technology based companies place themselves at a competitive disadvantage if they neglect this strategic tool many overlook project management's benefits because they see themselves as continuously adapting organizations In reality this role makes project management even more vital *Managing Technology Based Projects* imparts the latest approaches and tools essential to lead a successful technology based project It outlines the practical integration of project management with four key areas strategic alignment of projects within the enterprise the project management process and its organizational support system invaluable tools and techniques and the individual and group leadership within a project's organization Complete with examples of industrial applications the book includes Methods for defining key performance indicators and assessing project management process effectiveness Suggestions for fine tuning and continuous improvement Practical case scenarios discussion topics end of chapter reviews and exercises Attention to project management as it applies to a globalized business No one in a managerial role should be without Thamhain's expert advice This guidebook is your road map to successfully incorporating enterprise project management into technology based work *Creating Value with Science and Technology* Eliezer Geisler, 2001-08-30 Do science and technology create value for society and the economy and how might one go about measuring it How do we evaluate its benefits Can we even be certain that there are benefits Geisler argues that there are benefits and that they outweigh in value

the negative impacts that inevitably accompany them His revolutionary new book goes on to show that they can also be measured and evaluated and in one volume all of the existing knowledge on how to do it is compiled then Geisler s own methods are offered The result is a compelling argument that the value of science and technology in our lives has indeed been positive and that the economic well being of all individuals organizations and nations rests upon them Geisler starts off by describing his conceptual framework for the evaluation of science and technology and the impact and benefits that proceed from them He discusses the nature of evaluation in general terms and then in the specific context of science technology and innovation together He reviews the state of our present knowledge and assesses the nature of value creation itself Throughout Geisler remains fixed on his driving thesis Although there are certainly some negative impacts from science and technology on the whole the results of its outputs are positive He shows how they have contributed to a range of activities and institutions particularly to the improvement of health and human welfare worldwide Finally after discussing the theories of evaluation he gets down to the practice providing readers with a way to assess science and technological innovations for themselves

Strategic Marketing for High Technology Products Thomas Fotiadis,2018-05-08 In order for High Technology HT companies to tackle contemporary demanding market challenges they frequently deploy time reduction strategies with respect to product launch Marketing of technology related products and especially cutting edge ones involves a complex and multidimensional bundle of specific and unique characteristics such as the complexity of products the intensity of the competition confusion and or fear of adoption among consumers fast pacing changes in the external environment The very nature of the interrelations that evolve as part of the dynamic process of strategy formulation contributes further to the formulation of a very challenging environment which is described as tumultuous volatile and turbulent These specific features qualities and characteristics constitute the core of the innate need for an integrated approach that requires and depends on the cooperation and coordination of specific functional competencies This book employs a systemic approach that accommodates the integration of specialized departmental capabilities as a fundamental prerequisite and a cornerstone for the successful navigation of high tech organizations in their extremely competitive environments It provides a solid and extant context of compact and consistent cognitive background that is specific to the HT strategic marketing field and a strategic tool that utilizes relies and is built on the turbulent environment of HT rather than just overlooking avoiding or ignoring it and that assumes a proactive point of view capitalizing on characteristics specific to this field through the provision of a strategic managerial and marketing model that is overlaid onto a reliably assessed foundation of dynamic qualities with a long term orientation and scope albeit one that would be easy to apply and which will generate immediate results
