

A PRACTICAL GUIDE TO MEASURING AND MANAGING IMPACT

Managing The Impact Of The Euro

James Hughes

Managing The Impact Of The Euro:

Managing the impact of changes in the value of the euro on EU funds Great Britain: National Audit Office, 2011-02-18 The National Audit Office believes more could be done to manage the risk of a reduction in the value of EU funds to the UK in the event of a depreciation in the euro The UK Government receives around 5 billion from the European Union each year to fund EU programmes in the UK However the relative value of the pound and the euro varies significantly with the exchange rate fluctuating by up to 14 per cent in a single month A 14 per cent change can lead to an increase or decrease of 700 million in the sterling value of funds provided by the EU if the exchange rate holds at that level The use of forward contracts a form of hedging where the department and a commercial bank agree an exchange rate in advance has helped reduce the potential funds exposed to a fall in value from 8.5 billion to 2.4 billion in 2009/10 However wider use of hedging could reduce still further the amount of taxpayer funds at risk Each department managing EU funds works in isolation on developing its policy Such an arrangement is not cost effective These departments would benefit from more detailed guidance from HM Treasury in this area and from developing more pooled expertise to reduce duplication of effort Government bodies require considerable expertise and support to ensure the most appropriate and cost effective hedging arrangements are put in place

European Pain Management provides a review of the organization of pain care in the 37 member countries providing the first authoritative summary description and coordinated challenge establishing the authority of pain centres in Europe **Public Financial Management in the European Union** Marta Postuła, 2022-04-19 This book reveals how to create efficient institutions and coordinate policy on a transnational scale to ensure that European Union integration can best meet social needs It offers a combined technocratic and humanist perspective on the discussion of public financial management The state as part of its public policy should seek to preserve our social and environmental values yet there are mounting imbalances in society which point to the growing role of the state in minimising them Under such circumstances it is worth reflecting on how new challenges could require updated more complex formulas to deal with crises in current times and for social and economic policy making by states and the European Union generally which would ensure their compatibility with the world

financial markets The work offers an in depth and unique performance analysis of European Union institutions compared to the national entities of EU Member States It contributes to the ongoing debate on global public goods and the processes involved in managing their provision Further it discusses public finance management instruments indicating their historical evolution in practice and their effectiveness measured with the Human Development Index The author presents a proposal of how to manage global European and national public goods across three areas environmental protection transnational infrastructure projects and social policy The book analyses public financial management instruments used during the recent pandemic making a distinction between regular and emergency instruments and assessing their effectiveness in specific economic situations This will be of interest to researchers and students of economics and finance as well as decision makers and practitioners from governments international organisations and specific non governmental organisations concerned with issues of public finance management

EU Conflict Management James Hughes, 2013-09-13 The EU's self promotion as a conflict manager is embedded in a discourse about its shared values and their foundation in a connection between security development and democracy This book provides a collection of essays based on the latest cutting edge research into the EU's active engagement in conflict management It maps the evolution of EU policy and strategic thinking about its role and the development of its institutional capacity to manage conflicts Case studies of EU conflict management within the Union in its neighbourhood and further afield explore the consistency coherence and politicization of EU strategy at the implementation stage The essays examine the extent to which the EU can exert influence on conflict dynamics and outcomes Such influence depends on a number of changing factors how the EU conceptualizes conflict and policy solutions the balance of interests within the EU on the issue divided or concerted and the degree of politicization in the EU's role the scope for an external EU role and the value attached by the conflict parties to EU engagement a value that is almost wholly bound to their interest in a membership perspective or other strong relationship to the EU rather than to shared values as an end in themselves This book was based on a special issue of *Ethnopolitics*

National Audit Office,2009 This report summarises the results of the European Court of Auditors examination of the European Union s accounts for 2007 and progress on the range of initiatives taken forward by the Commission and Member States For the first time the Court provided a positive Statement of Assurance without qualification on the reliability of the Commission s accounts in effect confirming that they give a true and fair view But for the fourteenth successive year the Court did not provide a positive Statement of Assurance on whether the underlying transactions conformed to applicable laws and regulations Cohesion Policy funds which are designed to reduce disparities in the level of development between regions and Member States for example by supporting major infrastructure projects remain the most challenging component Based on its audit work the Court estimates that for expenditure on Cohesion projects at least 11 per cent should not have been reimbursed by the Commission in 2007 This conclusion reflects weakness in controls at Member State level but also the difficulty of implementing complex programmes In the Cohesion Policy area the Commission has increased the rate at which it recovers incorrect payments from Member States from 287 million euros in 2007 to 843 million in September 2008 and it predicts that further corrections will be finalised in Spring 2009 Financial corrections in future years could have an impact on the United Kingdom
