Manchester A Guide To Recent Architecture:

Manchester David Hands, Sarah Parker, 2000 Manchester is a city undergoing continual change Rich in heritage diverse in nature it is uniquely characterised by its inherent ability to transform itself This book is about the city s rebirth and its changing identity It provides a guide to the city s architecture and documents the pioneering spirit and ingenuity of the designers and planners who have shaped and redefined the essence of a city in motion **The Anxious City** Richard J.

Williams, 2004-03-01 In the Western world cities have arguably never been more anxious practical anxieties about personal safety and metaphysical anxieties about the uncertain place of the city in culture are the small change of journalism and political debate Cities have long been regarded as problems in need of drastic solutions In this context the contemporary revival of city centres is remarkable But in a culture that largely fears the urban how can the contemporary city be imagined How is it supposed to be used or inhabited What does it mean Taking England since WWII as its principal focus this

provocative and original book considers the Western city at a critical moment in its history **Conservation of Modern Architecture** Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike *Storied Ground* Paul Readman, 2018-02-22 The relationship between landscape and identity is explored to reveal how Englishness encompasses the urban and rural and the north and south

Alternative Visions of Post-War Reconstruction John Pendlebury, Erdem Erten, Larkham J Peter, 2014-08-19 The history of post Second World War reconstruction has recently become an important field of research around the world *Alternative Visions of Post War Reconstruction* is a provocative work that questions the orthodoxies of twentieth century design history This book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the Second World War to the mid sixties The various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism In this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies Spanning from a historically informed modernism to

the increasing presence of urban conservation the contributors examine these alternative approaches to the city and its architecture

New Perspectives in British Cultural History Rosalind Crone, David Gange, Katy Jones, 2021-03-04 This book is composed of a selection of papers presented at a conference in Cambridge in December 2005 Cultural history is a relatively new sub discipline Over the past few decades it has become increasingly apparent that a new generation of historians has emerged These scholars have become concerned with research sources and questions traditionally beyond the scope of the discipline of history Indeed recent monographs in history have demonstrated a growing awareness of the cultural imagination in analyses of patterns of change and continuity in the past Such a movement has also encouraged the development of new networks between different disciplines in the Arts and Social Sciences The authors of these chapters come from a wide range of academic backgrounds While all are concerned with crucial issues of the past they represent a substantial variety of disciplines In addition to the historians are those trained and working in literary studies art history design music and science As early career scholars the research they present is cutting edge these contributions represent the very latest trends in cultural studies and demonstrate the attempts of new researchers to answer the most current and challenging questions that are being proposed in this field

Case Studies in Architecture and Landscape Jan Woudstra, Xiang Ren, 2025-09-11 The architect historian and critic Peter Blundell Jones 1949 2016 considered architecture as an expansive field within the arts and humanities and social sciences that included landscape and urban studies His focus within this built environment was firmly on people and place which to him meant developing a comprehension of the broad human material and social engagements with specific localities His favourite way to explore this human and environmental focus was through case studies of individual places leading to a modus operandi to tackle the study of any place in a generous rigorous and comprehensive manner that used the skills of related professions of the sciences as well as of psychology and anthropology Being able to adopt such interdisciplinarity determined the real value of his output which was further enriched through the thick interpretation of placemaking in non Western cultures This book celebrating the East West Studies in Architecture and Landscape at the University of Sheffield co founded by Peter Blundell Jones in 1995 presents 16 distinctive case studies in order to underline the relevance of his case study methodology and global legacy It is intended to have relevance for a range of disciplines including the design ones of architecture landscape and urban design and planning as well as anthropology history geography and cultural studies

Planning for Tall Buildings Michael Short, 2012-11-12 In a time of recession the challenge of building and planning for tall buildings has become even more complex the economics of development legislative and planning frameworks and the local politics of development must be navigated by those wishing to design and construct new tall buildings which fit within the fabric of their host cities This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities It is divided into two main parts In part one the relationship between tall buildings and planning is outlined followed by an exploration of the

impacts that construction of tall buildings can have It focuses in particular on the conservation debates that proposals for new tall buildings raise The first part ends with an analysis of the way in which planning strategies have evolved to deal with the unique consequences of tall buildings on their urban locations The second part of the book focuses on seven examples of medium sized cities dealing with planning and conservation issues and implications that arise from tall buildings These have been chosen to reflect a wide range of methods to either encourage or to control tall buildings that cities are deploying The case studies come from across the western world covering England Manchester Liverpool Newcastle and Birmingham Norway Oslo Ireland Dublin and Canada Vancouver and represent a broad spectrum of approaches to dealing with this issue In drawing together the experiences of these varied cities the book contributes to the ongoing debate about the role of the tall building in our cities their potential impacts and experiences of those who use and inhabit them The conclusions outline how cities should approach the strategic planning of tall buildings as well as how they should deal with the consequences of individual buildings particularly on the built heritage

Stephenson Bell Projects Ken Powell, Kenneth Powell, 2001 The first major monograph about Stephenson Bell Architects the genuinely innovative award winning Manchester based practice Ken Powell the respected architectural critic and writer explores their career and design philosophy in an introductory essay supported by a project by project full colour photographic section Each project contains a description of the building the brief the design challenge and the solution Stephenson Bell Projects is the first major monograph about Stephenson Bell Architects the genuinely innovative highly distinctive Manchester based practice Their work has set the trend in the transformation of Manchester from a neglected post industrial backwater into a young vibrant city of international standing Stephenson Bell s work is clean beautifully detailed and subtly modulated to its context Theirs is what Paul Finch in his foreword describes as an architecture of synthesis reflecting an attitude of respect and admiration for the historical physical and psychological context of the city working with rather than against what exists to create sympathetic contemporary designs New offices such as Trinity Court and Eastgate and loft conversions such as the Smithfield Buildings have marked Stephenson Bell out as one the leading practitioners of regeneration architecture They have won countless awards most recently an RIBA Award for Deansgate Quay which also won a 2001 Housing Design Award along with two other Stephenson Bell schemes Also in 2001 Roger Stephenson has been awarded an OBE for services to architecture Written by Kenneth Powell the respected architectural critic and writer this book explores Roger Stephenson s and Jeff Bell s careers and design philosophy and is supported by a project by project full colour photographic section Each project contains a description of the building the brief the design challenge and the solution and will be of interest to practising architects students and the general public

Modern Architecture in Europe Dennis J. De Witt, Elizabeth R. De Witt, 1987

The Rule of Freedom Patrick Joyce, 2020-05-05 The liberal governance of the nineteenth century state and city depended on the rule of freedom As a form of rule it relied on the production of certain kinds of citizens and patterns of social life which in turn depended on transforming both the material form of the city its layout architecture infrastructure and the ways it was inhabited and imagined by its leaders citizens and custodians Focusing mainly on London and Manchester but with reference also to Glasgow Dublin Paris Vienna colonial India and even contemporary Los Angeles Patrick Joyce creatively and originally develops Foucauldian approaches to historiography to reflect on the nature of modern liberal society His consideration of such artifacts as maps and censuses sewers and markets public libraries and parks and of civic governments and city planning are intertwined with theoretical interpretations to examine both the impersonal often invisible forms of social direction and control built into the infrastructure of modern life and the ways in which these mechanisms shape cultural and social life and engender popular resistance

, **Sitte, Hegemann and the Metropolis** Charles Bohl, Jean-François Lejeune, 2009-06-02 These essays from leading names in the field weave together the parallels and differences between the past and present of civic art Offering prospects for the first decades of the twenty first century the authors open up a broad international dialogue on civic art which relates historical practice to the contemporary meaning of civic art and its application to community building within today s multi cultural modern cities The volume brings together the rich perspectives on the thought practice and influence of leading figures from the great era of civic art that began in the nineteenth century and blossomed in the early twentieth century as documented in the works of Werner Hegemann and his contemporaries and considered fundamental to contemporary practice
