Government,2017-04-26 These two volumes constitute a record of the technical administrative and policy making activities of

the Los Alamos Project Project Y from its inception under the Manhattan District through the development of the atomic

bomb Vol I and during the period following the end of World War II until the Manhattan District relinquished control to the

Atomic Energy Commission as of January 1947 Vol II Project Y the Los Alamos Project has been one of a group of organizations known collectively as the Development of Substitute Materials project DSM devoted to the wartime development of the atomic bomb This branch of the DSM organization was created early in the year 1943 During the period of its existence it has been the center of activities connected with bomb development and production as distinguished from the development and production of nuclear explosive materials The history of all DSM activities possesses a peculiar interest and importance not only because of the remarkable achievements and potentialities of nuclear technology but also because of the wartime character and motivation of its initial development Because of its large social cost a scrupulous accounting of the entire venture is required Project Y has been of itself small compared to the other DSM projects It has however occupied a crucial position The wartime success of the entire undertaking has depended upon its success The nature of the present chronicle of Los Alamos is thus determined by the requirement that there exist a careful accounting of its technical administrative and policy making activities This document is a record not an interpretation of events Within the limitations thus implied however it has not been forgotten that the events recorded have taken place within a wider context the evolution of organized scientific research and of world technology The problems of organization and policy that lie here sharpened by the advent of control over nuclear energies will call for the most searching interpretation and analysis It is hoped that in this record of fact nothing has been omitted or slighted that may be of interest to those who seek light upon questions still to be answered
