Comprehensive and up to date synthesis of all aspects of mantle convection for advanced students and researchers

Dynamics of Plate Tectonics and Mantle Convection Joao C. Duarte, 2023-02-10 Dynamics of Plate Tectonics and Mantle Convection written by specialists in the field gathers state of the art perspectives on the dynamics of plate tectonics and mantle convection Plate tectonics is a unifying theory of solid Earth sciences In its initial form it was a kinematic theory that described how the planet s surface is fragmented into several rigid lithospheric plates that move in relation to each other over the less viscous asthenosphere Plate tectonics soon evolved to describe the forces that drive and resist plate movements The Earth sciences community is now developing a new perspective that looks at plate tectonics and mantle convection as part of a single system Why does our planet have plate tectonics and how does it work How does mantle convection drive the supercontinent cycle How have tectono convective modes evolved over the Earth s history How did they shape the planet and impact life Do other planets have mantle convection and tectonics These are some of the fascinating questions explored in this book This book started with a challenge from the editor to the authors to provide perspectives from their vantage point and open the curtain to the endeavors and stories behind the science Provides diverse perspectives from different experts around the world in plate tectonics and geodynamics Includes the most up to date knowledge on plate tectonics and mantle convection Sets the scene for the developments and challenges likely to be faced by researchers in the future of geodynamics

Physics and Chemistry of the Earth's Interior Alok Krishna Gupta, 2011-10-06 The Indian National Science Academy was established in January 1935 with the objective of promoting science in India and harnessing scientific knowledge for the cause of humanity and national welfare In 1968 it was designated as the adhering organisation in India to the International Council for Scientific Union ICSU on behalf of the Government of India Over the years the Academy has published a number of journals volumes biographical memoirs etc The year 2009 2010 will be specially celebrated to mark the Platinum Jubilee of the Academy Many programmes are planned in different centres in India on this occasion In addition the Academy has decided to publish a number of special volumes on

different subjects ranging from earth sciences to life sciences This volume is on Physics and Chemistry of the Earth's Interior One of the main objectives of geophysicists is to establish the internal structure of the earth as revealed by seismic tomography It is also their primary goal to correlate geophysical data to reveal thermal and chemical state of the crust mantle and core of the earth In order to interpret seismic velocities and associated density and elastic properties in terms of mineralogical and petrological models of the earth's interior thermodynamic and high pressure temperature data from mineral physics are essential With the advent of different types of multi anvil and laser heated diamond anvil equipment it is now possible to simulate conditions prevalent even in the lower mantle and core of the earth
