Sustainability is going mainstream but where did the story start For decades the traditional capitalist business model required growth at all costs Business as usual guaranteed unsustainability Now in contrast we see growing adoption of greener practices but where did these ideas come from and where are the linked movements headed Drawing on a half century of experience since the early seventies Godfather of Sustainability John Elkington explains how a series of societal pressure waves have helped to transform business markets and ultimately capitalism He explains how he came to tickle the human sharks of the corporate world encouraging them to embrace once unthinkable ways of addressing new social economic environmental and governance priorities John's candid memoir tracks his colorful journey through youthful misadventures and inspirations to his pioneering work making business sense of sustainability Written in a knowledgeable thoughtful and humorous voice this witness statement explains and criticizes progress to date before sketching a manifesto for those determined to make the global economy more responsible more resilient and crucially more regenerative

Consumerism in Twentieth-Century Britain Matthew Hilton, 2003-11-13 This book is the first comprehensive history of consumerism as an organised social and political movement Matthew Hilton offers a groundbreaking account of consumer movements ideologies and organisations in twentieth century Britain He argues that in organisations such as the Co-operative movement and the Consumers Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing accounts of twentieth century history He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self-interested actions of employers and trade unions Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations

Prosperity for All Matthew Hilton, 2011-05-02 The history of consumerism is about much more than just shopping Ever since the eighteenth century citizen consumers have protested against the abuses of the market by boycotting products and promoting fair instead of free trade In recent decades consumer activism has responded to the challenges of affluence by helping to guide consumers through an increasingly complex and alien marketplace In doing so it has challenged the very meaning of consumer society and tackled some of the key economic social and political issues associated with the era of globalization In *Prosperity for All* the first international history of consumer activism Matthew Hilton shows that modern consumer advocacy reached the peak of its influence in the decades after World War II Growing out of the product testing activities of Consumer Reports and its international counterparts including Which in the United Kingdom Que Choisir in France and Test in Germany consumerism evolved into a truly global social movement Consumer unions NGOs and individual activists like Ralph Nader emerged in countries around the world including developing countries in Southeast Asia and Latin America concerned with creating a more equitable marketplace and articulating a politics of consumption that addressed the needs of both individuals and society as a whole Consumer activists achieved many victories from making cars safer to highlighting the dangers of using baby formula instead of breast milk in countries with no access to clean water The 1980s saw a reversal in the consumer movement's fortunes thanks in large part to the rise of an antiregulatory agenda both in the United States and internationally In the process the definition of consumerism changed focusing more on choice than on access As Hilton shows this change reflects more broadly on the dilemmas we all face as consumers Do we want more stuff and more prosperity for ourselves or do we want others less fortunate to be able to enjoy the same opportunities and standard of living that we do *Prosperity for All* makes clear that by abandoning a more idealistic vision for consumer society we reduce consumers to little more than shoppers and we deny the vast majority of the world's population the fruits of affluence

electronic version has been made available under a Creative Commons BY NC ND open access license The structure and regulation of consumption and demand has recently become of great interest to sociologists and economists alike and at the same time there is growing interest in trying to understand the patterns and drivers of technological innovation This book brings together a range of sociologists and economists to study the role of demand and consumption in the innovative process The book starts with a broad conceptual overview of ways that the sociological and economics literatures address issues of innovation demand and consumption It goes on to offer different approaches to the economics of demand and innovation through an evolutionary framework before reviewing how consumption fits into evolutionary models of economic development Food consumption is then looked at as an example of innovation by demand including an examination of the dynamic nature of socially constituted consumption routines The book includes a number of illuminating case studies

including an analysis of how black Americans use consumption to express collective identity and a number of demand innovation relationships within matrices or chains of producers and users or other actors including service industries such as security and the environmental performance of companies The involvement of consumers in innovation is looked at including an analysis of how consumer needs may be incorporated in the design of high tech products The final chapter argues for the need to build an economic sociology of demand that goes from micro individual through to macro structural features

Rethinking Public Relations Dr Kevin Moloney, 2002-09-11 PR is a 2 3 billion UK industry with up to 50 000 jobs a poor reputation and yet a pervasive influence on politics and markets Historically it has been mostly weak propaganda and market boosterism yet it escapes sustained academic scrutiny This topical book analyzes all aspects of public relations challenging accepted views and examining the industry s position as a whole The author argues that PR needs reform because it will not go away and because it continues to grow Incorporating the latest facts and figures this analysis for advanced students of business and PR provides a fresh approach to a significant contemporary subject
