Mediaeval England A New Edition Of Barna:

England's Other Countrymen Onyeka Nubia, 2019-06-15 The Tudor period remains a source of timeless fascination with endless novels TV programmes and films depicting the period in myriad ways And yet our image of the Tudor era remains overwhelmingly white This ground breaking and provocative new book seeks to redress the balance revealing not only how black presence in Tudor England was far greater than has previously been recognised but that Tudor conceptions of race were far more complex than we have been led to believe Onyeka Nubia s original research shows that Tudors from many walks of life regularly interacted with people of African descent both at home and abroad revealing a genuine pragmatism towards race and acceptance of difference Nubia also rejects the influence of the Curse of Ham myth on Tudor thinking persuasively arguing that many of the ideas associated with modern racism are in fact relatively recent developments England s Other Countrymen is a bravura and eloquent forgotten history of diversity and cultural exchange and casts a new light on our own attitudes towards race

Experiencing God in Late Medieval and Early Modern England David J. Davis, 2022-06-02 Experiencing God in Late Medieval and Early Modern England demonstrates that experiences of divine revelation both biblical and contemporary were central to late medieval and early modern English religion The book sheds light on previously under explored notions about divine revelation and the role these notions played in shaping large portions of English thought and belief Bringing together a wide variety of source materials from contemplative works and accounts of revelatory experiences to biblical commentaries devotionals and religious imagery David J Davis argues that in the period there was a collective representation of divine revelation as a source of human knowledge which transcended other religious and

intellectual divisions Not only did most people think that divine revelation through a ravishing encounter with God was possible but also divine revelation was understood to be the pinnacle of religious experience and a source of pure understanding The book highlights a common discourse running through the sources that underpinned this collective representation of how human beings experienced the divine and it demonstrates a continual effort across large swathes of English religion to prepare an individual's soul for an encounter with the divine through different spiritual disciplines and devotional practices Over a period of several centuries this discourse and the larger culture of revelation provided an essential structure and legitimacy both to contemporary claims of divine revelation and the biblical precedents that contemporary experiences were modelled after This discourse detailed the physical metaphysical and epistemological features of how a human being was understood to experience divine revelation providing a means to delimit and define what happened when an individual was raptured by God Finally the book situates the experience of revelation within the wider context of knowledge and identifies the ways that claims to divine revelation were legitimated as well as stigmatized based on this common understanding of the experience of rapture

Representing Beasts in Early Medieval England and Scandinavia Michael D. J. Bintley, Thomas J. T. Williams, 2015 Essays on the depiction of animals birds and insects in early medieval material culture from texts to carvings to the landscape itself For people in the early Middle Ages the earth air water and ether teemed with other beings Some of these were sentient creatures that swam flew slithered or stalked through the same environments inhabited by their human contemporaries Others were objects that a modern beholder would be unlikely to think of as living things but could yet be considered to possess a vitality that rendered them potent Still others were things half glimpsed on a dark night or seen only in the mind's eye strange beasts that haunted dreams and visions or inhabited exotic lands beyond the compass of everyday knowledge This book discusses the various ways in which the early English and Scandinavians thought about and represented these other inhabitants of their world and considers the multifaceted nature of the relationship between people and beasts Drawing on the evidence of material culture art language literature place names and landscapes the studies presented here reveal a world where the boundaries between humans animals monsters and objects were blurred and often permeable and where to represent the bestial could be to hold a mirror to the self Michael D J Bintley is Senior Lecturer in Medieval Literature at Canterbury Christ Church University Thomas J T Williams is a doctoral researcher at UCL's Institute of Archaeology Contributors No 1 Adams John Baker Michael D J Bintley Sue Brunning L szl S ndor Chardonnens Della Hooke Eric Lacey Richard North Marijane Osborn Victoria Symons Thomas J Williams
