Medieval Castles Of Ireland:

Medieval Castles of Ireland David Sweetman, P. David Sweetman, 1999 This book traces the development of the Irish medieval castle from 1169 onwards drawing on the research and records of the Archaeological Survey **The Medieval Castle in Ireland and Wales** John R. Kenyon, Kieran Denis O'Connor, 2003 This book contains essays originating from the 1998 Castle Studies Group Conference held in Maynooth county Kildare Ireland The book has been brought together specifically to advance research on castles and fortifications in Ireland and Wales **Castles in Ireland** T.E. McNeill, 2005-08-18 The castles of Ireland are an essential part of the story of medieval Europe but were until recently a subject neglected by scholars Dr McNeill weaves the evidence from the castles into the story of lordship and power in medieval Eire **Castles in Medieval Society** Charles Coulson, 2003 In this challenging new book Charles Coulson overturns many of the traditional assumptions about the nature and purpose of castle building in the middle ages He demolishes the traditional belief that castles were overwhelmingly military in their function showing how this was simply one aspect of a more complicated whole He sets out to recreate the medieval understanding of castles as symbolically fortified places of all kinds from ancient walled post Roman towns and prestigious religious enclaves to transitory campaign forts Going back to the original sources Dr Coulson proposes a new and more subtle understanding of the function and symbolism of castles as well as vivid insights into the lives of the people who inhabited them Fortresses were only occasionally caught up in war but constantly were central to the ordinary life of all classes of the nobility and gentry of widows and heiresses of prelates and clergy of peasantry and townspeople alike Castles in Medieval Society presents and explores this broad social panorama Castles in Ireland T. McNeill, **Anglo-Norman Studies XXIII** John Gillingham, 2001 This annual publication covers not only matters relating to pre and post Conquest England and France but also the activities and influences of the Normans on the wider European Mediterranean and Middle Eastern stage *Ireland's Heritages* Mark McCarthy, 2017-09-29 This book is the first sustained attempt to incorporate critical scholarship and thought at the cutting edge of contemporary geography history and archaeology into the burgeoning field of Irish heritage studies It seeks to illustrate the validity of multiple depictions of the Irish past showing how scrutiny of heritage practices and meanings is so essential for illuminating our understanding of the present Examining Ireland's heritages from a critical perspective that celebrates notions of heterogeneity and uniqueness the distinguished contributors to this book scrutinise the multiplicity of complex relations between heritage history memory commemoration economy and cultural identity within various historical geographical and archaeological contexts Using several examples and case studies this book raises issues not only from a uniquely Irish perspective but also investigates the memorialisation and marketing of the Irish past in overseas locations such as the USA and Australia *The Castles of Britain and Ireland* Rodney Castleden, 2014-08-19 To many medieval castles are the essence of Britain and Ireland's fascinating past Immersed in history and centuries old each one tells a story of Kings

Queens and feuding lords war and bloody conflict treason revenge and murder In *Castles of Britain and Ireland* Rodney Castleden weaves a fascinating and detailed narrative of 115 of the grandest and most historically significant castles in the British Isles including Balmoral in Scotland Bunratty in Ireland Caernarfon in Wales and St Michael's Mount in England As well as the details of the construction function and often the destruction of these magnificent buildings each chapter also tells the human stories behind these ancient walls with fascinating details of everyday life within

Castles of the Celtic Lands Rodney Castleden, 2006 This beautifully photographed book celebrates 60 of the grandest and most historically significant castles

Anglo-Norman Castles Robert Liddiard, 2003 Wide ranging studies offer an in depth analysis of castle building 11th 12th centuries and place castles within their broader social and political context The castles of the eleventh and twelfth centuries remain among the most visible symbols of the Anglo Norman world This collection brings together for the first time some of the most significant articles in castle studies with contributions from experts in history archaeology and historic buildings Castles remain a controversial topic of academic debate and here equal weight is given to seminal articles that have defined the study of the subject while at the same time emphasising newer approaches to the fortresses of the Anglo Norman aristocracy The studies in this volume range from discussions of the residential and military role of the castle to architectural symbolism and royal attitudes to baronial fortification The result is a survey that offers an in depth analysis of castle building during the eleventh and twelfth centuries but which also places Anglo Norman castles within their broader social architectural and political context
