The Medieval Health Handbook Luisa Cogliati Arano,1976 **Tacuinum Sanitatis** Alixe Bovey,2005 This book is a complete catalogue and commentary on a remarkable series of 130 colored drawings executed in North Italy almost certainly Padua in the 1450s by a group of artists in the circle of Andrea Mantegna The drawings illustrate subjects from the Tacuinum Sanitatis or Table of Health Subjects touched on include medicine sport farming animal husbandry natural history shopping cooking and manufacturing constituting an extraordinary record of everyday life and life style in early Renaissance Italy This manuscript is one of four known series of the kind and the only one not published Visualizing Medieval Medicine and Natural History, 1200–1550 Jean A. Givens,Karen M. Reeds,Alain Touwaide,2016-12-05 Images in medieval and early modern treatises on medicine pharmacy and natural history often confound our expectations about the functions of medical and scientific illustrations They do not look very much like the things they purport to portray and their actual usefulness in everyday medical practice or teaching is not obvious By looking at works as diverse as herbals jewellery surgery manuals lay health guides cinquecento paintings manuscripts of Pliny s Natural History and Leonardo s notebooks Visualizing Medieval Medicine and Natural History 1200 1550 addresses fundamental questions about the interplay of art and science from the thirteenth to the mid sixteenth century What counts as a medical illustration in the Middle Ages What are the purposes and audiences of the illustrations in medieval medical pharmaceutical and natural history texts How are images used to clarify expand authenticate and replace these texts How do images of natural objects observed phenomena and theoretical concepts amplify texts and convey complex cultural attitudes What features lead us to regard some of these images as typically medieval while other exactly contemporary images strike us as Renaissance or early modern in character Art historians medical historians historians of science and specialists in manuscripts and early printed books will welcome this wide ranging interdisciplinary examination of the role of visualization in early scientific inquiry **Medieval Herbals** Minta Collins,2000-01-01 Collins shows how the principal herbal traditions of Classical descent were replaced by a new observation of nature that itself paved the way for the magnificent paintings of later French and Italian herbals **Bodily and Spiritual Hygiene in Medieval and Early Modern Literature** Albrecht Classen,2017-03-20 While most people today take hygiene and medicine for granted they both have had their own history We can gain deep insights into the pre modern world by studying its health care system its approaches to medicine and concept of hygiene Already the early Middle Ages witnessed great interest in bathing hot and cold swimming and good personal hygiene Medical activities grew over time but even early medieval monks were already great experts in treating the sick The contributions examine literary medical historical texts and images and probe the information we can glean from them The interdisciplinary approach of this volume makes it

possible to view this large field in a complex and diversified manner taking into account both early medieval and early modern treatises on medicine water bathing and health Such a cultural historical perspective creates a most valuable bridge connecting literary and scientific documents under the umbrella of the history of mentality and history of everyday life The volume does not aim at idealizing the past but it definitely intends to deconstruct modern myths about the dirty and unhealthy Middle Ages and early modern age

The Viandier of Taillevent Taillevent, 1988 The Viandier is the most important early recipe collection of mediaeval France Written in the fourteenth century by Guillaume Tirel alias Taillevent the chief cook of King Charles V of France it is the starting point of many culinary traditions and practices that remain at the base of modern French haute cuisine This volume is the first to present all four extant manuscripts of the Viandier arranged in parallel for easy comparison The texts of the 220 recipes are in the original French but a complete English translation is provided Of particular interest are the differences between the four manuscripts which represent more than a century of modifications in gastronomic tastes and culinary practices in French seigneurial life The commentary and notes that accompany the texts trace the significance of these modifications and indicate the influence the Viandier exercised on more recent cookery books throughout Europe This critical edition also includes a glossary and a bibliography In addition selected recipes have been adapted with minimal modifications for modern use and arranged in a menu for six people Page 4 of cover
