

A medieval manuscript illustration depicting a battle scene. In the foreground, two horses are shown: one with a red and green patterned head covering and the other with a blue and white patterned head covering. Behind them, knights in armor are visible, including one with a red and white patterned surcoat and another with a blue and white patterned surcoat. A sword is raised in the background. The scene is set against a blue background with white cross symbols.

Medieval Warhorse From Byzantium To The:

The Medieval Warhorse Ann Hyland, 1996 Little specialized attention has previously been paid to horses in the medieval period When it has it has usually been limited to a very narrow time span and has dealt mainly with animals used by the upper classes and even more narrowly the heavy warhorse or destrier Medieval Warhorse Ann Hyland, 1996-10-27 A textbook on the history of the warhorse looking at its importance and how its role changed Medieval Warhorse: From Byzantium To The Crusades Ann Hyland, 1996 Knights and Warhorses Andrew Ayton, 1999 Dr Ayton has transformed understanding of Edward III's armies compulsory reading for anyone interested in the Hundred Years War WAR IN HISTORY Michael Prestwich The mounted armoured knight is one of the most potent symbols of medieval civilisation indeed for much of the middle ages the armoured warhorse was what defined a man as a member of the military class However despite the status of the knightly warrior in medieval society the military service of the later medieval English aristocracy remains an unaccountably neglected subject and the warhorse itself has never attracted a major study based upon archival sources This book seeks to open up new fields of research it focuses on the horse inventories documents which offer detailed lists of men at arms and their appraised warhorses the valuation of which is a measure of its owner's social and military status Dr Ayton is primarily concerned with the inventories and related records for Edward III's reign a period which witnessed significant changes in the organisation of the English fighting machine The documents produced during this period of military revolution cast valuable light on the character and attitudes of the aristocratic military community at a time when its traditional role was in the course of re-evaluation Dr ANDREW AYTON is senior lecturer in history at the University of Hull *Medieval Warfare 1000-1300* John France, 2017-05-15 The study of medieval warfare has developed enormously in recent years The figure of the armoured mounted knight who was believed to have materialized in Carolingian times long dominated all discussion of the subject It is now understood that the knight emerged over a long period of time and that he was never alone on the field of conflict Infantry at all times played a substantial role in conflict and the notion that they were in some way invented only in the fourteenth century is no longer sustainable Moreover modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles As a result we now understand the pattern of medieval war which often did not depend on battle but on exerting pressure on the opponent by economic warfare This pattern was intensified by the existence of castles and careful study has revealed much about their development and the evolving means of attacking them Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods New areas of study are now developing The logistics of medieval armies was always badly neglected while until very recently there was a silence on the victims of war Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in context by an introductory essay *Journal of Medieval Military History* Clifford J. Rogers, Kelly DeVries, John

France, 2014-06-19 Highlights the range and richness of scholarship on medieval warfare military institutions and cultures of conflict that characterize the field History 95 2010 The latest collection of the most up to date research on matters of medieval military history contains a remarkable geographical range extending from Spain and Britain to the southern steppe lands by way of Scandinavia Byzantium and the Crusader States At one end of the timescale is a study of population in the later Roman Empire and at the other the Hundred Years War touching on every century in between Topics include the hardware of war the social origins of soldiers considerations of individual battles and words for weapons in Old Norse literature Contributors Bernard S Bachrach Gary Baker Michael Ehrlich Nicholas A Gribit Nicolaos S Kanellopoulos Mollie M Madden Kenneth J McMullen Craig M Nakashian Mamuka Tsurtssumia Andrew L J Villalon An Environmental History of the Middle Ages John Aberth, 2013 The Middle Ages was a critical and formative time for Western approaches to our natural surroundings eeAn Environmental History of the Middle Ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period Humankind's relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late Middle Ages With the advent of shattering events such as the Great Famine and the Black Death considered efflorescences of the climate downturn known as the Little Ice Age that is comparable to our present global warming predicament medieval people began to think of and relate to their natural environment in new and more nuanced ways They now were made to be acutely aware of the consequences of human impacts upon the environment anticipating the cyclical new ecology approach of the modern world Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe John Aberth focuses his study on three key areas the natural elements of air water and earth the forest and wild and domestic animals Through this multi faceted lens An Environmental History of the Middle Ages sheds fascinating new light on the medieval environmental mindset It will be essential reading for students scholars and all those interested in the Middle Ages **Medieval Identity Machines** Jeffrey Jerome Cohen, 2003 **Practical Horsemanship in Medieval Arthurian Romance** Anastasija Ropa, 2019-12-31 The figure of a knight on horseback is the emblem of medieval chivalry Much has been written on the ideology and practicalities of knighthood as portrayed in medieval romance especially Arthurian romance and it is surprising that so little attention was hitherto granted to the knight's closest companion the horse This study examines the horse as a social indicator as the knight's animal alter ego in his spiritual peregrinations and earthly adventures the ups and downs of chivalric adventure as well as the relations between the lady and her palfrey in romance Both medieval authors and their audiences knew more about the symbolism and practice of horsemanship than most readers do today By providing the background to the descriptions of horses and horsemanship in Arthurian romance this study deepens the readers appreciation of these texts At the same time critical reading of romance supplies information about the ideology and daily practice of horsemanship in the Middle Ages

Echoing Hooves: Studies on Horses and Their Effects on Medieval Societies ,2022-07-04 Saying that horses shaped the medieval world and the way we see it today is hardly an exaggeration Why else do we imagine a medieval knight or a nomadic warrior on horseback Why do we use such metaphors as unbridled or bearing a yoke in our daily language Studies of medieval horses and horsemanship are increasingly popular but they often focus on a single aspect of equestrianism or a single culture In this book you will find information about both elite and humble working equines about the ideology and practicalities of medieval horsemanship across different countries from Iceland to China Contributors are Gloria Allaire Luise Borek Gail Brownrigg Agn s Carayon Gavina Cherchi John C Ford Lo s Forster J rg Gassmann Rebecca Henderson Anna Lena Lange Romain Lefebvre Rena Maguire Ana Maria S A Rodrigues and Alexia Foteini Stamouli
