Fashion and Its Social Agendas Diana Crane,2012-06-12 It has long been said that clothes make the man or woman but is it still true today If so how has the information clothes convey changed over the years Using a wide range of historical and contemporary materials Diana Crane demonstrates how the social significance of clothing has been transformed Crane compares nineteenth century societies France and the United States where social class was the most salient aspect of social identity signified in clothing with late twentieth century America where lifestyle gender sexual orientation age and ethnicity are more meaningful to individuals in constructing their wardrobes Today clothes worn at work signify social class but leisure clothes convey meanings ranging from trite to political In today s multicode societies clothes inhibit as well as facilitate communication between highly fragmented social groups Crane extends her comparison by showing how nineteenth century French designers created fashions that suited lifestyles of Paris elites but that were also widely adopted outside France By contrast today s designers operate in a global marketplace shaped by television film and popular music No longer confined to elites trendsetters are drawn from many social groups and most trends have short trajectories To assess the impact of fashion on women Crane uses voices of college aged and middle aged women who took part in focus groups These discussions yield fascinating information about women s perceptions of female
