Ironclads in Action Herbert Wrigley Wilson,1896 **Suspect Relations** Kirsten Fischer,2002 Over the course of the eighteenth century race came to seem as corporeal as sex Kirsten Fischer has mined unpublished court records and travel literature from colonial North Carolina to reveal how early notions of racial difference were shaped by illicit sexual relationships and the sanctions imposed on those who conducted them Fischer shows how the personal and yet often very public sexual lives of Native American African American and European American women and men contributed to the new racial order in this developing slave society Liaisons between European men and native women among white and black servants and between servants and masters as well as sexual slander among whites and acts of sexualized violence against slaves were debated denied and recorded in the courtrooms of colonial North Carolina Indentured servants slaves Cherokee and Catawba women and other members of less privileged groups sometimes resisted colonial norms making sexual choices that irritated neighbors juries and magistrates and resulted in legal penalties and other acts of retribution The sexual practices of ordinary people vividly bring to light the little known but significant ways in which notions of racial difference were alternately contested and affirmed before the American Revolution Fischer makes an innovative contribution to the history of race class and gender in early America by uncovering a detailed record of illicit sexual exchanges in colonial North Carolina and showing how acts of resistance to sexual rules complicated ideas about inherent racial difference **Mosquito Empires** J. Inside the Great House Daniel Blake Smith,2018-05-31 Inside the Great House explores the nature of family life and kinship in planter households of the Chesapeake during the eighteenth century a pivotal era in the history of the American family Drawing on a wide assortment of personal documents among them wills inventories diaries family letters memoirs and autobiographies as well as on the insights of such disciplines as psychology demography and anthropology Daniel Blake

Smith examines family values and behavior in a plantation society Focusing on the emotional texture of the household he probes deeply into personal values and relationships within the family and the surrounding circle of kin Childrearing practices male female relationships attitudes toward courtship and marriage father son ties the character and influence of kinship familial responses to illness and death and the importance of inheritance all receive extended treatment A striking pattern of change emerges from this mosaic of life in the colonial South What had once been a patriarchal authoritarian and emotionally restrained family environment altered profoundly during the latter half of the eighteenth century The personal documents cited by Smith clearly point to the development after 1750 of a more intimate child centered family life characterized by close emotional bonds and by growing autonomy especially for sons in matters of marriage and career choice Well to do planter families inculcated in their children a strong measure of selfconfidence and independence as well as an abiding affection for their family society Smith shows that Americans in the North as well as in the South were developing an altered view of the family and the world beyond it a perspective which emphasized a warm and autonomous existence This fascinating study will convince its readers that the history of the American family is intimately connected with the dramatic changes in the lives of these planter families of the eighteenth century Chesapeake
