Napoleon III and the Concert of Europe William E. Echard,1960 **Napoleon III and the Concert of Europe**
William E. Echard,1983-01-01 **Napoleon III and the Concert of Europe** William E. Echard,1983-01-01 **Napoleon III and the Concert of Europe** William Earl Echard,1960 *Mexico and the Foreign Policy of Napoleon III* M. Cunningham,2001-04-16 Napoleon III s motives for intervening in Mexico in the 1860s were consistent with his foreign policy which was based on his belief that free trade was the best foundation for peace He saw the establishment of a friendly government in Mexico as an opportunity to expand that policy to encompass the world by ensuring European access to American markets and preventing monopoly by the United States His attempts to achieve this however were thwarted by his representatives in Mexico and the suspicions of his neighbours The Politics of Imperial Memory in France, 1850-1900 Christina B. Carroll,2022-05-15 By highlighting the connections between domestic political struggles and overseas imperial structures The Politics of Imperial Memory in France 1850 1900 explains how and why French Republicans embraced colonial conquest as a central part of their political platform Christina B Carroll explores the meaning and value of empire in late nineteenth century France arguing that ongoing disputes about the French state s political organization intersected with racialized beliefs about European superiority over colonial others in French imperial thought For much of this period French writers and politicians did not always differentiate between continental and colonial empire By employing a range of sources from newspapers and pamphlets to textbooks and novels Carroll demonstrates that the memory of older continental imperial models shaped French understandings of and justifications for their new colonial empire She shows that the slow identification of the two types of empire emerged due to a politicized campaign led by colonial advocates who sought to defend overseas expansion against their opponents This new model of colonial empire was shaped by a complicated set of influences including political conflict the legacy of both Napoleons international competition racial science and French experiences in the colonies The Politics of Imperial Memory in France 1850 1900 skillfully weaves together knowledge from its wide ranging source base to articulate how the meaning and history of empire became deeply intertwined with the meaning and history of the French nation **The Making of the West, Combined Volume** Lynn Hunt,2012-01-04 Students of Western civilization need more than facts They need to understand the cross cultural global exchanges that shaped Western history to be able to draw connections between the social cultural political economic and intellectual happenings in a given era and to see the West not as a fixed region but a living evolving construct These needs have long been central to The Making of the West The book s chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context enabling students to witness the unfolding of Western history understand change over time and recognize fundamental relationships Read the preface

Peter H. Wilson,2017-11-22 The history of nineteenth century European warfare is framed by the end of the Napoleonic Wars in 1815 and the outbreak of the First World War in 1914 The Crimean War and the struggles for Italian and German unification divide this century in two In the first half armies struggled to emerge from the shadow of Napoleon amidst an era of financial retrenchment political unrest and accelerating technological change The mid century wars left an equally problematic legacy including aspects that pointed towards total war The 26 essays in this volume examine these changes from a variety of innovative and fresh perspectives *Theory and Practice in the History of European Expansion Overseas*

R. F. Holland,Andrew Porter,Ronald Robinson,2005-08-12 First Published in 1988 These essays have been written to mark the retirement of Ronald Robinson as Beit Professor of the History of the British Commonwealth at the University of Oxford The contributors have all at various times worked closely with Robbie as pupils colleagues and friends They offer this volume to him with their thanks and great affection both in recognition of his immense contribution to the revival and development of imperial or commonwealth history and in the conviction that he has still much to offer all scholars in the field

When Right Makes Might Stacie E. Goddard,2018-12-15 Why do great powers accommodate the rise of some challengers but contain and confront others even at the risk of war When Right Makes Might proposes that the ways in which a rising power legitimizes its expansionist aims significantly shapes great power responses Stacie E Goddard theorizes that when faced with a new challenger great powers will attempt to divine the challenger s intentions does it pose a revolutionary threat to the system or can it be incorporated into the existing international order Goddard departs from conventional theories of international relations by arguing that great powers come to understand a contender s intentions not only through objective capabilities or costly signals but by observing how a rising power justifies its behavior to its audience To understand the dynamics of rising powers then we must take seriously the role of legitimacy in international relations A rising power s ability to expand depends as much on its claims to right as it does on its growing might As a result When Right Makes Might poses significant questions for academics and policymakers alike Underpinning her argument on the oft ignored significance of public self presentation Goddard suggests that academics and others should recognize talk s critical role in the formation of grand strategy Unlike rationalist and realist theories that suggest rhetoric is mere window dressing for power When Right Makes Might argues that rhetoric fundamentally shapes the contours of grand strategy Legitimacy is

not marginal to international relations it is essential to the practice of power politics and rhetoric is central to that practice

Despite Nationalist Conflicts Kristen P. Williams, 2001-02-28 Williams explores the effectiveness of various types of responses and strategies available to states when faced with demands for territorial revisions She examines the situations surrounding the 19th century unification of Germany the breakup of Yugoslavia and the strife in Bosnia and Kosovo and the ongoing struggle over the fate of Kashmir The type of demand for territorial revisions she argues and the responses determine whether the outcome will be peace or war While states should deter those states or groups that are imperialist she points to the utility of pursuing a firm but flexible strategy toward those that are consolidationists This analysis will be of considerable value to scholars students and policy makers involved with issues of contemporary nationalism ethnic politics and international relations

Europe 1850-1914 Jonathan Sperber, 2014-01-14 This innovative survey of European history from the middle of the nineteenth century to the outbreak of the First World War tells the story of an era of outward tranquillity that was also a period of economic growth social transformation political contention and scientific and artistic innovation During these years the foundations of our present urban industrial society were laid the five Great Powers vied in peaceful and violent fashion for dominance in Europe and throughout the world and the darker forces that were to dominate the twentieth century violent nationalism totalitarianism racism ethnic cleansing began to make themselves felt Jonathan Sperber sets out developments in this period across the entire European continent from the Atlantic to the Urals from the Baltic to the Mediterranean To help students of European history grasp the main dynamics of the period he divides the book into three overlapping sections covering the periods from 1850 to 1871 1871 to 1890 and 1890 to 1914 In each period he identifies developments and tendencies that were common in varying degrees to the whole of Europe while also pointing the unique qualities of specific regions and individual countries Throughout his argument is supported by illustrative material tables charts case studies and other explanatory features and there is a detailed bibliography to help students to explore further in those areas that interest them

International Society and the Making of International Order Günther Auth, 2005 Theorising within the American discipline of International Relations has been plagued by a rather severe intellectual crisis Theorists have meant that they need to emulate the natural sciences of the eighteenth and nineteenth centuries in outlook and argumentative style But this has destroyed much awareness for the nature of modern international relations as a dynamically evolving historical process This book seeks to overcome the vicissitudes of mainstream theorising by abandoning the discipline's scientism and by adopting a stance that is more in tune with the standards of modern social science

The Letters of Richard Cobden: 1860-1865 Richard Cobden, 2007 The Letters of Richard Cobden 1804-1865 provides in four printed volumes the first critical edition of Cobden's letters publishing the complete text in as near the original form as possible The letters are accompanied by full scholarly apparatus together with an introduction to each volume which reassesses Cobden's importance in their light Together these volumes make available a unique source of the understanding of

British liberalism in its European and international contexts throwing new light on issues such as the repeal of the Corn Laws British radical movements the Crimean War the Indian Mutiny Anglo French relations and the American Civil War The fourth and final volume drawing on some forty six archives worldwide is dominated by Cobden s search for a permanent political legacy at home and abroad following the severe check to his health in the autumn of 1859 In January 1860 he succeeded in negotiating the Anglo French Commercial Treaty a landmark in Anglo French relations designed to bind the two nations closer together and to provide the basis for a Europe united by free trade Yet the Treaty s benefits were threatened by a continuing naval arms race between Britain and France fuelled by what Cobden saw as self interested scare mongering in his tract *The Three Panics* 1862 By 1862 an even bigger danger was the possibility that British industry s need for cotton might precipitate intervention in the American Civil War Much of Cobden s correspondence now centred on the necessity of non intervention and a campaign for the reform of international maritime law while he played a major part in attempts to alleviate the effects of the Cotton Famine in Lancashire In addition to Anglo American relations Cobden the International Man continued to monitor the exercise of British power around the globe He was convinced that the gunboat diplomacy of his prime antagonist Lord Palmerston was ultimately harmful to Britain whose welfare demanded limited military expenditure and the dismantling of the British colonial system Known for a long time as the prophet in the wilderness in 1864 Cobden welcomed Palmerston s inability to intervene in the Schleswig Holstein crisis as a key turning point in Britain s foreign policy which together with the imminent end of the American Civil War opened up the prospect of a new reform movement at home Disappointed with the growing apathy of the entrepreneurs he had once mobilised in the Anti Corn Law League Cobden now promoted the enfranchisement of the working classes as necessary and desirable in order to achieve the reform of the aristocratic state for which he had campaigned since the 1830s

Napoleon III James F. Mcmillan, 2014-06-06 In this assessment James McMillan moves away from ideologically based representations of the man to focus on his use of power He recognises the Emperor as a highly skilled operator who in the face of innumerable obstacles attempted to conduct an original policy

The Wars of German Unification Dennis Showalter, 2015-07-30 The Wars of German Unification is the definitive account of the three of the most decisive conflicts in the history of modern Europe In this new edition Dennis Showalter offers a thoroughly updated look at the wars and their context that will be invaluable for those interested in the military social and political history of the period Showalter explores how the Schleswig Holstein conflict of 1864 the Six Weeks War of 1866 and the Franco Prussian War of 1870 71 fundamentally altered the balance of power in 19th century Europe They marked the establishment of Prussian hegemony in central Europe the creation of the Bismarckian Reich in 1871 the reduction of Habsburg influence and the collapse of Napoleon III s Second Empire The Wars of German Unification offers a balanced and incisive account of the wars their origins and their consequences and firmly embeds these conflicts in their political ideological and military contexts This volume traces the transition from the cabinet wars of the 19th century

and shows how the conflicts that made up the wars of German unification provided the foundation for the birth of modern warfare *History of Modern Europe* VD Mahajan,1988 For Students of B A M A and also useful for competitive examinations **The Crimean War** Hugh Small,2018-03-19 The Crimean War was the most destructive conflict of Queen Victoria s reign the outcome of which was indecisive most historians regard it as an irrelevant and unnecessary conflict despite its fame for Florence Nightingale and the Charge of the Light Brigade Here Hugh Small shows how the history of the Crimean War has been manipulated to conceal Britain s and Europe s failure The war governments and early historians combined to withhold the truth from an already disappointed nation in a deception that lasted over a century Accounts of battles still widely believed gave fictitious leadership roles to senior officers Careful analysis of the fighting shows that most of Britain s military successes in the war were achieved by the common soldiers who understood tactics far better than the officer class and who acted usually without orders and often in contravention of them Hugh Small s mixture of politics and battlefield narrative identifies a turning point in history and raises disturbing questions about the utility of war
