The Voice of Business Karen S. Miller,2000-11-09 In 1933 John W Hill opened the New York office of what would become the most important public relations agency in history Hill Knowlton Inc By 1959 the combined sales of its clients which included Procter Gamble Texaco Gillette and Avco Manufacturing as well as the steel tobacco and aviation industries trade associations amounted to 10 percent of the gross national product The Voice of Business chronicles Hill Knowlton s influence on American public discourse in the years following World War II Guided by its founder s conservative ideals Hill Knowlton developed a twofold mission to influence public discussion about issues important to its clients and to educate Americans about big business Karen Miller shows how the agency tried to manipulate public opinion political debate and news media content about such issues as postwar military aircraft procurement the deregulation of margarine production President Truman s seizure of steel mills in 1952 and the cigarette health scare of 1953 54 Though its campaigns did not change many opinions she says Hill Knowlton affected the public indirectly by reinforcing the ideas of its clients and other conservatives

Welfare As We Knew It Charles Noble,1997-09-11 Compared to other rich Western democracies the U S does less to help its citizens adapt to the uncertainties of life in a market economy In *Welfare As We Knew It* Charles Noble offers a groundbreaking explanation of why America is so different Drawing on research in comparative politics history and sociology he demonstrates that deeply rooted political factors not public opinion have limited what reformers have been able to accomplish Rich historical analysis covering the Wilson administration to the present is followed by a provocative look at future U S social policy Reformers who want government to do more Noble argues must refocus their activities on political and institutional change such as campaign finance and labor law reform if they hope to succeed Taut comprehensive and accessible with a much needed international perspective this book will change the way we look at U S social policy

Great Transformations Mark Blyth,2002-09-16 This book picks up where Karl Polanyi s study of economic and political change left off Building upon Polanyi s conception of the double movement Blyth analyzes the two periods of deep seated institutional change that characterized the twentieth century the 1930s and the 1970s Blyth views both sets of changes as part of the same dynamic In the 1930s labor reacted against the exigencies of the market and demanded state action to mitigate the market s effects by embedding liberalism In the 1970s those who benefited least from such embedding institutions namely business reacted against these constraints and sought to overturn that institutional order Blyth demonstrates the critical role economic ideas played in making institutional change possible *Great Transformations* rethinks the relationship between uncertainty ideas and interests achieving profound new insights on how and under what conditions institutional change takes place

Big Business in America Thomas J. Dorich,2021-02-03 This study analyzes the influence of big business on the economic political and social structure of twentieth century America The

author examines the development of a mass production and consumption economy and argues that the corporation became a key institutional force in the United States Crucible of Freedom Eric Leif Davin, 2012-07-10 This book explores the relation between democracy and industrialization in United States history Over the course of the 1930s the political center almost disappeared as the Democratic New Deal became the litmus test of class with blue collar workers providing its bedrock of support while white collar workers and those in the upper income levels opposed it By 1948 the class cleavage in American politics was as pronounced as in many of the Western European countries such as France Italy Germany or Britain with which we usually associate class politics Working people created a new America in the 1930s and 1940s which was a fundamental departure from the feudalistic and hierarchical America that existed before They won the political rights of American citizenship which had been previously denied them They democratized labor capital relations and gained more economic security than they had ever known They obtained more economic opportunity for them and their children than they had ever known and they created a respect for ethnic workers which had not previously existed In the process class politics re defined the political agenda of America as for the first time in American history the political universe polarized along class lines Eric Leif Davin explores the meaning of the New Deal political mobilization by ordinary people by examining the changes it brought to the local county and state levels in Pittsburgh Allegheny County and Pennsylvania as a whole

Capital Gains Richard R. John, Kim Phillips-Fein, 2017 Appealing to historians working in the fields of business history political history and the history of capitalism Capital Gains highlights the causes character and consequences of business activism and underscores the centrality of business to any full understanding of the politics of the twentieth century and today

Making Republicans Liberal Kristoffer Smemo, 2024-08-20 Mass movements and social protest forced mid century Republicans to articulate their own form of liberalism As poor and working people organized themselves on the job in the streets and at the polls during the mid twentieth century they forced Republicans to reckon with new demands for political and social citizenship in big cities across the Northeast Midwest and Pacific Coast While rightwing Republicans mobilized to crush those movements Making Republicans Liberal explores how another wing of the party responded to intensifying mass movement pressure Beginning in the 1930s Republican governors such as Earl Warren of California George Romney of Michigan and Nelson Rockefeller of New York spent the next four decades articulating their own vision of liberalism These Republican liberals believed that strategically they could not win elections and govern in places where unions civil rights groups and other social movements organized voters What may have begun as an opportunistic strategy soon mutated into an ideological commitment to use state power to realize working people s demands for a greater say and stake in the decisions governing their lives Republican liberals accepted labor s right to organize legislated antidiscrimination laws and legalized abortion Yet at the same time each of those policies proved weaker than the alternatives supported by organized labor or mainline civil rights groups and paled in comparison to what people on strike

and on the march really wanted Kristoffer Smemo shows how this was the contradiction of Republican liberalism as a policy program and as an ideology The reforms it ushered in at once asked too much from core conservative Republican constituencies and offered too little to the movements struggling for change As the movements making Republicans compromise fragmented and collapsed in the late twentieth century so too did the material foundation for Republican liberalism

The Politics of National Capitalism James P. Brennan, Marcelo Rougier, 2015-08-26 In mid twentieth century Latin America there was a strong consensus between Left and Right Communists working under the directives of the Third International nationalists within the military interested in fostering industrialization and populists about the need to break away from the colonial legacies of the past and to escape from the constraints of the international capitalist system Even though they disagreed about the desired end state Argentines of all political stripes could agree on the need for economic independence and national sovereignty which would be brought about through the efforts of a national bourgeoisie James Brennan and Marcelo Rougier aim to provide a political history of this national bourgeoisie in this book Deploying an eclectic methodology combining aspects of the new institutionalism the new economic history Marxist political economy and deep research in numerous rarely consulted archives into what they dub the new business history the authors offer the first thorough empirically based history of the national bourgeoisie's peak association the Confederación General Económica CGE and of the Argentine bourgeoisie's relationship with the state They also investigate the relationship of the bourgeoisie to Perón and the Peronist movement by studying the history of one industrial sector the metalworking industry and two regional economies one primarily industrial Córdoba and another mostly agrarian Chaco with some attention to a third Tucumán a cane cultivating and sugar refining region sharing some features of both While spanning three decades the book concentrates most on the years of Peronist government 1946-55 and 1973-76

Legislative Deferrals George I. Lovell, 2003-03-31 Why do unelected federal judges have so much power to make policy in the United States Why were federal judges able to thwart apparent legislative victories won by labor organizations in the Lochner era Most scholars who have addressed such questions assume that the answer lies in the judiciary's constitutionally guaranteed independence and thus worry that insulated judges threaten democracy when they stray from baseline positions chosen by legislators This book argues for a fundamental shift in the way scholars think about judicial policy making Scholars need to notice that legislators also empower judges to make policy as a means of escaping accountability This study of legislative deference to the courts offers a dramatic reinterpretation of the history of twentieth century labor law and shows how attention to legislative deferrals can help scholars to address vexing questions about the consequences of judicial power in a democracy
