Architecture and the Text Jennifer Bloomer,1993-01-01 In this profoundly original book Jennifer Bloomer addresses important philosophical questions concerning the relation between writing and architecture Drawing together two cultural fantasies from different periods one literary and one architectural Bloomer uses the allegorical strategies she finds in James Joyce s Finnegans Wake to analyze three works of Giambattista Piranesi Campo Marzio Collegio and the Carceri Bloomer argues that architecture is a system of representation with signifying possibilities that go beyond the merely symbolic Bloomer reads the texts and ideas of Joyce and Piranesi against one another further illuminating them with insights from myth religion linguistics film theory nursery rhymes and personal anecdotes as well as from poststructuralist Marxist and feminist criticism Combining the strategies of Finnegans Wake which Joyce himself called architectural with conventional strategies of architectural thinking Bloomer creates a new way of thinking architecturally that is not dominated by linear models and that appropriates ideas parts and theoretical frameworks from many other disciplines Demonstrating her argument by dramatic example Bloomer s treatise like Joyce s word play and Piranesi s play with visual representation offers the pleasure of ongoing discovery

The Indiscrete Image Thomas A. Carlson,2009-05-15 Humanity s creative capacity has never been more unsettling than it is at our current moment when it has ushered us into new technological worlds that challenge the very definition of the human Those anxious to safeguard the human against techno scientific threats often appeal to religious traditions to protect the place and dignity of the human But how well do we understand both theological tradition and today s technological culture In The Indiscrete Image Thomas A Carlson challenges our common ideas about both arguing instead that it may be humanity s final lack of definition that first enables and calls for human creativity and its correlates including technology tradition and their inextricable interplay within religious existence Framed in response to Martin Heidegger s influential account of the relation

between technological modernity and theological tradition The Indiscrete Image builds an understanding of creativity as conditioned by insurmountable unknowing and incalculable possibility through alternative readings of Christian theological tradition and technological culture and the surprising resonance between these two Carlson concludes that the always ongoing work of world creation tied essentially to human self creation implies neither an idol's closure nor an icon's transcendence but the indiscrete image whose love makes possible by keeping open both the human and its world

Beckett's Art of Mismaking Leland de la Durantaye, 2016-01-04 Leland de la Durantaye helps us understand Beckett's strangeness and notorious difficulty by arguing that Beckett's lifelong campaign was to mismake on purpose not to denigrate himself or his audience or reconnect with the child or savage within but because he believed that such mismaking is in the interest of art and will shape its future Harpers Weekly, 1865 **Wherefrom Does History Emerge?** Tilo
