Numerous Avalanches At The Point Of Intersection:

Numerous Avalanches at the Point of Intersection Geraldine Kudaka, 1979-01-01 **A Study Guide for Hisaye Yamamoto's "Eskimo Connection"** Gale, Cengage Learning, 2016-07-14 A Study Guide for Hisaye Yamamoto's *Eskimo Connection* excerpted from Gale's acclaimed *Short Stories for Students*. This concise study guide includes plot summary, character analysis, author biography, study questions, historical context, suggestions for further reading, and much more. For any literature project, trust *Short Stories for Students* for all of your research needs. **Contemporary American Poetry** Lloyd M. Davis, 1985 Lists over 5,200 titles of books published by American poets between 1973 and 1983. **The Forbidden Stitch** Shirley Lim, Mayumi Tsutakawa, Margarita Donnelly, 1989 This first U.S. anthology of work by Asian American women contains poetry, prose, and graphic art, and a section of reviews of previously published literature. These women, in contrast to their foremothers, repeatedly identify themselves through their art. Very often they do this by showing who they are: not male, not white. The works reveal their pride in their cultural heritage. ISBN 0 934971 10 2 *A History of California Literature* Blake Allmendinger, 2015-05-19 This history explores the historical periods, literary genres, and cultural movements of California. **Asian American Literature** Elaine Kim, 1982 An introduction to the literary works of Chinese Americans, Japanese Americans, Filipino Americans, and Korean Americans, this book focuses on the self-images and social contexts of the nineteenth-century immigrants, their descendants, and the Americanized writers of today. Although the book examines the novels, autobiographies, poems, and plays themselves, the social history of Asians in America is a significant backdrop, as Maxine Hong Kingston herself argues it should be. These racially distinctive Americans have confronted in their lives and writings American stereotypes of the Oriental, racial discrimination, and the cultural gulf between East and West. After a chapter on Fu Manchu, Charlie Chan, and other Anglo-American caricatures of Asians, the author turns to a discussion of the first immigrant writers, many of whom were educated aristocrats playing the role of cultural ambassadors, and then to the less privileged, more socially critical generations of writers who followed. From works like *Flower Drum Song*, *Eat a Bowl of Tea*, *The Woman Warrior*, *China Men*, and a host of lesser-known writings, the author shows how portrayals of Chinatown, the Japanese American family, and the roles of all the Asian American women and men have changed. Drawing on her personal interviews with Asian American writers, Kim also conveys their attitudes towards their own group, other Asian Americans, other racial minorities, and white Americans: a complex mix of bitterness, acceptance, and militance. Author note: Elaine H. Kim is Associate Professor of Ethnic Studies at the University of California, Berkeley. She directs the Korean Community Center of Oakland and Asian Women United, California. **A Literary History of the American West** Western Literature Association (U.S.), 1987 Literary histories, of course, do not have a reason for being unless there exists the literature itself. This volume, perhaps more than others of its kind, is an expression of appreciation for the talented and dedicated literary artists who ignored the odds, avoided temptations to write for popularity or prestige, and

chose to write honestly about the American West believing that experiences long known to be of historical importance are also experiences that need and deserve a literature of importance **An Ear to the Ground** Marie Harris, Kathleen Aguero, 1989 A multicultural anthology of contemporary American poetry featuring works by over one hundred famous and lesser known writers including Gwendolyn Brooks Sandra Cisneros Simon Ortiz and Ray A Young Bear **An Interethnic Companion to Asian American Literature** King-Kok Cheung, 1997 A survey of Asian American literature The Oxford Encyclopedia of American Literature Jay Parini, 2004 The Encyclopedia of American Literature gathers together 350 essays from over 190 leading scholars on the whole of American literature from European discovery to the present At the core of the Encyclopedia lie 250 essays on poets playwrights essayists and novelists Figures such as Whitman Melville Faulkner Frost and Morrison are discussed in detail with each examined in the context of his or her times an assessment of the writer s current reputation a bibliography of major works and a list of major critical and biographical works about the writer Fifty entries on major works such as Moby Dick Song of Myself Walden The Great Gatsby The Waste Land Their Eyes Were Watching God Death of a Salesman and Beloved place the work in its historical context and offer a range of possibilities with regard to critical approach The Encyclopedia also contains essays on literary movements periods and themes pulling together a broad range of information and making connections between them Each entry has its own primary and annotated secondary bibliography and a system of cross references helps readers locate information with ease The Encyclopedia of American Literature is an outstanding reference source for students studying authors or particular pieces of literature libraries looking for one comprehensive source and readers interested in American literature its authors and its connection with various areas of study **Negotiating Identities** Helen Grice, 2002-10-11 Negotiating Identities is a study of the development of writing by Asian American women in the 20th century with particular emphasis on the successful late 20th century writers such as Maxine Hong Kingston Amy Tan Joy Kogawa Bharati Mukherjee and Gish Jen It relates the development of Asian writing by women in America with a comparative element incorporating Britain to a series of theoretical preoccupations the mother daughter dyad biracialism ethnic histories citizenship genre and the idea of home American Culture in the 1970s Will Kaufman, 2009-02-19 The 1970s was one of the most culturally vibrant periods in American history This book discusses the dominant cultural forms of the 1970s fiction and poetry television and drama film and visual culture popular music and style public space and spectacle and the decade s most influential practitioners and texts from Toni Morrison to All in the Family from Diane Arbus to Bruce Springsteen from M A S H to Taxi Driver and from disco divas to Vietnam protesters In response to those who consider the seventies the time of disco polyester and narcissism this book rewrites the critical engagement with one of America s most misunderstood decades Key Features Focused case studies featuring key texts and influential writers artists directors and musicians Chronology of 1970s American Culture Bibliographies for each chapter and a general bibliography on 1970s Culture 14 black and white illustrations *The Cortex*

and the Critical Point John M. Beggs, 2022-08-30 How the cerebral cortex operates near a critical phase transition point for optimum performance Individual neurons have limited computational powers but when they work together it is almost like magic Firing synchronously and then breaking off to improvise by themselves they can be paradoxically both independent and interdependent This happens near the critical point when neurons are poised between a phase where activity is damped and a phase where it is amplified where information processing is optimized and complex emergent activity patterns arise The claim that neurons in the cortex work best when they operate near the critical point is known as the criticality hypothesis In this book John Beggs one of the pioneers of this hypothesis offers an introduction to the critical point and its relevance to the brain Drawing on recent experimental evidence Beggs first explains the main ideas underlying the criticality hypotheses and emergent phenomena He then discusses the critical point and its two main consequences first scale free properties that confer optimum information processing and second universality or the idea that complex emergent phenomena like that seen near the critical point can be explained by relatively simple models that are applicable across species and scale Finally Beggs considers future directions for the field including research on homeostatic regulation quasicriticality and the expansion of the cortex and intelligence An appendix provides technical material many chapters include exercises that use freely available code and data sets
