helpful exercises allow readers to practice immediately what they've learned about the nursing process. The inclusion of critical thinking, wellness diagnoses, and ethical aspects of each step makes this a unique and important book.

Perioperative Nursing Process Barbara Diomedes, 1991      *Nursing Theory* Martha Raile Alligood, 2013-08-13 Nursing Theory Utilization: the application of different nursing theories, models, and philosophies and the expansion of these practices with a look toward the future. This text provides the opportunity for students who have learned the background of nursing theory using the companion title *Nursing Theorists and Their Work* to apply what they have learned to actual nursing practice through various patient scenarios. Real-life case history examples included in application chapters promote evidence-based practice and further demonstrate how a theory is used in practical situations. Consistent case history featuring the patient Debbie in every chapter and the nursing plan that follows help you apply philosophies, theories, and models presented in the text. Critical thinking exercises provide a more application-based approach rather than just contemplation of theories presented. Chapters written by contributors who utilize the work offer a unique approach to using theory in practice. Nursing metaparadigm discussion illustrates the four central concepts with which the discipline is concerned to help you see the scope of concern for the profession. Logical organization presents content in three distinct parts. Glossary offers quick access to key terms throughout the text. Updated nursing application examples feature realistic scenarios that promote evidence-based practice. Scenarios have been updated using references to current literature and evidence-based clinical research. New information on the benefits and cautions associated with evidence-based practice, including a new discussion of praxis, a dynamic process where theory and practice come together. Updated critical thinking exercises reflect the role of the nursing professional and advanced nursing practice, encouraging a higher level of thinking regarding the integration of theory and practice.
